QUESTION 1

You manage an Exchange Server 2016 organization that spans two sites. The sites are located in Los Angeles and New York.

You have a database availability group (DAG) named DAG1 that contains four members, two in each site.

The names and location of each DAG1 member are as follows:

EX01 and EX02 are in the New York site.

EX03 and EX04 are in the Los Angeles site.

A user has a mailbox on a database that is currently active on EX03.

The Front End Transport service on EX01 receives a message from the Internet. The message is addressed only to the user.

Based on this information, how will the Front End Transport service always attempt to route the first delivery attempt of the message?

A. The Transport service on EX01

B. The Transport service on EX03

C. The Transport service on one of the servers in the New York site

D. The Transport service on one of the servers in the Los Angeles site

Correct Answer: B

The Front End Transport service will always attempt to route the first delivery attempt of the message to the Transport service on one of the servers in the New York site. For incoming messages with a single mailbox recipient, the Front End Transport (FET) service will select a mailbox server in the target delivery group, and give a higher priority to whichever mailbox server has the closest proximity based on the Active Directory site topology. In this scenario, the target delivery group is a routable DAG, and the Active Directory site with the closest proximity to the FET instance on EX01 is the Transport Service on EX01 or EX02 in New York. The Front End Transport service will not always attempt to route the first delivery attempt of the message to the Transport service on EX01. While the Transport service on EX01 is a possibility, there is no guarantee that it will be the target of the first delivery attempt from the FET service. All servers in the New York site are equal candidates for being targeted. The Front End Transport service will not always attempt to route the first delivery attempt of the message to the Transport service on EX03. EX03, as well as any server in the Los Angeles site, would not be targets of the first delivery attempt from the FET service on EX01 because they are not within the closest proximity. The Front End Transport service will not always attempt to route the first delivery attempt of the message to the Transport service on one of the servers in the Los Angeles site because they are not within the closest proximity, based on the Active Directory topology.

QUESTION 2

You have an Exchange Server 2016 organization.

You need to create a resource record in DNS to support Autodiscover from the Internet.

What type of resource record should you create?

A. Host (A)

B. Text (TXT)

C. Pointer (PTR)

D. Mail exchange (MX)

Correct Answer: A

QUESTION 3

DRAG DROP

You have an Exchange Server 2016 organization. The organization contains two Mailbox servers. You have a database that is replicated to both servers. The database contains 500 mailboxes. You add new volumes to the Mailbox servers.

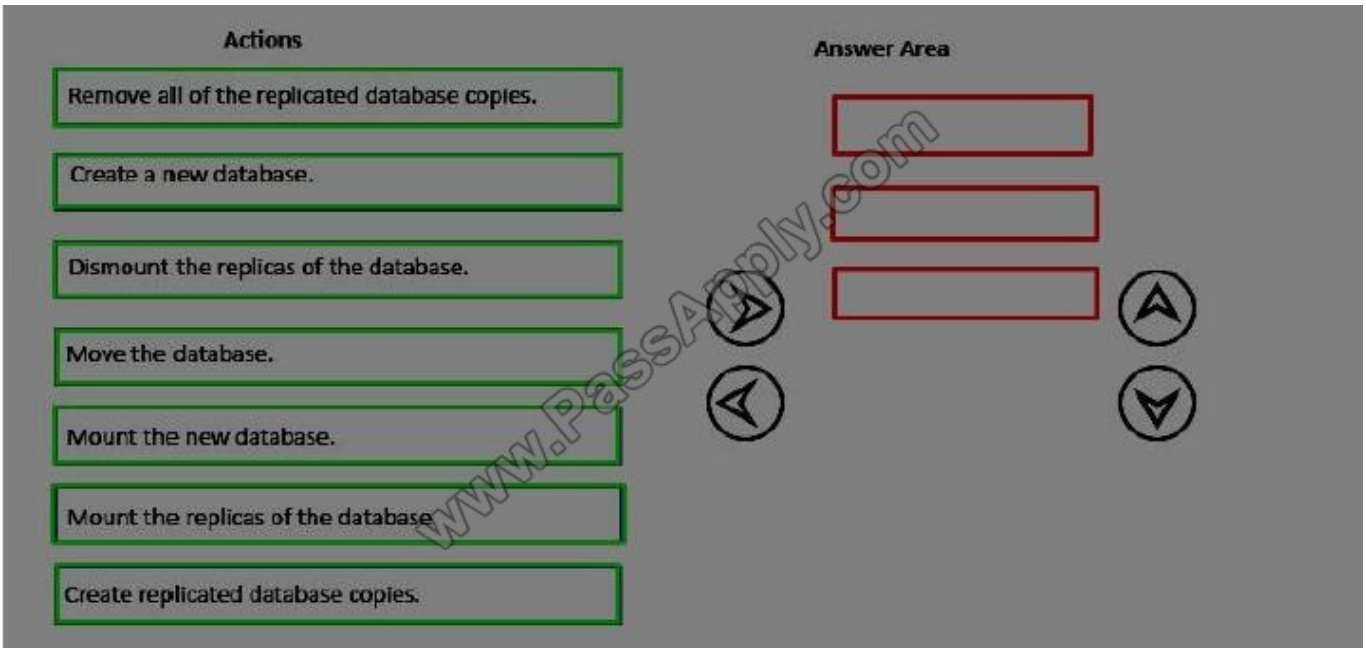
You need to move all of the mailbox data to the new volumes. The solution must meet the following requirements:

