### QUESTION 1

You are the Office 365 administrator for your company. Any communication to the Internet using a port other than 80 requires a unique firewall rule to be configured.

You successfully deploy Office 365 ProPlus to all users by using Click-to-Run for Office 365. Users install and activate Office 365 ProPlus.

Thirty days after activation, users report that they are unable to edit files by using any Office applications.

You need to ensure that users can edit files.

For which site should you configure a firewall exception?

- A. <https://activation.sls.microsoft.com>
- B. <https://ols.officeapps.live.com/olsc>
- C. <http://ols.officeapps.live.com/olsc>
- D. <http://officecdn.microsoft.com>

Correct Answer: A

The [activation.sls.microsoft.com](https://activation.sls.microsoft.com) url is needed to renew the product key approximately every 30 days for Office 365 ProPlus users.

---

### QUESTION 2

You create a team site collection for the marketing department.

You must configure usage limits for the site collection and configure storage limits for the marketing team site.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer area
In the SharePoint Online admin center, select the Marketing site collection.	
Click Server Resource Quota in the Manage group of the ribbon bar.	
In Site Settings, open the storage metrics page.	
Configure Site Collection Storage Management to automatic.	
Configure Site Collection Storage Management to manual.	
Open the site settings page for the Marketing site collection.	
Click Storage Quota in the Manage group of the ribbon bar.	

Correct Answer:

Actions	Answer area
In the SharePoint Online admin center, select the Marketing site collection.	Configure Site Collection Storage Management to manual.
	Click Server Resource Quota in the Manage group of the ribbon bar.
In Site Settings, open the storage metrics page.	Click Storage Quota in the Manage group of the ribbon bar.
Configure Site Collection Storage Management to automatic.	
Open the site settings page for the Marketing site collection.	

### QUESTION 3

You administer Microsoft Exchange Online for Fabrikam, Inc. Fabrikam's Exchange Online tenant domain name is fabrikam.onmicrosoft.com.

You verify the domain fabrikam.com in the Office 365 admin center and instruct other administrators to configure new Exchange Online users with fabrikam.com as the primary SMTP domain. The fabrikam.com domain is not federated.

A user reports that his reply-to address is displayed to external email message recipients as User1@fabrikam.onmicrosoft.com.

You need to configure the user's mailbox to meet the following requirements:

The user's reply-to address must be User1@fabrikam.com.

The email address User1@fabrikam.onmicrosoft.com must function as a secondary email address for the user.

Which Windows PowerShell command should you run?

- A. Set-MsolUser -UserPrincipalName User1@fabrikam.onmicrosoft.com -AlternateEmailAddresses user1@fabrikam.com
- B. Set-Mailbox -Identity user1@fabrikam.onmicrosoft.com -ForwardingAddress "User 1"
- C. Set-Mailbox -Identity user1@fabrikam.onmicrosoft.com -WindowsEmailAddress User1@fabrikam.com
- D. Set-Mailbox -Identity user1@fabrikam.onmicrosoft.com -EmailAddresses user1@fabrikam.onmicrosoft.com, user1@fabrikam.com

Correct Answer: C

The PowerShell cmdlet:

```
Set-Mailbox -Identity user1@fabrikam.onmicrosoft.com -WindowsEmailAddress User1@fabrikam.com
```

will change the user's primary email address to User1@fabrikam.com. The user1@fabrikam.onmicrosoft.com email address will continue to function as a secondary email address.

#### QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to modify the existing environment to meet the technical requirement for Outlook on the web.

Solution: You run the Set-Mailbox command.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

The Set-CASMailbox command, not the Set-Mailbox command, must be used to disable Outlook Web App.

This example disables Outlook Web App for the mailbox of Yan Li.

```
Set-CASMailbox -Identity "Yan Li" -OWAEnabled $false
```

From scenario: The executive management at Contoso wants to prevent users from accessing their Exchange Online mailbox by using Outlook on the web.

Note: You can use the EAC or the Shell to enable or disable Outlook Web App for a user mailbox. When Outlook Web App is enabled, a user can use Outlook Web App to send and receive email. When Outlook Web App is disabled, the

mailbox will continue to receive email messages, and a user can access it to send and receive email by using a MAPI client, such as Microsoft Outlook, or with a POP or IMAP email client, assuming that the mailbox is enabled to support access by those clients. #### QUESTION 5

You are the Office 365 ProPlus administrator for your company. Each user is assigned an E3 license. All client computers are on a local area network. Users do not have administrative privileges on their client computers.

You are configuring a network-based installation of the most recent version of Office for all client computers.

You need to ensure that the installation process does not display any dialog boxes or require user input.

Which of following option should you specify in the Configuration.xml file?

- A.
- B.
- C.
- D.

Correct Answer: B

The Display element sets the level of UserInterface that Setup presents to the user. Setting the Display Level attribute to "none" configures Setup to run an unattended installation. Setting the AcceptEULA attribute to "TRUE" configures the Microsoft Software License Terms to be accepted on behalf of the user without displaying it.
