QUESTION 1

You need to configure a security solution for an application. The solution must meet the following requirements: What should you create?

- A. a database user that has no login
- B. a new login that has a blank password
- C. an application role
- D. a proxy object

Correct Answer: A

QUESTION 2

You are developing a security policy for the SQL Server developers in your organization.

You need to create a security strategy to protect Transact-SQL applications from SQL injection attacks.

What should you include in the strategy?

- A. Require certificates for Service Broker communications.
- B. Parse input parameters to prevent the use of the following strings: `;-/**/`
- C. Parse input parameters to prevent the use of the following strings: `and@//++`
- D. Disable Service Broker.

Correct Answer: B

QUESTION 3

You are designing a data storage solution for a transactional application. You need to ensure that each row in a table records the date and the time that the row was written. The time must be as precise as possible. Which data type should you use?

- A. datetime
- B. datetime2
- C. smalldatetime
- D. timestamp

Correct Answer: B

QUESTION 4

You are designing a table that will store transactions for an online retailer. You anticipate that the online retailer will have an average of 500,000 transactions per day. You need to design a solution for data aging and archiving. The solution must minimize the amount of time it takes to return query results for active data.

What should you implement?

- A. a linked server
- B. a table schema
- C. Service Broker
- D. table partitioning

Correct Answer: D

QUESTION 5

You are a database developer. You plan to design a database solution by using SQL Server 2008.

A frequently used query takes very long to execute.

You discover that the query frequently uses full-table scans instead of indexes. This causes other queries that modify the table to be blocked.

The indexing strategy on the underlying tables that the query uses can change.

You need to design a solution that performs the following tasks:

What should you do?

- A. Use the INDEX table hint.
- B. Use the INDEX(0) table hint.
- C. Use the NOEXPAND table hint.
- D. Use the FORCESEEK table hint.

Correct Answer: D
