QUESTION 1

HOTSPOT

You have a server that runs Windows Server 2012 R2 server named Server1. Server1 has Remote Desktop Services (RDS) installed. You create a session collection named Session1 and publish a RemoteApp in Session1.

Server1 has an application named App1. The executable for App1 is C:\Apps\App1.exe. You need to ensure that App1 is available as a RemoteApp in Session1.

What command should you run? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Get-RDRemoteApp New-RDRemoteApp Set-FDRemoteApp Set-FDSessionCollectonConfiguration	-CollectionName -InformationVariable -UserGroup	"Session1" -DisplayName "App1"
-FilePath -FileVirtualPath -RequiredCommandLine -ShowInWebAccess	"C:\Apps\App1.exe"	

Correct Answer:

Answer Area

Get-RDRemoteApp New-RDRemoteApp Set-FDRemoteApp Set-FDSessionCollectonConfiguration	-CollectionName -InformationVariable -UserGroup	"Session1" -DisplayName "App1"
-FilePath -FileVirtualPath -RequiredCommandLine -ShowInWebAccess	"C:\Apps\App1.exe"	

QUESTION 2

DRAG DROP

You are deploying Windows 10 clients for a small company. The environment does not have access to any network

shares, and USB drives are not allowed.

You need to determine which recovery options you can use.

For each scenario, which recovery option should you use? To answer, drag the appropriate recovery tool to the correct scenario. Each recovery tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Each correct answer is worth one point.

Select and Place:

Recovery options	Answer Area	
	Scenario	Recovery option
System Restore	You install a new driver. The new driver causes system issues. You need to roll back the driver installation.	
Reset this PC	You need to quickly revert back to the original computer state. You must keep personal files. You must remove apps and settings.	
File History	You need to quickly revert back to the original PC state. You must remove personal files, apps, and settings.	
Windows Backup	You install a new application. The application causes system issues. You must revert to the state that the computer was in before you installed the application.	
PC Refresh		

Correct Answer:

Recovery options	Answer Area	Recovery option
	Scenario	
System Restore	You install a new driver. The new driver causes system issues. You need to roll back the driver installation.	System Restore
Reset this PC	You need to quickly revert back to the original computer state. You must keep personal files. You must remove apps and settings.	PC Refresh
File History	You need to quickly revert back to the original PC state. You must remove personal files, apps, and settings.	Reset this PC
Windows Backup	You install a new application. The application causes system issues. You must revert to the state that the computer was in before you installed the application.	System Restore
PC Refresh		

QUESTION 3

You need to create the policy for the Tokyo branch office. What should you use?

- A. Azure Active Directory Device Registration Service
- B. System Center 2012 R2 Configuration Manager SP1
- C. Intune
- D. Azure Active Directory
- E. Azure Active Directory Domain Services

Correct Answer: C

QUESTION 4

DRAG DROP

A company uses Office 365 for email and instant messaging. You deploy Azure Active Directory (AD) Connect and enable password synchronization. The company acquires Enterprise Mobility Suite licenses.

You must allow users to update their passwords online.

You need to configure Azure AD Connect.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Enter your Active Directory Domain Services (AD DS) Enterprise administrator account credentials.	
On the directory sync device, open an elevated Windows PowerShell command prompt.	
Run the following Windows PowerShell cmdlet: Get-ADSyncAADPasswordResetConfiguration	
Enter your Office 365 tenant cloud administrator credentials.	
Select the Password write-back check box.	
On the directory sync computer, open the Azure AD Connect wizard.	

Navigation icons: Right arrow, Left arrow, Up arrow, Down arrow

Correct Answer:

Actions

Enter your Active Directory Domain Services (AD DS) Enterprise administrator account credentials.

On the directory sync device, open an elevated Windows PowerShell command prompt.

Run the following Windows PowerShell cmdlet:

Get-ADSyncAADPasswordResetConfiguration

Answer Area

On the directory sync computer, open the Azure AD Connect wizard.

Enter your Office 365 tenant cloud administrator credentials.

Select the Password write-back check box.

QUESTION 5**DRAG DROP**

You need to resolve the issue that engineering department users report regarding their Windows 10 devices.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

List of Actions

Create a new policy using the Intune Agent Settings template.

Create a new policy using the custom policy for Windows 10 devices and later.

Configure the delay between restart prompts for 720 minutes.

Deploy a policy to the engineering group.

Deploy a policy to the Windows 10 computer device group.

Answer Area

Correct Answer:

List of Actions

Create a new policy using the custom policy for Windows 10 devices and later.

Deploy a policy to the Windows 10 computer device group.

Answer Area

Create a new policy using the Intune Agent Settings template.

Configure the delay between restart prompts for 720 minutes.

Deploy a policy to the engineering group.
