QUESTION 1

You have an Exchange Server 2013 organization that is integrated with Microsoft Lync Server 2013. Users report that they fail to make Unified Messaging (UM) calls.

You need to perform an end-to-end test of the UM components.

Which cmdlet should you use?

- A. Test-ExchangeUMCallFlow
- B. Test-CsPhoneBootstrap
- C. Start-UMPhoneSession
- D. Test-UMConnectivity

Correct Answer: A

Use the Test-ExchangeUMCallFlow cmdlet (the UM Troubleshooting Tool) to test call flow between Client Access servers running the Microsoft Exchange Unified Messaging Call Router service, Mailbox servers running the Microsoft Exchange Unified Messaging service, VoIP gateways, IP PBXs, Session Initiation Protocol (SIP) servers and Microsoft Lync Server. The Test-ExchangeUMCallFlow cmdlet can be used to diagnose configuration errors found in telephony components, Exchange 2010 SP1 or later or Exchange 2013 Unified Messaging settings, and connectivity issues between on-premises and hybrid Unified Messaging deployments.

Incorrect answers:

Not B: The Test-CsPhoneBootstrap cmdlet verifies that a user can log on to Skype for Business Server 2015 using a Phone Edition-compatible device. Not D: Use the Test-UMConnectivity cmdlet to test the operation of a Mailbox server computer running the Microsoft Exchange Unified Messaging service.

Reference: Test-ExchangeUMCallFlow

QUESTION 2

You need to identify which technologies must be deployed to meet the Office 365 coexistence requirements. Which two technologies should you identify? (Each correct answer presents part of the solution. Choose two.)

- A. the Microsoft Online Services Directory Synchronization tool
- B. Active Directory Federation Services (AD FS) 2.0
- C. Active Directory Rights Management Services (AD RMS)
- D. an internal root CA
- E. Active Directory Lightweight Directory Services (AD LDS)

Correct Answer: AB

* Scenario: Contoso identifies the following Office 365 coexistence requirements:

/ Office 365 users must be able to access their mailbox by using their Active Directory user account in Contoso.

/ On-premises users must be able to share free/busy information and calendar information with the Office 365 users.

A: When you create an Office 365 mailbox in Exchange Online in a hybrid deployment, the mail user is created in Active Directory on-premises. Directory synchronization, if it's configured, automatically synchronizes this new user object to

Office 365, where it's converted to a cloud mailbox in Exchange Online. You can create Office 365 mailboxes as regular user mailboxes, resource mailboxes for meeting rooms and equipment, and shared mailboxes.

B: Step-By-Step: Setting up AD FS and Enabling Single Sign-On to Office 365

QUESTION 3

HOTSPOT

You plan to create two retention tags named Tag1 and Tag2. Tag1 will be used to move email messages to the Archive mailbox. Tag2 will be used to delete the email messages.

You need to identify which settings must be configured in the retention tags to meet the technical requirements.

How should you configure each retention tag?

To answer, configure the appropriate options for each retention tag setting in the answer area.

Hot Area:

Setting	Tag1	Tag2
Retention tag type	<input type="text"/> All Inbox Personal	<input type="text"/> All Inbox Personal
Retention action	<input type="text"/> Move to archive mailbox Permanently delete Delete and allow recovery	<input type="text"/> Move to archive mailbox Permanently delete Move to archive mailbox
Retention period	<input type="text"/> After 30 days After 335 days After 365 days	<input type="text"/> After 30 days After 335 days After 365 days

Correct Answer:

Setting	Tag1	Tag2
Retention tag type	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right;">▼</div> <div style="background-color: #e0f0e0; padding: 2px;">All</div> <div style="padding: 2px;">Inbox</div> <div style="padding: 2px;">Personal</div> </div>	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right;">▼</div> <div style="background-color: #e0f0e0; padding: 2px;">All</div> <div style="padding: 2px;">Inbox</div> <div style="padding: 2px;">Personal</div> </div>
Retention action	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right;">▼</div> <div style="background-color: #e0f0e0; padding: 2px;">Move to archive mailbox</div> <div style="padding: 2px;">Permanently delete</div> <div style="padding: 2px;">Delete and allow recovery</div> </div>	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right;">▼</div> <div style="padding: 2px;">Move to archive mailbox</div> <div style="background-color: #e0f0e0; padding: 2px;">Permanently delete</div> <div style="padding: 2px;">Move to archive mailbox</div> </div>
Retention period	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right;">▼</div> <div style="background-color: #e0f0e0; padding: 2px;">After 30 days</div> <div style="padding: 2px;">After 335 days</div> <div style="padding: 2px;">After 365 days</div> </div>	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right;">▼</div> <div style="padding: 2px;">After 30 days</div> <div style="padding: 2px;">After 335 days</div> <div style="background-color: #e0f0e0; padding: 2px;">After 365 days</div> </div>

* Scenario:

Implement an archiving policy that moves all of the email messages from the mailbox folders to an Archive mailbox after 30 days and permanently deletes all of the email messages after 365 days.

* Both Tag Types should affect all email messages. For the first policy move the archive after 30 days. The second policy should permanently delete the messages after 365 days.

QUESTION 4

DRAG DROP

The Montreal data center experiences a power failure.

You need to ensure that all the users can access their mailbox.

Which three actions should you perform?

To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Run the Start-DatabaseAvailabilityGroup cmdlet.	
Run the net start clussvc /forcequorum command.	
Run the stop-service clussvc command.	
Run the Restore-DatabaseAvailabilityGroup cmdlet.	
Run the Stop-DatabaseAvailabilityGroup cmdlet.	
Run the cluster dag01 node ex2 /forcecleanup command.	

Correct Answer:

Actions	Answer Area
Run the Start-DatabaseAvailabilityGroup cmdlet.	Run the Stop-DatabaseAvailabilityGroup cmdlet.
Run the net start clussvc /forcequorum command.	Run the stop-service clussvc command.
	Run the Restore-DatabaseAvailabilityGroup cmdlet.
Run the cluster dag01 node ex2 /forcecleanup command.	

QUESTION 5

You need to recommend a solution to meet the compliance requirement for the legal department. What should you include in the recommendation?

- A. A retention hold
- B. The Discovery Management management role group
- C. A litigation hold
- D. The Recipient Management management role group

Correct Answer: B

*

Scenario: The legal department must be able to search for messages in all of the mailboxes.

*

Administrators or users who are members of the Discovery Management role group can perform searches of mailboxes

in the Exchange organization for data that meets specific criteria and can also configure litigation holds on mailboxes.
