QUESTION 1

Your company has offices in France and England.

The network contains an Active Directory domain named contoso.com. You plan to deploy Microsoft Word 2010 to all users by using Group Policy objects (GPOs).

The users in the office in France must receive a version of Word that contains custom options.

You need to recommend a solution for the planned deployment of Word.

What should you include in the recommendation?

- A. Application control policies
- B. A Windows Installer transform (.mst) file
- C. Software restriction policies
- D. A Windows Installer patch (.msp) file

Correct Answer: B

QUESTION 2

You need to recommend a solution for the HR users that meets the application requirements. What should you recommend?

- A. Client Hyper-V
- B. An App-V 5.0 client on an RD Session Host server
- C. An App-V 5.0 client
- D. A RemoteApp program on an RD Session Host server

Correct Answer: A

App-V does not support 16bit applications.

RemoteApp is running from a 64bit OS; 16bit apps are not supported on a 64bit OS.

QUESTION 3

You need to recommend a solution to update App4 on the client computers that already have the application deployed. The solution must meet the application requirements. What should you include in the recommendation?

- A. Add a package to the software installation settings of a Group Policy object (GPO).

- B. Use Import Updates from the Update Services console.
- C. Run wsusutil.exe and specify the import parameter.
- D. Run a script that uses the WSUS Application Programming Interface (API) for local publishing.

Correct Answer: D

QUESTION 4

Your network contains a Virtual Desktop Infrastructure (VDI). All users access applications by using their virtual desktop. All virtual desktops run Windows 8. You have a test environment that contains four computers. The computers are configured as shown in the following table.

Computer name	Configuration
Server1	Microsoft Application Virtualization (App-V) management server
Client1	Physical computer that runs Windows 8
Server2	Microsoft Application Virtualization (App-V) publishing server
Client2	Virtual machine that runs Windows 8

You plan to sequence 15 applications that will be deployed to the virtual desktops. You need to identify which computers must be used to run the App-V Sequencer. Which computer should you identify? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Server1
- B. Client1
- C. Server2
- D. Client2

Correct Answer: D

QUESTION 5

You deploy a Remote Desktop Services (RDS) collection.

You plan to provide users with access to Microsoft Application Virtualization (App-V) applications by using Remote Desktop connections.

You publish several applications to an App-V publishing server.

You need to recommend a solution to minimize the amount of storage space required on the RDS servers for the App-V applications. The solution must minimize the amount of time it takes for users to open the App-V applications.

What four actions should you perform? To answer, move the four appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Install the App-V for Remote Desktop Services Client on all of the Remote Desktop Session Host (RD Session Host) servers and modify the registry settings of the servers.	
Log on to a staging computer and stream all of the required applications.	
Configure the Remote Desktop Session Host (RD Session Host) servers to use the publishing server and to use publishing dates.	
Copy the cache file to a central location.	
Restart the staging computer in safe mode.	

Correct Answer:

Actions	Answer Area
	Install the App-V for Remote Desktop Services Client on all of the Remote Desktop Session Host (RD Session Host) servers and modify the registry settings of the servers.
	Log on to a staging computer and stream all of the required applications.
Configure the Remote Desktop Session Host (RD Session Host) servers to use the publishing server and to use publishing dates.	Restart the staging computer in safe mode.
	Copy the cache file to a central location.
