### QUESTION 1

You are the Exchange Online administrator for a company that has offices in Seattle, New York, London, and Paris. The StateOrProvince attribute in Active Directory is populated with each user's

location.

Employees must be able to send email messages to all users in Europe.

You need to create the distribution group.

How should you complete the Windows PowerShell command? To answer, select the appropriate segment from each list in the answer area.

Hot Area:

Correct Answer:

Box 1: New-DynamicDistributionGroup

Use the New-DynamicDistributionGroup cmdlet to create a dynamic distribution group.

A dynamic distribution group queries Active Directory mail-enabled objects and builds the group membership based on the results. The group membership is recalculated whenever an email message is sent to the group.

Box 2, Box 3: RecipientFilter, RecipientContainer

Example: This example uses the RecipientFilter parameter to create the dynamic distribution group Pacific Northwest in the Users container in the contoso.com domain. The Pacific Northwest dynamic distribution group contains all mailbox users found anywhere in the contoso.com domain who have a State/Province field that equals "Washington" or "Oregon".

```
New-DynamicDistributionGroup -Name "Pacific Northwest" -Alias "Pacific_Northwest" -OrganizationalUnit "contoso.com/Users" -RecipientFilter {((RecipientType -eq \\UserMailbox\\) -and ((StateOrProvince -eq \\Washington\\' -or StateOrProvince -eq \\Oregon\\'))))} -RecipientContainer "contoso.com"
```

## QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the Office 365 administrator for a company. All employees use Office 365 authentication, email, and Office

applications.

You need to implement a process to review email, Facebook posts, and files saved to Dropbox.

Solution: You implement a data loss prevention policy.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

#### QUESTION 4

A company plans to deploy Office 365 ProPlus.

You must gather compatibility data, hardware information, and Microsoft Office usage statistics. You must also deploy the Office Telemetry Dashboard.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order

Select and Place:

Actions	Answer Area
Install SQL Server 2012	
On the SQL Server, grant sysadmin permissions to the account that is used for installation.	
On the SQL Server, grant dbowner permissions to the account that is used for installation.	➤
Install the Telemetry Processor tool.	
Connect the Telemetry Dashboard to the SQL database.	➤
On the computer that runs the Telemetry Dashboard, modify the registry to include the file share UNC path.	⬆
	⬇

Correct Answer:

Actions	Answer Area
	Install SQL Server 2012
On the SQL Server, grant dbowner permissions to the account that is used for installation.	On the SQL Server, grant sysadmin permissions to the account that is used for installation.
	Install the Telemetry Processor tool.
	Connect the Telemetry Dashboard to the SQL database.
On the computer that runs the Telemetry Dashboard, modify the registry to include the file share UNC path.	

Step 1: Install SQL Server 2012

SQL Server must be deployed before you can configure Telemetry Dashboard.

Step 2: On the SQL Server, grant dbowner permissions to the account that is used for installation.

Permissions to create a database (sysadmin role in SQL Server). To create and configure a new database, the account that runs the Telemetry Processor wizard must be a domain account that is a member of the sysadmin server-level role on the SQL Server.

Step 3: Install the Telemetry Processor tool.

Telemetry Processor runs on one or more computers and collects inventory, usage, and telemetric data from the telemetry shared folder and imports the data to the telemetry database.

Step 4: Connect the Telemetry Dashboard to the SQL database.

The telemetry database, which was created by the Telemetry Processor settings wizard, is ready to be configured and connected to Telemetry Dashboard.
