QUESTION 1

You are developing a Windows Presentation Foundation (WPF) application by using Microsoft .NET Framework 4.

You need to recommend a testing strategy to identify the additional hardware resources that are necessary to support future projected growth.

Which testing strategy should you recommend?

- A. Load testing
- B. Stress testing
- C. Capacity testing
- D. Integration testing

Correct Answer: C

QUESTION 2

You are creating a Windows Presentation Foundation (WPF) application by using Microsoft .NET Framework 4 and Microsoft SQL Server 2008.

You create a window that allows users to search for products that match a given name. Search results are displayed when the user types each letter of the product name.

You use a method named FindProducts to obtain the list of products.

Users report that when they type a letter of the product name, the window stops responding for a varying amount of time. While the window stops responding, users cannot type more letters. The window stops responding even when the search generates few results.

You need to ensure that the window responds while users type a name.

What should you do?

- A. Cache the results returned by the FindProducts method for each set of criteria.
- B. Use a VirtualizingStackPanel class to display the list of client applications that match the given name.
- C. Create a delegate for the FindProducts method. Pass the delegate to the Invoke method of the Dispatcher property of the window.
- D. Before you call the FindProducts method, call the Freeze method on the Brush object that is used as the Background property of the window.

Correct Answer: C

QUESTION 3

You are designing a Windows application.

The application must meet the following requirements:

Provide three-dimensional views of data.

Display images, text, graphs, and videos.

Support porting to a browser-based application.

You need to recommend a technology that meets the requirements.

Which technology should you recommend?

- A. Windows Presentation Foundation (WPF)
- B. Direct3D
- C. GDI+
- D. Windows Forms

Correct Answer: A

QUESTION 4

You are designing a Windows Presentation Foundation (WPF) application that will process data. The data is stored in a Microsoft SQL Server 2008 database.

You plan to access the data by using ADO.NET Entity Framework 4.

You need to recommend an approach that minimizes the number of calls to the database server.

What should you recommend?

- A. Use eager loading.
- B. Use SqlDependency objects.
- C. Use lazy loading.
- D. Use change tracking in theObjectContext object.

Correct Answer: A

QUESTION 5

You are designing a Windows Forms application. The application connects to a Microsoft SQL Server 2008 database.

You need to recommend an approach for retrieving and logging all informational messages and error messages reported by the database.

What should you recommend?

- A. Retrieve informational messages in a SQLException object. Retrieve error messages by creating a handler for the InfoMessage event.
- B. Retrieve informational messages and error messages in a SQLException object.
- C. Retrieve informational messages by creating a handler for the InfoMessage event. Retrieve error messages in a SQLException object.
- D. Retrieve informational messages and error messages by creating a handler for the InfoMessage event.

Correct Answer: C
