QUESTION 1

You are a database administrator for Company.com. A user named Company belongs to the Windows Sales Managers group. Company needs a Reporting Services report to display annual sales information by territory. A user named Joe reports to Company and belongs to the Windows Sales group. He needs a report that is limited to his sales territory, but still displays the same detailed sales data that is on Company\\'s report. You need to design a secure solution that meets the reporting needs of the users and that consumes the minimal amount of Server resources.

What should you do?

A. Design a report for Company that includes two data regions. One data region is used for summary sales data. The other data region is used for the detailed sales data for each sales representative. Then, design a report for Joe that displays the detailed sales data.

B. Design two reports for Company. One report includes the territory information, and one report includes the detailed sales data. Then, design a report for Joe that displays the detailed sales data for his territories.

C. Design a report for Company that includes the territory information. Then, design a report for Joe that includes detailed sales data for his territories. Finally, configure Company s report so that it includes the data in Joes report.

D. Design a parameterized report for Company that includes all territory information. Then, design a linked report for Joe that links to Company s report.

Correct Answer: D

QUESTION 2

You need to design a stored procedure to import the registry information from AppServer1. You want to accomplish this goal without allowing the execution of unmanaged code. What should you do?

A. Use a regular stored procedure that calls xp_cmdshell.

B. Use an extended stored procedure.

C. Use a CLR stored procedure with the SAFE permission set.

D. Use a CLR stored procedure with the EXTERNAL_ACCESS permission set.

E. Use a CLR stored procedure with the UNSAFE permission set.

Correct Answer: D

QUESTION 3

You are a database administrator for Company.com. The SQL 2005 Server computer has been in operation for more than one month. This past week, query performance problems have led you to investigate locking contention. The

sys.dm_os_wait_stats dynamic management view (DMV) is showing a high value in the max_wait_time_ms column. You need to find out if this value is a factor in the current performance problems.
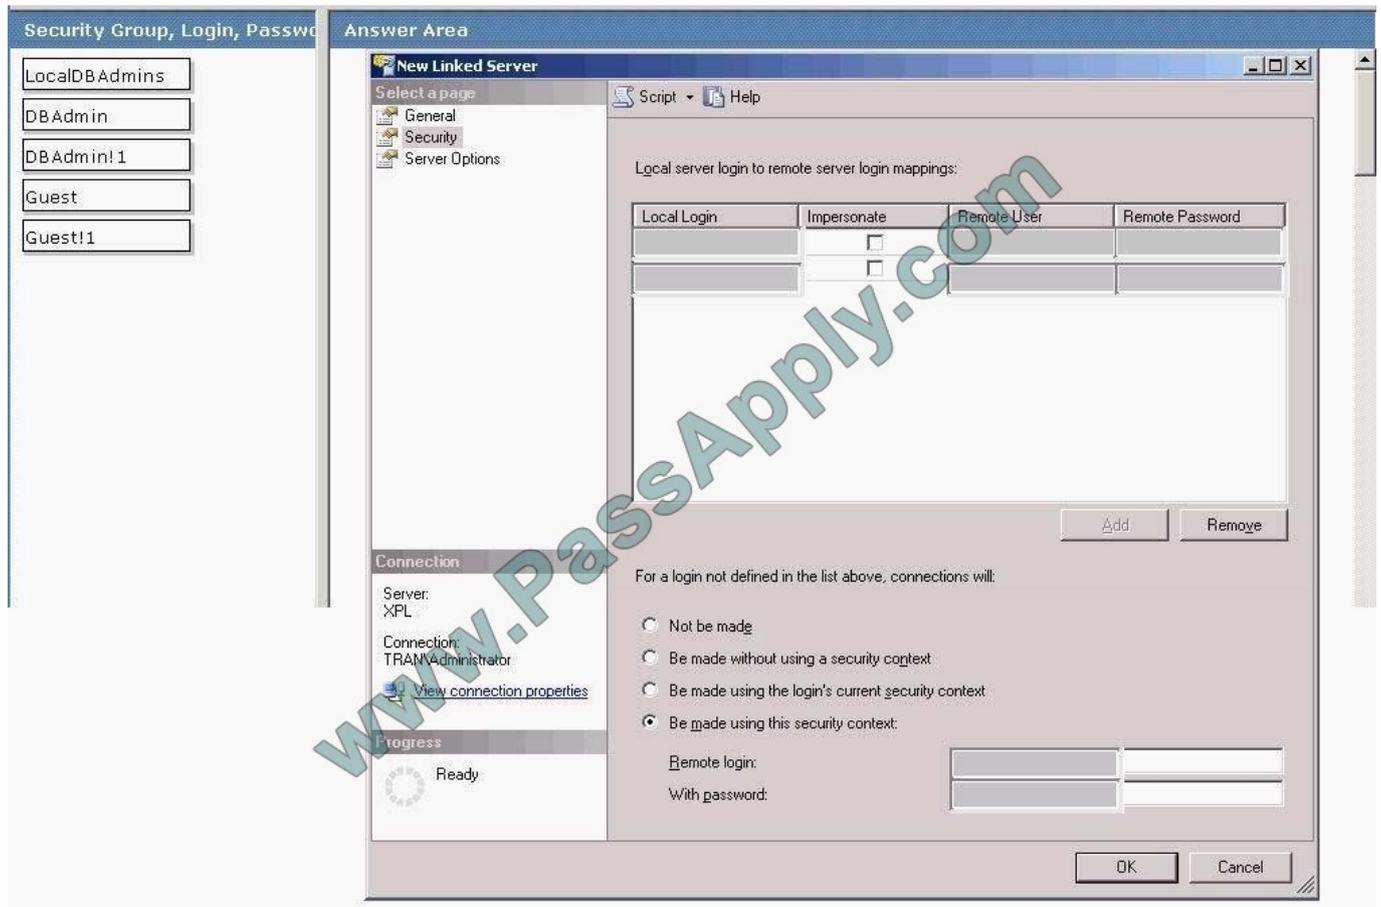

You also must minimize the impact on database users.

What should you do?

A. Reset the statistics in the dynamic management view (DMV).

B. Restart the SQL Server computer.

C. Execute the UPDATE STATISTICS command.

D. Restart the SQL Server Service.

Correct Answer: A

QUESTION 4

Drag Drop question

Correct Answer:

QUESTION 5

You need to review the list of expected services for SQLCLUST and disable any nonessential services.

Which two services should be disabled? (Each correct answer presents part of the solution. Choose two.)

A. Cluster service

B. World Wide Web Publishing service

C. SQL Server Agent service

D. Messenger service

E. Server service

Correct Answer: BD
