QUESTION 1

Your company uses Office 365 and has an Enterprise E3 license plan. Employees are issued laptop computers that are configured with a standard image. The image includes an installation of Office 365 ProPlus that must be activated by the employees.

An employee recently received a new laptop computer to replace an older laptop. The older laptop will be reimaged. When the employee attempts to start Word for the first time, she receives a message saying that she cannot activate it because she has already activated five devices.

You need to help the employee activate Office on her new laptop computer.

What should you do?

- A. Assign a second E3 license to the employee.
- B. Remove the employee's E3 license and then assign a new E3 license.
- C. Sign in to the Office 365 portal as the employee and deactivate the old laptop.
- D. Sign in to the Office 365 portal by using your Global Admin account and then deactivate the old laptop.

Correct Answer: C

Office 365 ProPlus license permits a user to install Office on a maximum of five devices. For the user to install office on a 6th device, one of the devices that Office was previously activated on must be deactivated.

QUESTION 2

DRAG DROP

An organization has an on-premises Exchange 2010 server. The organization plans to migrate to Exchange Online.

You have the following requirements:

- You must minimize the impact of the migration on users.
- Users must sign in to Office 365 by using the same password that they use for onpremises services.
- You must use the fewest additional servers possible.

You need to complete the migration.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select and Place:

Actions	Answer Area
Install and configure the Azure Active Directory Synchronization (AAD Sync) tool with password syn on an existing domain controller.	
Run the Hybrid Configuration wizard on the existing Exchange 2010 server.	
Migrate users by using a Remote move migration.	
Migrate users by using a Cutover migration.	
Install and configure the Azure Active Directory Synchronization (AAD Sync) tool with password sync on a new member server.	
Migrate users by using a Staged migration.	
Migrate users by using an IMAP migration.	

Correct Answer:

Actions	Answer Area
	Run the Hybrid Configuration wizard on the existing Exchange 2010 server.
	Install and configure the Azure Active Directory Synchronization (AAD Sync) tool with password syn on an existing domain controller.
	Migrate users by using a Remote move migration.
Migrate users by using a Cutover migration.	
Install and configure the Azure Active Directory Synchronization (AAD Sync) tool with password sync on a new member server.	
Migrate users by using a Staged migration.	
Migrate users by using an IMAP migration.	

QUESTION 3

You have an Office 365 subscription that has a site collection with a URL of <https://contoso.sharepoint.com>.

Users report that they are prevented from uploading documents to the site because of free space issue. You increase the storage quota for the site collection to 1000 MB.

You need to ensure that you receive a warning message when the site collection uses 90 percent of the available space.

What command should you run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Set-SPOSite
Set-SPOSiteGroup

-Identify
-Site
-URL

<https://contoso.sharepoint.com>

-ResourceQuotaWarningLevel 90
-StorageQuota 900
-StorageQuotaWarningLevel 900

Correct Answer:

Answer Area

Set-SPOSite
Set-SPOSiteGroup

-Identify
-Site
-URL

<https://contoso.sharepoint.com>

-ResourceQuotaWarningLevel 90
-StorageQuota 900
-StorageQuotaWarningLevel 900

QUESTION 4

You are an administrator for a company. All clients run Office Professional 2016 or Office 365 ProPlus. Your organization uses System Center Configuration Manager 2012 R2 for deploying software to desktops.

You must enable automated Office telemetry data collection.

