### QUESTION 1

You are the desktop administrator for a company. All desktops have Office 365 ProPlus installed.

You need to ensure that the user can see data in the Telemetry Dashboard.

What should you do?

- A. Add the user to the local Administrators group on the telemetry Dashboard server.
- B. Instruct the user to authenticate to the Microsoft SQL Server by using SQL Server authentication credentials.
- C. Instruct the user to authenticate to the Microsoft SQL Server by using Windows authentication.
- D. Add the user to the Domain Admins group.

Correct Answer: A

### QUESTION 2

You administer Office 365 for a company. You implement Microsoft Exchange Online Protection.

You identify the following requirements for the antimalware policy:

Block attachments with certain file extensions.

Allow a message to be delivered while an unknown attachment is scanned.

Prevent users from clicking an unsafe URL that is contained in a message.

You need to configure Exchange Online Protection.

Which settings or policies should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Block attachments

Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Allow message delivery while attachment is scanned

Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Prevent clicking of unsafe URL

Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Correct Answer:

Block attachments

▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Allow message delivery while attachment is scanned

▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Prevent clicking of unsafe URL

▼
Safe list aggregation
Safe attachments policy
Transport rule
Safe links policy

Box 1: Safe attachments policy

The ATP Safe Attachments feature checks to see if email attachments are malicious, and then takes action to protect your organization.

Box 2: Safe attachments policy

When you set up ATP Safe Attachments policies in Office 365, you can choose from several options, such as Block, Replace, and Dynamic Delivery.

The dynamic delivery option eliminates email delays by sending the body of an email message through with a placeholder for each email attachment. The placeholder remains until the attachment is scanned by ATP Safe Attachments in

Office 365. Email recipients can read and respond to their email messages right away, knowing that their attachments are being analyzed.

Box 3: Safe Link policy

ATP Safe Links in email

At a high level, here's how ATP Safe Links protection works for URLs in email (hosted in Office 365, not on-premises):

People receive email messages that contain URLs.

All email goes through Exchange Online Protection, where IP and envelope filters, signature-based malware protection,

anti-spam and anti-malware filters are applied.

Email arrives in people's inboxes.

A user signs in to Office 365, and goes to their email inbox.

The user opens an email message, and then clicks on a URL in the email message.

The ATP Safe Links feature immediately checks the URL before opening the website. The URL is identified as blocked, malicious, or safe

### QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to recommend a solution to implement the planned change for the email addresses of the New York office managers.

Solution: From the Exchange Online module, run the Set-Mailbox cmdlet and specify the -EmailAddresses parameter.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

The Set-Mailbox cmdlet is used to modify the settings of existing mailboxes. Including the ?mailAddresses parameter allows you to specify all the email addresses (proxy addresses) for the recipient, including the primary SMTP address. ### QUESTION 4

Your company uses Microsoft SharePoint Online for collaboration. A document library is configured as shown in the following table.

Configuration Option	Current Selection
Require content approval for submitted items?	Yes
Create a version each time you edit a file in this document library?	Create major versions
Who should see draft items in this document library?	Only users who can edit items
Require documents to be checked out before they can be edited?	Yes

You need to enable the coauthoring of documents in the library. What should you do?

- A. Change the Who should see draft items in this document library? setting to Any user who can read items.
- B. Change the Create a version each time you edit a file in this document library? setting to No Versioning.
- C. Change the Require documents to be checked out before they can be edited? setting to No.
- D. Change the Require content approval for submitted items? setting to No.

Correct Answer: C

The question states that coauthoring of documents in the library is required. Coauthoring means the ability of multiple people to be able to edit a document simultaneously.

One way to control document collaboration is to require check-out of files, especially when multiple users have access to the library. If you have a file checked out, you can be sure that other people cannot overwrite it. However, you are also

preventing other people from seeing the latest changes or making changes themselves.

Do not configure your library to require checkout if people plan to co-author documents in the library. People cannot work simultaneously on documents when required check-out is turned on.

## QUESTION 5

A company uses Skype for Business Online.

You need to ensure that all employees can search for and add Skype consumer contacts.

What should you do?

- A. Instruct all employees to use the Skype for Business client, and connect to Skype for Business Online by using their Skype ID credentials.
- B. Instruct all employees to use the Skype consumer client, and connect to Skype for Business Online by using their Skype ID credentials.
- C. Instruct all employees to use the Skype consumer client, and connect to Skype for Business Online by using their Office 365 credentials.
- D. Instruct all employees to use the Skype for Business client and connect to Skype for Business Online by using their Office 365 credentials.

Correct Answer: D

The client for Skype for Business Online is Skype for Business client. To be able to search for Skype consumer contacts

the users must connect through the Skype consumer client, and must log in with Office 365 credentials. References:
