Hot Area:

Messages sent to recipients on the server will (answer choice)

▼
Will be received
Will not be received, the messages will be discarded
Will not be received, the messages will be kept

Messages sent from mailboxes on the server by using Outlook on the web will (answer choice)

▼
Will be received
Will not be received, the messages will be discarded
Will not be received, the messages will be kept

Correct Answer:

Messages sent to recipients on the server will (answer choice)

▼
Will be received
Will not be received, the messages will be discarded
Will not be received, the messages will be kept

Messages sent from mailboxes on the server by using Outlook on the web will (answer choice)

▼
Will be received
Will not be received, the messages will be discarded
Will not be received, the messages will be kept

QUESTION 2

You deploy an Exchange Server 2016 organization.

You create a data loss prevention (DLP) rule package.

You need to import the rule package.

Which cmdlet should you use?

- A. New-MessageClassification
- B. New-DlpPolicy
- C. New-DataClassification
- D. New-ClassificationRuleCollection

Correct Answer: D

QUESTION 3

You need to recommend changes to the existing environment to meet the high-availability requirements for the mailbox databases. What should you recommend?

- A. Run the Update-MailboxDatabaseCopy cmdlet.
- B. Deploy a file share witness in Azure.

- C. Run the Set-MailboxServer cmdlet.
- D. Deploy a file share witness to a branch office.

Correct Answer: B

QUESTION 4

Your company recently deployed Exchange Server 2016.

Users use a variety of mobile devices to access their mailbox, including iPhones and iPads.

You need to configure security for the users who connect to the corporate network by using their mobile device.

The solution must meet the following requirements:

- Users must be required to enter a complex password to unlock their device.
- Only devices that run iOS 8 or later must be allowed to connect to the Exchange Server organization.
- Users who fail to download the security settings defined by the organization must be prevented from accessing their mailbox.

Which cmdlet should you use for each requirement? To answer, drag the appropriate cmdlets to the correct requirements. Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

Select and Place:

Answer Area

Cmdlets	Requirements	Placeholder
New-ActiveSyncDeviceAccessRule	Users must be required to enter a complex password to unlock their device:	Cmdlet
Set-ActiveSyncOrganizationSettings	Users who fail to download the security settings defined by the organization must be prevented from accessing their mailbox:	Cmdlet
Set-CASMailbox	Only devices that run iOS 8 or later must be allowed to connect to the Exchange Server organization:	Cmdlet
Set-MobileDeviceMailboxPolicy		

Correct Answer:

Answer Area

Cmdlets

	Users must be required to enter a complex password to unlock their device.	Set-MobileDeviceMailboxPolicy
Set-ActiveSyncOrganizationSettings	Users who fail to download the security settings defined by the organization must be prevented from accessing their mailbox.	Set-CASMailbox
	Only devices that run iOS 8 or later must be allowed to connect to the Exchange Server organization.	New-ActiveSyncDeviceAccessRule

QUESTION 5

You plan to configure the Exchange organization for site failovers.

You need to recommend how many certificates must be deployed to meet the availability requirements and the security requirements.

What is the minimum number of certificates you should recommend deploying?

- A. One
- B. Two
- C. Three
- D. Four

Correct Answer: C
