QUESTION 1

You work as a database developer at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment.

You have been instructed to install the SQL Server Data Quality Services (DQS). The SQL Server Data Quality Services (DQS) is made up of the Data Quality Server and Data Quality Client components.

Which of the following describes the minimum requirements for installing the Data Quality Client?

A. 2 GB RAM.

B. .NET Framework 4.0.

C. SQL Server 2012 Database Engine.

D. Internet Explorer 6.0 SP1 or later.

Correct Answer: BD

QUESTION 2

You administer a Microsoft SQL Server database. Service accounts for SQL Agent are configured to use a local user. A Microsoft SQL Server Integration Services (SSIS) job step has been created within a SQL Server Agent job. The SSIS

package accesses a network share when exporting data from a SQL Server database.

When you execute the SQL Server Agent job, it fails due to a permissions failure on a share on a remote server. You need to ensure that the SQL Server Agent job can execute the SSIS package.

Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Ordered List Title

Answer Choices Title

Add a proxy that references the local user.

Add a proxy that references the credential.

Create a local user account and grant local administrator on the SQL Server instance.

Create a credential that references the local user.

Create a credential that references the domain user.

Assign the proxy to the Operating System subsystem.

Assign the proxy to the SSIS package execution subsystem.

Create a domain user account and grant permissions to the domain user account to access the network share.

<< Move

Remove >>

Correct Answer:

Ordered List Title

Create a domain user account and grant permissions to the domain user account to access the network share.

Create a credential that references the domain user.

Add a proxy that references the credential.

Assign the proxy to the SSIS package execution subsystem.

Answer Choices Title

Add a proxy that references the local user.

Create a local user account and grant local administrator on the SQL Server instance.

Create a credential that references the local user.

Assign the proxy to the Operating System subsystem.

<< Move

Remove >>

QUESTION 3

You administer a Microsoft SQL Server 2012 database. The database contains a table named Employee. Part of the Employee table is shown in the exhibit. (Click the Exhibit button.)

Employee (jek)

Column Name	Condensed Type
EmployeeID	int
EmployeeNum	char(10)
LastName	nvarchar(200)
FirstName	nvarchar(200)
MiddleName	nvarchar(200)
DateHired	date
DepartmentID	int
JobTitle	varchar(200)
ReportsToID	int

Column name	Description
EmployeeID	Uniquely identifies the employee record in the table Used throughout the database by all the other tables that reference the Employee table
EmployeeNum	An alphanumeric value calculated according to company requirements Has to be unique within the Employee table Exists only within the Employee table
DepartmentID	References another table named Department that contains data for each department in the company
ReportsToID	Contains the EmployeeID of the manager to whom an employee reports

Confidential information about the employees is stored in a separate table named EmployeeData. One record exists within EmployeeData for each record in the Employee table. You need to assign the appropriate constraints and table properties to ensure data integrity and visibility. On which column in the Employee table should you use an identity specification to include a seed of 1,000 and an increment of 1?

A. DateHired

B. DepartmentID

C. EmployeeID

D. EmployeeNum

E. FirstName

F. JobTitle

G. LastName

H. MiddleName I. ReportsToID

Correct Answer: C

QUESTION 4

You are the data steward for a Business Intelligence project.

You must identify duplicate rows stored in a SQL Server table and output discoveries to a CSV file. A Data Quality
Services (DQS) knowledge base has been created to support this project.

You need to produce the CSV file with the least amount of development effort.

What should you do?

A. Create an Integration Services package and use a Data Profiling transform.

B. Create a custom .NET application based on the Knowledgebase class.

C. Create a data quality project.

D. Create a CLR stored procedure based on the Knowledgebase class.

E. Create a Master Data Services (MDS) business rule.

Correct Answer: C

QUESTION 5

You administer a Microsoft SQL Server 2012 database. The database contains a table that has the following definition:

```
CREATE TABLE [Sales].[Customer](
  [CustomerID] int NOT NULL,
  [CustomerName] nvarchar(50) NOT NULL,
  [TerritoryID] int NULL,
  [LastContactDate] datetimeoffset NULL,
  [CustomerType] nchar(1) NOT NULL,
  [Notes] varchar(250) NULL
)
```

You want to export data from the table to a flat file by using the SQL Server Import and Export Wizard.

You need to ensure that the following requirements are met:

The first row of the file contains the first row of data.

Each record is of the same length.

The date follows the U.S. date format.

The file supports international characters.

What should you do? (To answer, simply select the option or options in the answer area that you would configure.)
