QUESTION 1

DRAG DROP

You are developing a web page that includes the following HTML.

```
<input name="ITSupport" type="checkbox" value="IT" id="choc"
 onclick="enable();" /><label for="IT">IT Support</label>
<input type="email" placeholder="IT@Contoso.com" id="eMail"
 name="eMail" disabled /><label for="eMail" >Your eMail </label>
```

You need to ensure that the email element is enabled only if the user selects the IT Support check box.

Which CSS selectors should you use? (To answer, drag the appropriate selector to the correct location. Each selector may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Correct Answer:

The disabled property sets or returns whether an email field should be disabled, or not.

A disabled element is unusable and un-clickable. Disabled elements are usually rendered in gray by default in browsers.

Example

Disable an email field:

document.getElementById("myEmail").disabled = true;

QUESTION 2

You are developing a web form that includes the following HTML.

You need to ensure that a value is entered into txtValue before the form is submitted.

Which code segment should you use?

A.
```
function validate() {
  var name = $("#txtValue").val();
    if (name == null || name == "")
      alert("please enter valid value");
      return;
}
```

B.
```
function validate() {
  var value = $("#txtValue").val();
  var regex = /^[\d\,\.]*$/;
  if (!regex.test(value))
    alert("please enter valid value");
  return;
}
```

C.
```
function validate() {
  var name = $("#txtValue").get();
    if (name == null || name == "")
      alert("please enter valid value");
      return;
}
```

D.
```
function validate() {
  var value = $("#txtValue").get();
  var regex = /^[A-Za-z]{3}/;
  if (!regex.test(value) || value == "")
    alert("please enter valid value");
  return;
}
```

QUESTION 3

Your company uses a third-party component that generates HTML for a website. The third-party component creates DIV elements that display a yellow background.

The third-party component uses inline styles in the DIV elements that are inconsistent with your corporate standards. You must override the DIV elements in the style sheet with the corporate styles.

You need to ensure that the website meets corporate standards.

Which style should you use?

A.
```
#alldiv
{
  background: yellow;
  font: 12px/22px Arial;
}
```

B.
```
div p:only-child
{
  background: yellow;
  font: 12px/22px Arial;
}
```

C.
```
div
{
  background: yellow !important;
  font: 12px/22px Arial !important;
}
```

D.
```
div
{
  background: yellow;
  font: 12px/22px Arial;
}
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: C

CSS attempts to create a balance of power between author and user style sheets. By default, rules in an author\\'s style sheet override those in a user\\'s style sheet.

However, for balance, an "!important" declaration (the delimiter token "!" and keyword "important" follow the declaration) takes precedence over a normal declaration. Both author and user style sheets may contain "!important" declarations,

and user "!important" rules override author "!important" rules. This CSS feature improves accessibility of documents by giving users with special requirements (large fonts, color combinations, etc.) control over presentation.

QUESTION 4

On which panel can you see a hierarchically structured view of the DOM?

A. Live DOM

B. Projects

C. Assets

D. Device

Correct Answer: A

QUESTION 5

You have a stylesheet for an existing website. The website contains the following HTML markup.

```
<div id= "header">
  <ul class= "menuItems">
    <li>HOME</li>
    <li>PRODUCTS</li>
    <li>ABOUT US</li>
  </ul>
</div>
```

You need to ensure that the elements are aligned horizontally. You write the following CSS markup in the stylesheet.

```
.menuItems li
{
Target 1:  Target 2;
}
```

How should you complete the markup? To answer, drag the appropriate code elements to the correct targets in the answer area. Each code element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
