### QUESTION 1

You have a Lync Server 2013 infrastructure that is used for conferencing and Enterprise Voice.

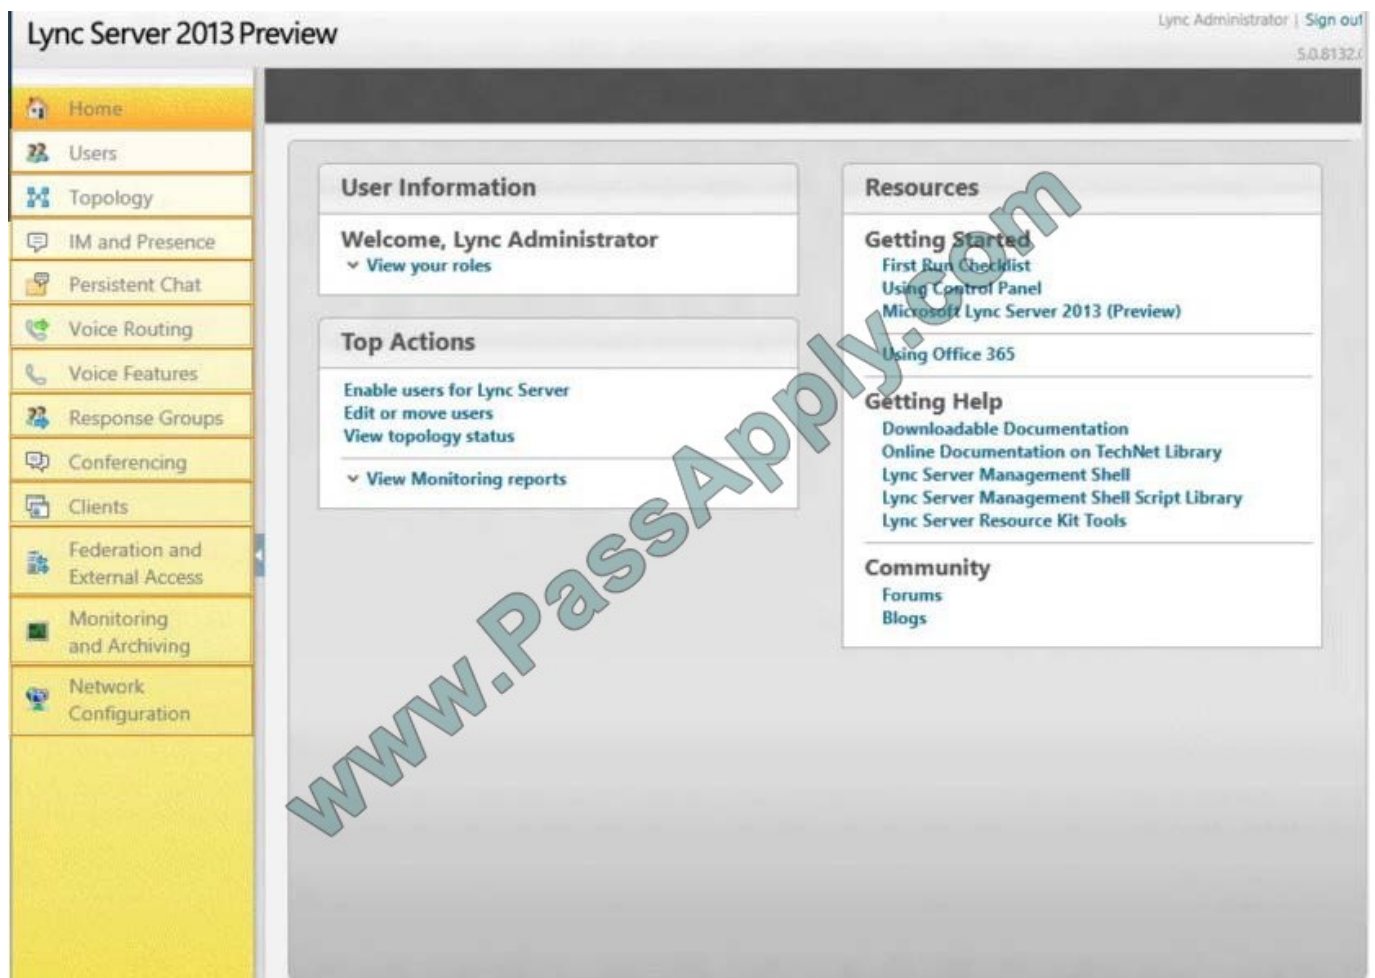

Only users who are enabled for Enterprise Voice can use the callback feature. Other users report that they cannot use the callback feature.

