QUESTION 1

Contoso, Ltd. plans to move team sites from an on-premises SharePoint environment to the cloud. You register the contoso.com domain with Office 365.

You need to configure the Office 365 environment for the hybrid infrastructure before you configure the on-premises environment.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Create a synchronization connection with Active Directory Domain Services for the User Profile service.
- Synchronize user accounts with Office 365.
- Run the Hybrid Picker.
- Assign licenses to users.
- Assign a UPN domain suffix.

QUESTION 2

You are customizing standard content types for an organization. For the tracking of a department, you must allow users to easily select or enter a value.

In some cases, users may refer to a single department by more than one name. Users must be able to select or type any name for a department but the document must be associated with only one department.

You need to create a column that supports the requirements. What should you create?

- A. a Choice site column that uses a drop-down menu.
- B. a Choice site column that uses check boxes
- C. a Choice list that uses a drop-down menu
- D. a Managed Metadata site column

Correct Answer: D

As per the requirement, users should be able to refer a single department with multiple names which can be achieved by synonyms of Managed Metadata Terms.

QUESTION 3

You need to display the values for the Document Status and Department properties. You create a term set and Managed Metadata column. Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

QUESTION 4

You are the administrator for a SharePoint 2016 farm. You configure an App Catalog and a SharePoint Store.

Users report that they get an error when they try to add an app to their sites.

You need to allow users to add apps from the SharePoint Store and ensure that all previously requested apps are added.

For each requirement, what should you do?

Hot Area:

Answer Area

Requirement	Action
Investigate the issue with adding errors	<ul style="list-style-type: none"> Configure SharePoint Store settings to allow end users to purchase apps Enable installation of apps that require accessible Internet-facing endpoints Set and enable the URL for the SharePoint app store
Install all apps requested by user	<ul style="list-style-type: none"> Purchase additional app licenses Approve user app requests that originate from the App Catalog Add apps that cannot be installed to a Monitored Apps list and analyze installation errors Collect the required apps list from users and add them manually

Correct Answer:

Answer Area

Requirement	Action
Investigate the issue with adding errors	<ul style="list-style-type: none"> Configure SharePoint Store settings to allow end users to purchase apps Enable installation of apps that require accessible Internet-facing endpoints Set and enable the URL for the SharePoint app store
Install all apps requested by user	<ul style="list-style-type: none"> Purchase additional app licenses Approve user app requests that originate from the App Catalog Add apps that cannot be installed to a Monitored Apps list and analyze installation errors Collect the required apps list from users and add them manually

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company.

You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company. The solution must include the

following features:

Dashboards

Scorecards

Key Performance Indicators (KPI)

You configure Delve.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

You need PerformancePoint Services which is aSharePoint BI tool.