Ensure that multiple copies of the mailbox data are available at all times.

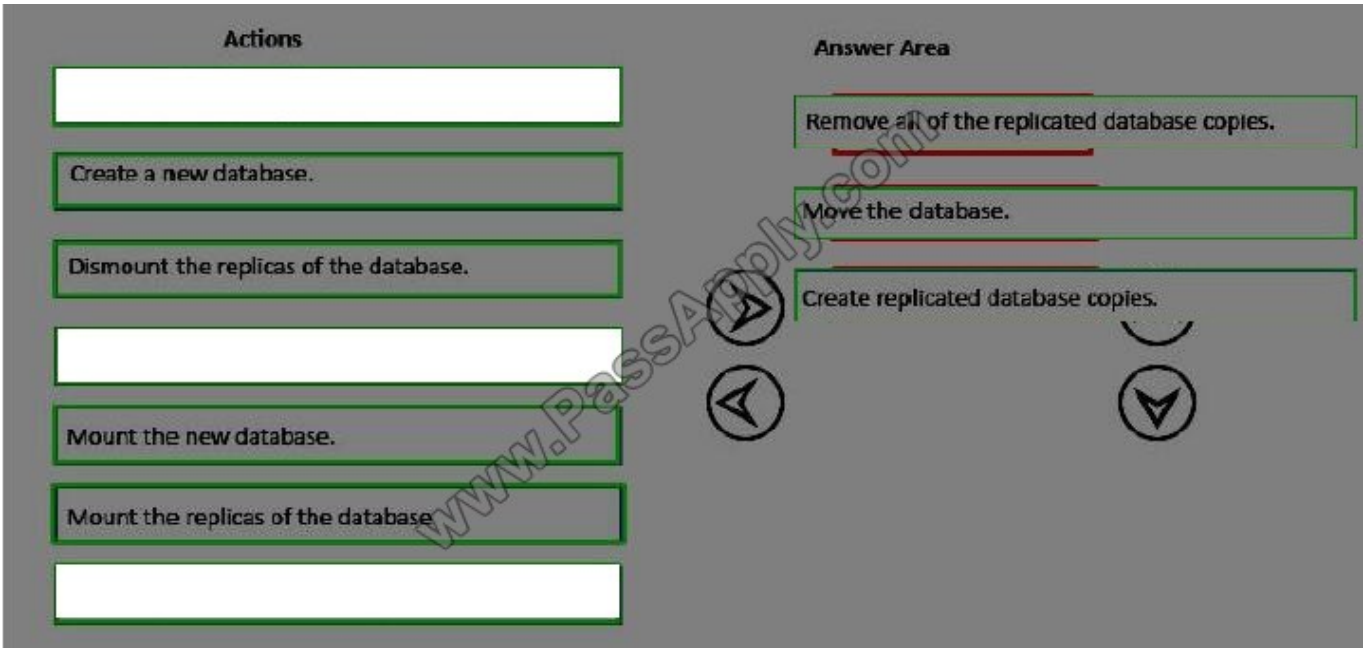
Minimize downtime for the mailbox users.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:



Correct Answer:



QUESTION 4

DRAG DROP

You need to configure a distribution group named CustomerService that has the following configurations:

A user named CSManager must be the only user allowed to add members to CustomerService.

All email messages sent to CustomerService must be approved by CSManager.