You need to ensure that all of the users who are NOT enabled for Enterprise Voice can use the callback feature.

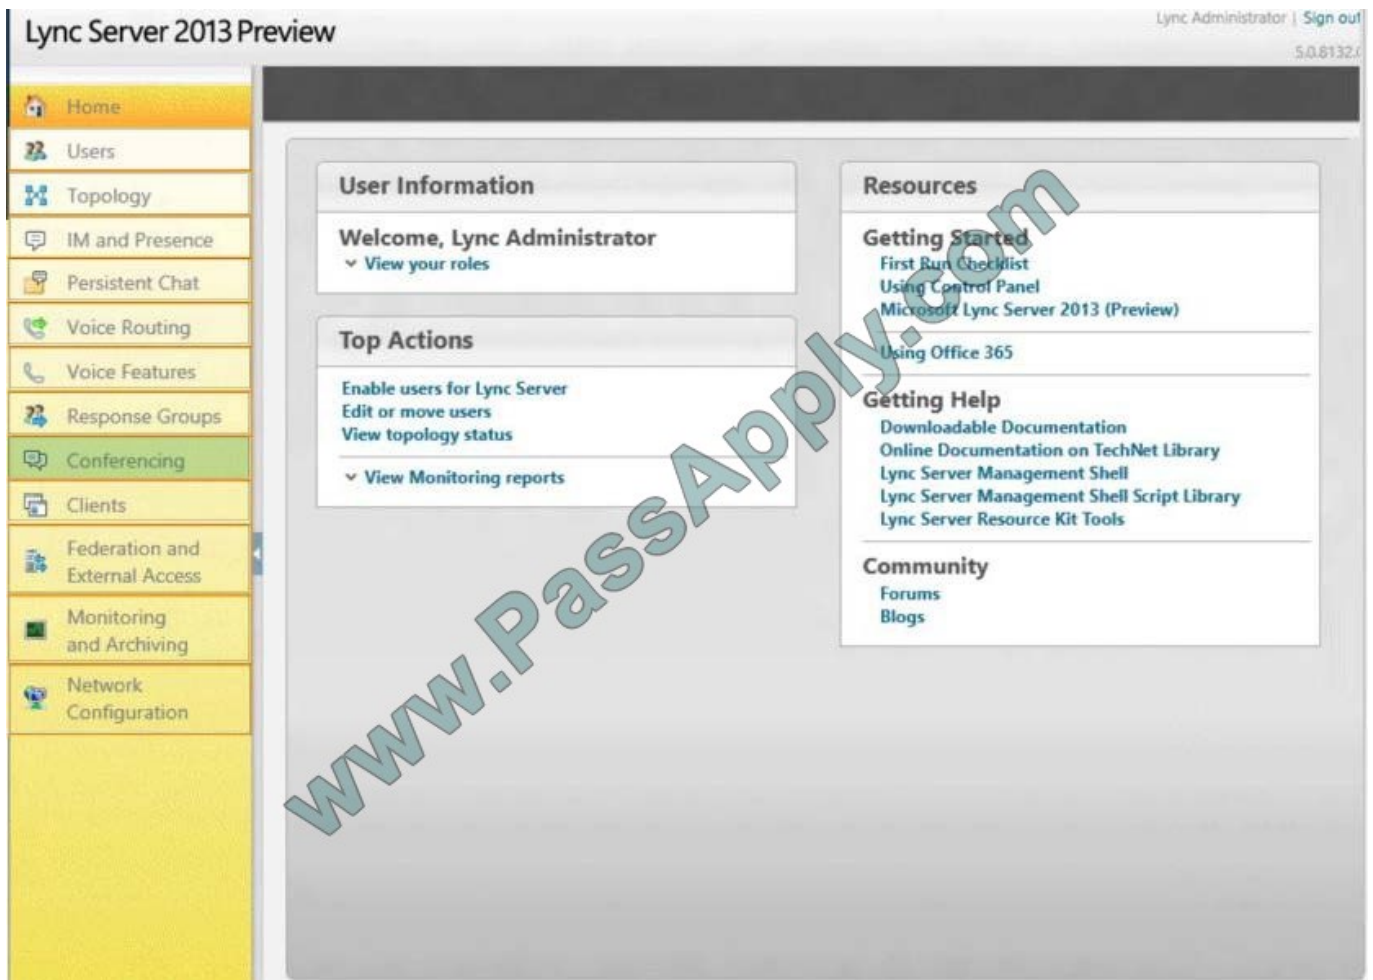

What should you use from the Microsoft Lync Server 2013 Control Panel? To answer, select the appropriate object in the answer area.

