QUESTION 1

You are the SharePoint administrator for a company that manufactures and sells computer hardware components. You plan to create a public-facing website that allows customers to search for and purchase components.

Customers must be able to navigate the website by component type, and then further refine searches by the operating systems that the components support. The URL that displays when a customer selects an item must indicate the

component type. The URL must not display the full path to the page.

You need to implement a SharePoint site that allows customers to find the appropriate parts.

Which SharePoint site template and metadata feature should you use? To answer, select the appropriate option from each list in the answer area.

QUESTION 2

In this section, you will see one or more sets of questions with the same scenario and problem.

Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem.

It is also possible that none of the solutions solve the problem.

Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You have an existing SharePoint 2016 on-premises environment.

You are configuring a SharePoint hybrid solution.

You must store all personal sites in Office 365.

You create and configure a User Profile service application and deploy an App Management service application.

You deploy a My Site host collection. In SharePoint Central Administration, you create an audience. On the Configure hybrid OneDrive for Business settings page, you enter a value for the My Site URL field and specify the audience.

Does this solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 3
