QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You configure an In-Place Hold for a user based on the technical requirement.

Which three Skype for Business features are disabled for the user? Each correct answer presents part of the solution.

- A. shared Microsoft OneNote pages
- B. file transfers
- C. desktop sharing
- D. audio conferencing
- E. video conferencing
- F. Microsoft PowerPoint annotations

Correct Answer: ABF

The For compliance, turn off non-archived features options turns off the following features:

Shared OneNote pages File transfer using instant messaging PowerPoint annotations

From scenario: If an In-Place Hold is configured for a user, the For compliance, turn off non-archived features Skype for Business Online option must be enabled.

QUESTION 2

Your company has an Office 365 subscription and uses Microsoft Exchange Online.

You are creating several Exchange objects to meet different requirements.

You need to ascertain the correct recipient type for each object based on the description.

Which recipient type best matches each description? To answer, drag the appropriate recipient types to the correct targets. Each recipient type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Answer Area	
Recipient description	Recipient type
An external user who will not require access to the Office 365 portal. The GAL must display the user's external email address.	<input type="text"/>
An external user who will require access to the Office 365 portal. The GAL must display the user's external email address.	<input type="text"/>
Any department member must be able to open the mailbox and reply to email messages. The GAL must display this recipient.	<input type="text"/>
Email messages sent to this recipient must be sent to every department member. The GAL must display this recipient.	<input type="text"/>

Correct Answer:

Answer Area	
Recipient description	Recipient type
An external user who will not require access to the Office 365 portal. The GAL must display the user's external email address.	<input type="text" value="Mail contact"/>
An external user who will require access to the Office 365 portal. The GAL must display the user's external email address.	<input type="text" value="Mail user"/>
Any department member must be able to open the mailbox and reply to email messages. The GAL must display this recipient.	<input type="text" value="Shared mailbox"/>
Email messages sent to this recipient must be sent to every department member. The GAL must display this recipient.	<input type="text" value="Distribution list"/>

A mail contact is a mail-enabled Active Directory contact that contains information about people or organizations that exist outside the Exchange organization. Each mail contact has an external email address. All messages sent to the mail

contact are routed to this external email address.

A mail user is a mail-enabled Active Directory user that represents a user outside the Exchange organization. Each mail user has an external email address. All messages sent to the mail user are routed to this external email address. A mail

user is similar to a mail contact, except that a mail user has Active Directory logon credentials and can access resources (can log in to the Office 365 portal).

A shared mailbox is a mailbox that is not primarily associated with a single user and is generally configured to allow access for multiple users.

A distribution group or distribution list is a mail-enabled Active Directory distribution group object that can be used only to distribute messages to a group of recipients.

QUESTION 3

Your company uses Microsoft Exchange Online and Microsoft Lync Online.

You are planning the compliance strategy for electronic correspondence.

You need to archive Lync communications for mailboxes that are placed on an in-place hold.

Which two forms of Lync communications should you archive? Each correct answer presents part of the solution.

- A. Multiparty instant messages
- B. Peer-to-peer file transfers
- C. Audio and video for peer-to-peer conferences
- D. Whiteboards and polls shared during conferences
- E. Desktop sharing sessions

Correct Answer: AD

Lync Server 2013 Archiving provides options to help you meet your compliance needs. The following types of content can be archived: Peer-to-peer instant messages Conferences (meetings), which are multiparty instant messages Conference content, including uploaded content (for example, handouts) and event-related content (for example, joining, leaving, uploading sharing, and changes in visibility) Whiteboards and polls shared during a conference The following types of content are not archived: Peer-to-peer file transfers Audio/video for peer-to-peer instant messages and conferences Desktop and application sharing for peer-to-peer instant messages and conferences References: <http://technet.microsoft.com/en-us/library/lync-online-security-and-archiving.aspx>

QUESTION 4

You administer an Office 365 deployment.

You need to ensure that users can dial telephone numbers by using either the Skype for Business app for Windows or the Skype for Business mobile app.

What should you do?

- A. Run the Windows PowerShell cmdlet Set-CsOnlineVoiceUser.
- B. In the Office 365 Admin center, enable Skype for Business PSTN Conferencing.

C. In the Office 365 Admin center, enable Skype Meeting Broadcast.

D. In the Office 365 Admin center, enable Skype Cloud PBX.

Correct Answer: D

Phone System in Office 365 (Cloud PBX) is Microsoft's technology for enabling call control and PBX capabilities in the Office 365 cloud with Skype for Business Online. Phone System allows you to replace your existing PBX system with a set

of features delivered from Office 365 and tightly integrated into the company's cloud productivity experience.

Note: To enable calls to landlines and mobile phones, Phone System can be connected to the PSTN in one of two ways:

By purchasing Calling Plan--the PSTN calling plan add-on to Office 365.

By using on-premises PSTN connectivity, where software on-premises connects with your existing telephony infrastructure.

QUESTION 5

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is

exactly the same in each question in this series.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Office 365 subscription.

Users have either an Office 2013 Click-to-Run installation or an Office 2016 Click-to-Run installation deployed.

You plan to enable modern authentication.

You need to identify all of the Office installations that are missing updates before you enable modern authentication.

Solution: From the Office 365 admin center, you view the Security and Compliance reports.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
