QUESTION 1

You are mastering the company database, with a SQL Server 2008 computer called SQLTEST1. There are three examples of SQL Server in the SQLTEST1. The ability to connect to the dedicated administrative connection on every example of SQL Server should be included in the disaster recovery plan of the company. You find that you could connect to the connection on SQLTEST1 default example while testing this ability; you could not connect to the dedicated connection on the two other examples on SQLTEST1. You should clarify that the examples are implementing and that client applications should be able to approach them. You should make sure that no other administrators are attempting to connect to any dedicated connections on SQLTEST1. You should also make sure that you could connect to the dedicated connection on all three examples. Which is the correct answer?

- A. You should begin the SQL Server Browser service. Set the service to run automatically.
- B. You should utilize the IIS tool to make the dedicated administrative connection.
- C. You should stop and restart the default examples of SQL Server.
- D. You should reset the default example to utilize a default port amount other than 1434.

Correct Answer: A

QUESTION 2

You administer a Microsoft SQL Server 2008 R2 database instance.

Occasionally, the following problems occur:

You need to be able to diagnose each of these problems.

Which tool or tools should you use? (To answer, drag the appropriate problem to the correct tool in the answer area. Each problem may be used once, more than once, or not at all. Each tool may be used once or not at all. Additionally, you

may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Problem	Tools
The SQL Server service fails to start.	Windows Application Log
A query from the application is running slower than expected.	Dynamic Management Views
	SQL Server Profiler
	Activity Monitor
	SQL Server ERRORLOG

Correct Answer:

Problem	Tools
The SQL Server service fails to start.	Windows Application Log
A query from the application is running slower than expected.	Dynamic Management Views
	SQL Server Profiler
	Activity Monitor
	SQL Server ERRORLOG

QUESTION 3

You work in a company which is named Wiikigo Corp. The company uses SQL Server 2008. You are the administrator of the company database. Now you are in charge of a SQL Server 2008 instance. According to the company requirement, the names of all user- defined stored procedures must contain the prefix usp_on all instances. Besides this, you must make sure that stored procedures that do not contain this prefix cannot be created by you. What should you do?

- A. A policy should be created. The policy targets the name of the stored procedure that is evaluated on demand.
- B. A policy should be created. The policy targets the name of the stored procedure that is evaluated on change.
- C. A condition should be created. The condition targets the name of the stored procedure that is evaluated on change
- D. A condition should be created. The condition targets the name of stored procedure that is evaluated on demand.

Correct Answer: B

QUESTION 4

You maintain multiple SQL Server 2008 instances.

You are designing a consolidated repository of performance data.

You need to ensure that the following requirements are met:

What should you do?

- A. Create and schedule a single Microsoft SQL Service Integration Services (SSIS) package process to store and delete performance data in a single database for all instances.
- B. Create a SQL Agent job process on each instance to store and delete performance data in a single database for all instances.
- C. Configure a management data warehouse process on each instance to store and delete performance data in a single database for all instances.
- D. Configure an automated server-side trace process on each instance to store and delete performance data in a single database for all instances.

Correct Answer: C

QUESTION 5

You manage a SQL Server 2008 instance.

You need to verify whether a database integrity check (DBCC CHECKDB) was run for a particular database.

Which log file should you examine?

- A. log.trc

- B. default.trc
- C. ERRORLOG
- D. SQLAGENT

Correct Answer: C