### HOTSPOT

Hot Area:

Correct Answer:

## QUESTION 2

You need to design the deployment of the planned Edge Server.

Which four actions should you include in the design? To answer, move the four appropriate actions from the list of actions the correct order.

DRAG DROP Select and Place:

| Actions   | Answer Area              |
|---|--------------------------|
| <p>From the Topology Builder, save a copy of the topology.</p>  | <p>WWW.PASSAPPLY.COM</p> |
| <p>On the new Edge Server, run the Lync Server Deployment Wizard and select the .tbxml file as the source file.</p> |                          |
| <p>Run the <b>Export-CsConfiguration</b> cmdlet.</p>  |                          |
| <p>From the Topology Builder, configure the new Edge pool.</p>  |                          |
| <p>On the new Edge Server run the Lync Server Deployment Wizard and select the .zip file as the source file.</p>    |                          |
| <p>From the Topology Builder, publish the topology.</p>   |                          |

Correct Answer:

| Actions  | Answer Area   |
|--|---|
| From the Topology Builder, save a copy of the topology.  | From the Topology Builder, configure the new Edge pool.   |
| On the new Edge Server, run the Lync Server Deployment Wizard and select the .tbxml file as the source file. | From the Topology Builder, publish the topology.  |
|  | Run the <b>Export-CsConfiguration</b> cmdlet.   |
|  | On the new Edge Server run the Lync Server Deployment Wizard and select the .zip file as the source file. |
|  |   |
|  |   |

### QUESTION 3

You have a Lync Server 2013 infrastructure as shown in the exhibit.

The infrastructure contains an Enterprise Edition Front End pool.

You plan to deploy Persistent Chat.

You need to identify the placement of the components required for Persistent Chat. The solution must minimize the deployment of additional servers whenever possible.

Where should you deploy the Persistent Chat components? (To answer, select the appropriate server to deploy each component in the answer area.)

HOTSPOT

Hot Area:

Persistent Chat Front End Server:

|                                       |
|---------------------------------------|
| Server1                               |
| Server2                               |
| Server4                               |
| Server5                               |
| a new server on the internal network  |
| a new server on the perimeter network |

Persistent Chat Server Store:

|                                       |
|---------------------------------------|
| Server1                               |
| Server2                               |
| Server3                               |
| Server4                               |
| Server5                               |
| a new server on the internal network  |
| a new server on the perimeter network |

Correct Answer:

Persistent Chat Front End Server:

Persistent Chat Server Store:

**QUESTION 4**

You have a Microsoft Office Communications Server 2007 R2 infrastructure that contains two servers. The servers are configured as shown in the following table.

| Server name | Role                    |
|-------------|-------------------------|
| Server1     | Standard Edition server |
| Server2     | Edge Server             |

You plan to deploy Lync Server 2013.

You need to implement a pilot deployment of Lync Server 2013 for internal users.

You install a new server named Server3.

Which four actions should you perform next?

To answer, move the four appropriate actions from the list of actions to the answer area and arrange them in the correct order.

DRAG DROP

Select and Place:

| Actions                                      | Answer Area |
|--|-------------|
| Install Lync Server 2013 on Server2.         |             |
| Install Lync Server 2013 on Server3.         |             |
| Create and publish the topology.             |             |
| Prepare the Active Directory infrastructure. |             |
| Merge and publish the topology.              |             |

Correct Answer:

| Actions                              | Answer Area                                  |
|--------------------------------------|--|
| Install Lync Server 2013 on Server2. | Prepare the Active Directory infrastructure. |
|                                      | Create and publish the topology.             |
|                                      | Install Lync Server 2013 on Server3.         |
|                                      | Merge and publish the topology.              |
|                                      |  |
|                                      |  |

### QUESTION 5

You are implementing the Enterprise Voice solution.

You create the objects described as shown in the following table.

| Object name | Object description  |
|-------------|---|
| PSTN1       | The PSTN usage record for international calls from the Montreal office                |
| PSTN2       | The PSTN usage record for international calls from the New York office                |
| VR1         | The voice route that uses the trunk in the Montreal office and is associated to PSTN1 |
| VR2         | The voice route that uses the trunk in the New York office and is associated to PSTN2 |
| VP1         | The voice policy for the Montreal office users  |
| VP2         | The voice policy for the New York office users  |

You need to recommend which action must be performed to meet the technical requirements for Enterprise Voice routing. What should you add?

- A. PSTN1 to VP2
- B. PSTN1 to VP1
- C. PSTN2 to VP2
- D. PSTN2 to VP1

Correct Answer: B
