QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

Your network contains an Active Directory forest. You install Windows Server 2016 on 10 virtual machines.

You need to deploy the Web Server (IIS) server role identically to the virtual machines.

Solution: From Windows System Image Manager, you create an answer file, you copy the file to C:\Sysprep on each virtual machine, and then you run the Apply-Image cmdlet.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 2

You recently implemented a Microsoft Azure SQL data warehouse.

You discover that during peak hours, the data warehouse takes longer than expected to generate reports.

You need to reduce the amount of time it takes to generate the reports.

What should you do from the Azure portal?

- A. Increase the number of Database Throughput Units (DTUs).
- B. Move the data warehouse to a different resource group.
- C. Add storage to the data warehouse.
- D. Increase the number of Data Warehouse Units (DWUs).

Correct Answer: D

With SQL Data Warehouse CPU, memory, and IO are bundled into units of compute scale called Data Warehouse Units (DWUs). A DWU represents an abstract, normalized measure of compute resources and performance. By changing your service level you alter the number of DWUs that are allocated to the system, which in turn adjusts the performance, and the cost, of your system.

Incorrect Answers:

A: Database Throughput Unit (DTU): DTUs provide a way to describe the relative capacity of a performance level of Basic, Standard, and Premium databases. DTUs are based on a blended measure of CPU, memory, reads, and writes. As DTUs increase, the power offered by the performance level increases.

QUESTION 3

You have a Windows Server 2016 failover cluster named Cluster1 that contains four nodes named Server1, Server2, Server3, and Server4.

You need to configure Cluster1 to use directly attached storage to host several virtual machines.

You run the Enable-ClusterStorageSpacesDirect cmdlet on Server1.

What should you do next?

- A. Run the Enable-ClusterStorageSpacesDirect cmdlet on the other three nodes.
- B. Create volumes.
- C. Create a storage pool.
- D. Run the Add-ClusterResource cmdlet on all of the nodes.

Correct Answer: B

QUESTION 4

DRAG DROP

On a new server, you install Windows Server 2016, and then you install the Hyper-V server role.

You need to ensure that you can deploy Windows containers that use an image of the Server Core installation of Windows Server.

Which four commands should you use in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Select and Place:

Commands

```
Install-Package -Name docker -ProviderName  
DockerMsftProvider
```

```
Restart-Computer -Force
```

```
docker pull docker/windows-x64
```

```
Set-VMProcessor -ExposeVirtualizationExtensions  
$true
```

```
Install-Module -name DockerMsftProvider  
Repository PSGallery -Force-
```

```
docker pull Microsoft/windowsservercore
```

```
Install-Package -Name Microsoft/dotnet  
framework-docker -ProviderName-  
DockerMsftProvider
```

```
Install-WindowsFeature Hyper-V
```

Answer Area

1

2

3

4

Correct Answer:

Commands

```
docker pull docker/windows-x64

Set-VMProcessor -ExposeVirtualizationExtensions $true

Install-Package -Name Microsoft/dotnet framework-docker -ProviderName DockerMsftProvider

Install-WindowsFeature Hyper-V
```

Answer Area

- 1 Install-Module -name DockerMsftProvider Repository PSgallery -Force-
- 2 Install-Package -Name docker -ProviderName DockerMsftProvider
- 3 Restart-Computer -Force
- 4 docker pull Microsoft/windowsservercore

QUESTION 5

A marketing department manager reports that the marketing department database contains incorrect data. The manager reports that the data was correct yesterday.

You need to recommend a method to recover the data.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

-
-
-
-
-
-
-

Correct Answer:

Actions

Answer Area

-
-