You need to enable Office telemetry without manually connecting to and configuring each machine.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer area
Deploy the telemetry agent by using a System Center Configuration Manager(SCCM) package	
Link to the new GPO to the appropriate container in Active Directory that contains the clients you want to enable for telemetry data collection.	
Deploy the telemetry agent by using a System Center Configuration Manager (SCCM) application.	
Import the Office 16.admx and Office16.adml template files into the Group Policy Management console.	
Create a GPO to enable telemetry data collection.	
Edit the registry on the clients to enable telemetry data collection.	
Create a GPO to deploy the telemetry agent	

Correct Answer:

Actions	Answer area
Deploy the telemetry agent by using a System Center Configuration Manager(SCCM) package	Deploy the telemetry agent by using a System Center Configuration Manager (SCCM) application.
Link to the new GPO to the appropriate container in Active Directory that contains the clients you want to enable for telemetry data collection.	Import the Office 16.admx and Office16.adml template files into the Group Policy Management console.
	Create a GPO to enable telemetry data collection.
Edit the registry on the clients to enable telemetry data collection.	
Create a GPO to deploy the telemetry agent	

After the Telemetry Agent is deployed to the client computers, you must configure the agent on each client by setting the correct registry values. If you have Active Directory, we recommend that you Use Group Policy to enable and configure

Telemetry Agent.

Box 1:

Use these steps of Telemetry Agent deployment by using Configuration Manager:

Create an application for the Telemetry Agent by using Configuration Manager

Deploy the application by using Configuration Manager

Configure the Telemetry Agent

Box 2-3:

Once the server side is configured, it's time to enable and direct the Telemetry toward our Telemetry Processors. We need to configure a GPO for Office 2013 or Office 2016 in order to do so.

Edit a GPO and browse to User Configuration/Administrative Templates/Microsoft Office 2016/Telemetry Dashboard

Edit Specify the UNC path to store Office Telemetry data

Edit Turn on telemetry data collection. Set to Enabled.

Edit Turn on data uploading for Office Telemetry Agent. Set to Enabled.

QUESTION 5

You are the Office 365 administrator for your company. You manage an on-premises Microsoft Exchange Server 2003 environment that has 500 users and an externally-hosted Exchange environment that has 500 users. The hosted

Exchange environment does not allow Outlook Anywhere connectivity. You do not have administrative access to all mailboxes in the hosted environment.

You plan to migrate and consolidate both environments into Office 365.

You have the following migration requirements:

Migrate on-premises mailboxes in batches by department.

Migrate email, calendar, and contact items from the on-premises environment.

Migrate only email from the hosted environment.

In the table below, identify the migration type that must be used for each environment. Make only one selection in each column. Each correct selection is worth one point.

Hot Area:

On-premises Exchange	Hosted Exchange	Migration type
<input type="checkbox"/>	<input type="checkbox"/>	Remote move migration
<input type="checkbox"/>	<input type="checkbox"/>	Staged migration
<input type="checkbox"/>	<input type="checkbox"/>	Cutover migration
<input type="checkbox"/>	<input type="checkbox"/>	IMAP migration

Hot Area:

On-premises Exchange	Hosted Exchange	Migration type
<input type="checkbox"/>	<input type="checkbox"/>	Remote move migration
<input type="checkbox"/>	<input type="checkbox"/>	Staged migration
<input type="checkbox"/>	<input type="checkbox"/>	Cutover migration
<input type="checkbox"/>	<input type="checkbox"/>	IMAP migration

Correct Answer:

On-premises Exchange	Hosted Exchange	Migration type
<input type="checkbox"/>	<input type="checkbox"/>	Remote move migration
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Staged migration
<input type="checkbox"/>	<input type="checkbox"/>	Cutover migration
<input type="checkbox"/>	<input checked="" type="checkbox"/>	IMAP migration

For the migration of the on-premise Exchange 2003 mailboxes, we can use a staged migration.

In a staged Exchange migration, mailboxes in your on-premises Exchange organization are migrated to Exchange Online in batches. A staged Exchange migration is a good option if your current on-premises email organization and migration

goals meet the following conditions:

For the migration of the hosted Exchange mailboxes, we can use an IMAP migration.

In an IMAP migration, the contents of users' mailboxes on an IMAP messaging system are migrated to their Exchange Online mailboxes. Here are some requirements and

considerations for using an IMAP migration:
