QUESTION 1

You administer Office 365 for an organization. Office 365 groups cannot be used.

You must configure all group options when you create the group.

You need to create a distribution group that meets the following requirements:

All group members must receive emails sent to the group,

Users must send a request to join the group.

Requests must be approved only by group owners.

Display a message whenever an Office 365 user attempts to send email to the group.

You need to complete the test migration.

Which four actions should you perform in sequence?

Select and Place:

Actions	Answer area
Edit the new group and create a MailTip	
In the Microsoft Exchange admin center, create a new dynamic distribution group.	
Configure the group to use the public privacy option.	
Configure the group to use the Owner approval option.	
In the Microsoft Exchange admin center, create a new distribution group.	
Configure the group to use the Closed approval option.	

Correct Answer:

Actions	Answer area
	Configure the group to use the public privacy option.
	In the Microsoft Exchange admin center, create a new distribution group.
	In the Microsoft Exchange admin center, create a new dynamic distribution group.
Configure the group to use the Owner approval option.	Edit the new group and create a MailTip
Configure the group to use the Closed approval option.	

QUESTION 2

Your company has an Office 365 subscription and uses Microsoft Exchange Online. Some employees have archive mailboxes that have the default retention policy applied.

The default retention policy does not meet the latest company requirements. You create a retention policy named RetentionPolicy1 and apply the necessary retention tags to the policy. You need to apply the new retention policy to all archive mailboxes and ensure that the new retention policy tags are applied as soon as possible.

Which three Windows PowerShell commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Select and Place:

	Answer Area
`$users = Get-Mailbox -ResultSize unlimited -Filter {(ArchiveStatus -eq "Active")}`	
`$users	ForEach-Object {Set-MailboxPlan $_.Identity -RetentionPolicy "RetentionPolicy1"}`	
`$users	ForEach-Object {Set-Mailbox $_.Identity -RetentionPolicy "RetentionPolicy1"}`	
`$users = Get-MailUser -ResultSize unlimited Filter {(ArchiveStatus -eq "Active")}`	
`$users	ForEach-Object {Start-ProvisioningRequest -Identity $_.Identity}`	
`$users	ForEach-Object {Start-ManagedFolderAssistant -Identity $_.Identity}`	

Correct Answer:

Answer Area

$users | ForEach-Object {Set-MailboxPlan
$_.Identity -RetentionPolicy
"RetentionPolicy1"}

$users = Get-Mailbox -ResultSize unlimited -
Filter {(ArchiveStatus -eq "Active")}

$users | ForEach-Object {Set-Mailbox
$_.Identity -RetentionPolicy
"RetentionPolicy1"}

$users = Get-MailUser -ResultSize unlimited -
Filter {(ArchiveStatus -eq "Active")}

$users | ForEach-Object {Start-
ManagedFolderAssistant -Identity $_.Identity}

$users | ForEach-Object {Start-
ProvisioningRequest -Identity $_.Identity}

Retention Policy Tags are used to apply retention settings to folders and individual items such as e-mail messages. These settings specify how long a message remains in a mailbox and the action to be taken when the message reaches the

specified retention age.

A Retention Policy is a group of retention tags that can be applied to a mailbox.

Box 1: The Get-Mailbox cmdlet retrieves a list of mailboxes. The -Filter {(ArchiveStatus –eq 'Active')} statement filters the list of retrieved mailboxes to list only the mailboxes that have Archiving enabled and active.

Box 2: The Set-Mailbox cmdlet is used to assign the retention policy to the mailboxes retrieved in step 1.

Box 3: The Start-ManagedFolderAssistant cmdlet is used to immediately start messaging records management (MRM) processing of mailboxes. This will immediately apply the new retention policy.

QUESTION 3

NOTE: This question is part of a series of questions that present the same scenario. Each question in the series holds a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to configure external user sharing for One Drive.

Solution: You set the value of the OneDrive External sharing option to Anyone.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 4

You are the Office 365 administrator for your company.

The company uses Microsoft Skype for Business Online and wants to customize Skype for Business meeting invitations.

You need to identify the URLs that can be changed on the Lync meeting invitations from the Lync admin center.

Which three URLs can be changed? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Company URL

B. Meeting URL

C. Legal URL

D. Logo URL

E. Help URL

Correct Answer: CDE

When customizing meeting invitations, you are able to change the Logo, Help, and Legal URIs, as well as the Footer text.

QUESTION 5

You manage a Microsoft SharePoint Online tenant that has coauthoring enabled.

A user named User1 fails to access a document that she uses regularly.

You open the document library settings as shown in the exhibit. (Click the Exhibit button.)

Require content approval for submitted items?
  C Yes   ⊙ No

Create a version each time you edit a file in this document library?
  C No versioning
  ⊙ Create major versions
    Exmaple: 1, 2, 3, 4
  C Create major and minor (draft) versions
    Example: 1.0, 1.1, 1.2, 2.0

Optionally limit the number of versions to retain:
  ☑ Keep the following number of major versions:
    [10]
  ☐ Keep drafts for the following number of major versions:

Who should see draft items in this document library?
  ⊙ Any user who can read items
  C Only users who can edit items
  C Only users who can approve items (and the author of the item)

Require documents to be checked out before they can be edited?
  C Yes   ⊙ No

You need to ensure that User1 can access the document in the document library.

What should you do?

A. Set Create a version each time you edit a file in this document library to No versioning.

B. Set Require documents to be checked out before they can be edited to No.

C. Set Create a version each time you edit a file in this document library to Create major and minor (drafts) versions.

D. Set Keep the following number of major versions and set the option to 0.

Correct Answer: B
