QUESTION 1

You need to implement the term set import file to enable item assignments to be filtered.

How should you structure the term sets? (To answer, drag the appropriate term to the correct level in the answer area. Each term may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Answer Area			
Level 1 Term	Level 2 Term	Level 3 Term	
	Engineering	System Architect	
	Engineering	Programmer	
Department	Production		
Department		Manager	

Department

Engineering

Manager

Producer

Production

System Architect

Correct Answer:

Answer Area			
	Level 1 Term	Level 2 Term	Level 3 Term
Department	Department	Engineering	System Architect
Engineering	Department	Engineering	Programmer
Manager	Department	Production	Producer
Producer	Department	Production	Manager
Production			
System Architect			

QUESTION 2

You develop a SharePoint app that connects to external content by using Business Connectivity Services (BCS).

You need to ensure that the app returns no more than 500 items at one time.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
In the Business Data Connectivity (BDC) model, specify filters that are used by the subscription file.	
Define a Limit filter.	
Create a new view with an item limit filter.	
Create a new subscription for the external content.	
Define a Throttle filter.	

Correct Answer:

Actions	Answer Area
<input type="text"/>	Define a Limit filter.
<input type="text"/>	Create a new subscription for the external content.
Create a new view with an item limit filter.	In the Business Data Connectivity (BDC) model, specify filters that are used by the subscription file.
<input type="text"/>	
Define a Throttle filter.	

Note:

* Limit filter: Limits the total number of records returned to a fixed amount.

QUESTION 3

You implement eDiscovery in SharePoint to access Exchange Online mailbox data.

You find malware and spam in items within the eDiscovery hold. You think that your company's anti-malware software is not working because of incorrect permissions.

You need to ensure that software is configured correctly.

On The Exchange admin center page, which option should you select? (To answer, select the appropriate option in the answer area.)

Hot Area:

Answer Area

Exchange admin center

- recipients
- permissions
- compliance management
- organization
- protection
- mail flow
- mobile
- public folders

Correct Answer:

Answer Area

Exchange admin center

- recipients
- permissions
- compliance management
- organization
- protection
- mail flow
- mobile
- public folders

QUESTION 4

You develop a Web Part that includes the following code segment (Line numbers are included for reference only.)

```
01 using Microsoft.SharePoint.Client;
02 using Microsoft.SharePoint.Client.UserProfiles;
03 using System;
04 namespace GetProfileProperties
05 {
06     class Program
07     {
08         static void Main(string[] args)
09         {
10             const string serverUrl = "http://contoso.com/";
11             ClientContext clientContext = new ClientContext(serverUrl);
12             PeopleManager peopleManager = new PeopleManager(clientContext);
13
14             clientContext.Load(personProperties,
15                 p => p.AccountName, p => p.UserProfileProperties);
16             clientContext.ExecuteQuery();
17             foreach (var property in personProperties.UserProfileProperties)
18             {
19                 Console.WriteLine(string.Format("{0}: {1}",
20                     property.Key.ToString(), property.Value.ToString()));
21             }
22             Console.ReadLine();
23         }
24     }
25 }
```

You log on to a SharePoint site with the user name Contoso\THartono. You need to display account details for the currently logged in user. Which code segment should you insert at line 13?

- A. `PersonProperties personProperties = peopleManager.GetUserData("CONTOSO\\THartono");`
- B. `PersonProperties personProperties = peopleManager.GetMyProperties();`
- C. `PersonProperties personProperties = peopleManager.GetUserProfilePropertyFor("CONTOSO\\THartono");`
- D. `PersonProperties personProperties = peopleManager.GetProperties("CONTOSO\\THartono");`

A. B. C. D.

Correct Answer: B

// Get user properties for the target user.

// To get the PersonProperties object for the current user, use the // getMyProperties method.

personProperties = peopleManager.getMyProperties(targetUser);

QUESTION 5

Contoso, Ltd. is integrating an Enterprise Resource Planning (ERP) system with SharePoint by using Business Connectivity Services (BCS). The ERP system is a Windows Communication Foundation (WCF) service that is hosted in Internet

Information Services (IIS). The WCF service is named people.svc and is located at <http://contoso.com:8080>. The metadata for the service is found at <http://contoso.com:8080/mex>.

You need to create a data connection for the EPM system.

In the WCF Connection dialog box, how should you configure the connection to the WCF service? (To answer, select the appropriate option from each drop-down list in the answer area.)

Hot Area:

WCF Connection

Connection Properties

Service Metadata URL:

Metadata Connection Mode:

Service Endpoint URL:

Name (optional):

Use Proxy Server
Proxy Server:

Define custom proxy namespace for programmatic access.
Proxy Namespace:

WCF Service Authentication Settings

Connect with User's Identity
 Connect with Impersonated Windows Identity
 Connect with Impersonated Custom Identity

Secure Store Application ID:

Correct Answer:

WCF Connection

Connection Properties

Service Metadata URL:

Metadata Connection Mode:

Service Endpoint URL:

Name (optional):

Use Proxy Server
Proxy Server:

Define custom proxy namespace for programmatic access.
Proxy Namespace:

WCF Service Authentication Settings