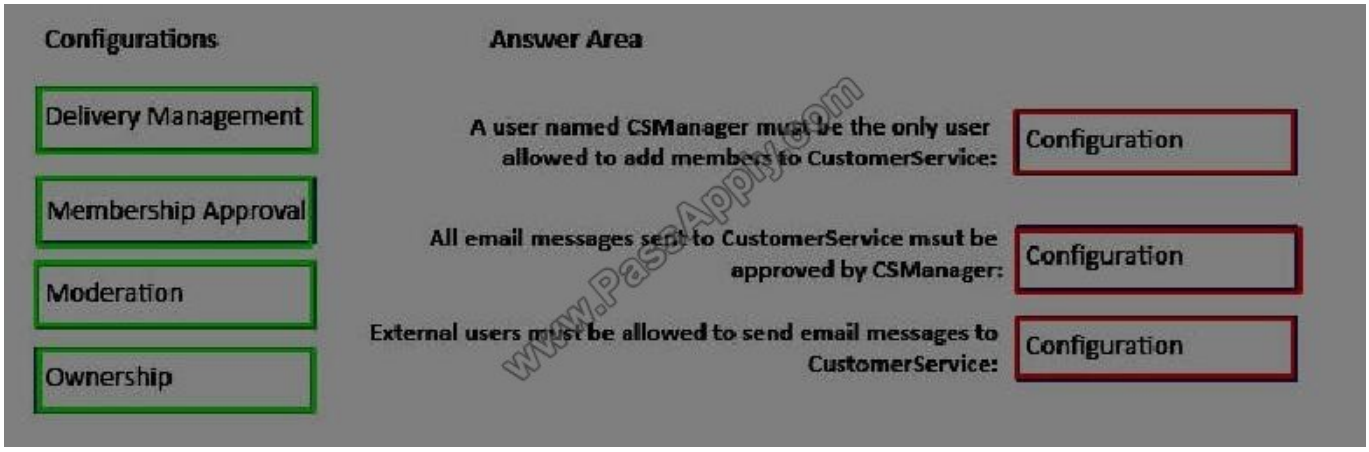
External users must be allowed to send email messages to CustomerService.

You configure CSManager as the group owner.

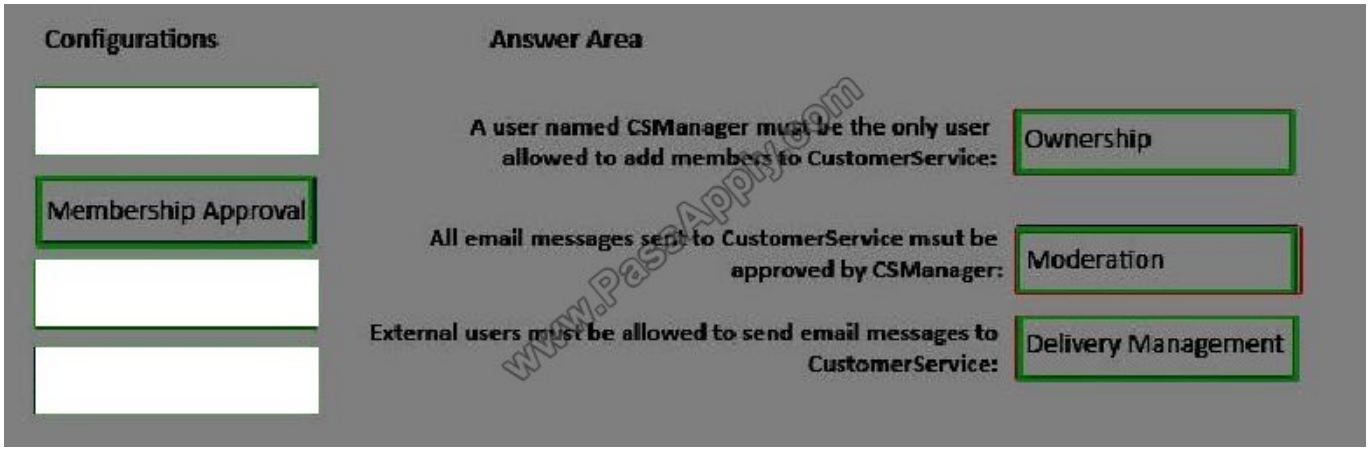
What should you configure in the Exchange admin center for each requirement?

To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar, between panes or scroll to view content.

Select and Place:



Correct Answer:



QUESTION 5

You need to recommend a solution that meets the security requirements for the mailbox databases. What should you include in the recommendation?

A. Resilient File System (ReFS)

B. Transparent Data Encryption (TDE)

C. BitLocker Drive Encryption (BitLocker)

D. Encrypting Files System (EFS)

Correct Answer: C
