### QUESTION 1

You are the SharePoint administrator for your organization. You have one web application named WebApp1 in the farm.

You need to prevent users from purchasing apps from the SharePoint Store while allowing users to request apps from the App Catalog.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

The interface shows a list of six actions on the left, each in a green-bordered box, and three empty red-bordered boxes on the right for the answer. A vertical line separates the two areas. On the right side, there are four circular arrows: a right arrow, a left arrow, an up arrow, and a down arrow, indicating the ability to move and reorder items.

- Create an App Catalog in the farm.
- Set the value of the **Should end users be able to get Apps from the SharePoint Store** option to No.
- Publish the app to the catalog site.
- Create an App Catalog site collection in WebApp1.
- Set the value of the **Should end users be able to get Apps from the SharePoint Store** option to Yes.
- Add the app to the catalog site.

Correct Answer:

**Create an App Catalog in the farm.**

**Publish the app to the catalog site.**

**Create an App Catalog site collection in WebApp1.**

Set the value of the **Should end users be able to get Apps from the SharePoint Store** option to **No.**

Set the value of the **Should end users be able to get Apps from the SharePoint Store** option to **Yes.**

**Add the app to the catalog site.**

## QUESTION 2

You are a SharePoint Administrator for Contoso, Ltd.

While doing weekly maintenance you discover that a web application at <http://sharepoint.contoso.com> has an orphan site. The orphan site is located in the WSS\_Content database.

You need to resolve the issue.

What should you do?

- A. Run the following Windows PowerShell command:  
`$wa = Get-SPWebApplication http://sharepoint.contoso.com`  
`$wa.Sites.SyncRoot`
- B. In Central Administration, select the <http://sharepoint.contoso.com> web application. Select the database that contains the orphaned site. Select Remove database and click OK. Run the Windows PowerShell cmdlet `Dismount-SPContentDB`.
- C. Run the following Windows PowerShell command:  
`$ContentDb = "WSS_Content"`  
`$db = Get-SPDatabase | where {$_.name -eq $ContentDb}`  
`Remove-SPContentDatabase $db`  
`Mount-SPContentDatabase -WebApplication http://sharepoint.contoso.com -Name $ContentDb`
- D. Run the following Windows PowerShell command:  
`$wa = Get-SPWebApplication http://sharepoint.contoso.com`  
`$wa.Sites[0].Dispose()`

Correct Answer: B

### QUESTION 3

You need to complete the configuration of the Search2016 farm.

How should you complete the Windows PowerShell command? To answer, drag the appropriate Windows PowerShell segment to the correct location or locations. Each Windows PowerShell segment may be used once, more than once, or

not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

**Windows PowerShell segments**

- SPConfigurationDatabase
- ServerRole2016
- Search
- Distributed Cache
- Search2016
- Install-SFService
- ServerRole2013

**Answer Area**

```

Connect
-DatabaseServer
-DatabaseNameSP2016Config '
-Password Company2919**
-LocalServerRole
        
```

PowerShell segments are placed in the Answer Area as follows:

- Connect: PowerShell segment
- DatabaseServer: PowerShell segment
- LocalServerRole: PowerShell segment

Correct Answer:

**Windows PowerShell segments**

- 
- 
- 
- Distributed Cache
- Search2016
- Install-SFService
- ServerRole2013

**Answer Area**

```

Connect
-DatabaseServer
-DatabaseNameSP2016Config '
-Password Company2919**
-LocalServerRole
        
```

PowerShell segments are placed in the Answer Area as follows:

- Connect: SPConfigurationDatabase
- DatabaseServer: ServerRole2016
- LocalServerRole: Search

**QUESTION 4**

Your organization sells products online. You store all product information in a secure Microsoft SQL Server database. Members of the online marketing team only access the database by using an online website administration application. The

organization's sales and product development teams do not have direct access to database. Single sign-on is enabled in the environment.

You identify the following requirements for the sales and product development teams:

You need to provide access to the product database while leveraging out-of-the box SharePoint functionality.

Which actions should you perform in sequence? To answer, select the appropriate options in the answer area.

Create a Secure Store target application that implements group mapping.                 </div>
	<div style="background-color: #cccccc; padding: 2px;">▼</div> <div style="border: 1px solid #ccc; padding: 2px;">                     Create an external content type.                      Create a content type that is based on a Report Builder report.                 </div>
3	<div style="background-color: #cccccc; padding: 2px;">▼</div> <div style="border: 1px solid #ccc; padding: 2px;">                     Configure alternate access mappings.                      Configure Report Server.                      Create an external list.                 </div>

### QUESTION 5

You are the SharePoint administrator for a company. The SharePoint environment experiences intermittent performance degradation at various times each day.

You need to gather information from the SharePoint Servers to help determine the cause of the performance degradation. You must be able to evaluate the information with both Windows tools and SharePoint tools.

In the table below, identify the action that you should perform to provide the information for each environment.

NOTE: Make only one selection in each column. Each correct selection is worth one point.

Hot Area:

## Answer Area

Action	Windows monitoring	SharePoint usage data
Launch Task Manager	<input type="checkbox"/>	<input type="checkbox"/>
Launch Resource Monitor	<input type="checkbox"/>	<input type="checkbox"/>
Run the following Windows PowerShell cmdlet: <b>Get-SPDiagnosticsPerformanceCounter</b>	<input type="checkbox"/>	<input type="checkbox"/>
Run the following Windows PowerShell cmdlet: <b>Add-SPDiagnosticsPerformanceCounter</b>	<input type="checkbox"/>	<input type="checkbox"/>
Create a Data Collector set	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

## Answer Area

Action	Windows monitoring	SharePoint usage data
Launch Task Manager	<input type="checkbox"/>	<input type="checkbox"/>
Launch Resource Monitor	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Run the following Windows PowerShell cmdlet: <b>Get-SPDiagnosticsPerformanceCounter</b>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Run the following Windows PowerShell cmdlet: <b>Add-SPDiagnosticsPerformanceCounter</b>	<input type="checkbox"/>	<input type="checkbox"/>
Create a Data Collector set	<input type="checkbox"/>	<input type="checkbox"/>
