QUESTION 1

HOTSPOT

The following code registers a ControlState property to maintain critical state information:

```
protected override void OnInit(EventArgs e)
{
  base.OnInit(e);
  Page.RegisterRequiresControlState(this);
}

protected override object SaveControlState()
{
  object obj = base.SaveControlState();
  if (m_strData != "")
  {
    if (obj != null)
    {
      return new Pair(obj, m_strData);
    }
    else
    {
      return (m_strData);
    }
  }
  else
  {
    return obj;
  }
}
```

www.PassApply.com

For each of the following statements, select Yes if the statement is true. Otherwise select No.

Hot Area:

Yes	No	
○	○	If you disable the **ViewState** property, the state information is not saved.
○	○	If the base class has data that must be saved in the **ControlState** property, the data in the derived class is ignored.
○	○	The **SaveControlState** and **LoadControlState** methods must be overridden in code to enable ControlState functionality.

Correct Answer:

Yes	No	
○	○	If you disable the **ViewState** property, the state information is not saved.
○	○	If the base class has data that must be saved in the **ControlState** property, the data in the derived class is ignored.
○	○	The **SaveControlState** and **LoadControlState** methods must be overridden in code to enable ControlState functionality.

QUESTION 2

You are designing an ASP.NET MVC 2 Web application. The view content will be composed of user controls. You have the following requirements:

Deliver content that is provided by user controls to the browser.

Select the appropriate user controls to render within the controller.

You need to ensure that your design meets the requirements.

Which approach should you recommend?

A.

Use the Html. Render Partial extension method.

B.

Use the Html. Render Action extension method.

C.

Use the Partial View Result class.

D.

Use the Content Result class.

Correct Answer: B

QUESTION 3

You need to design a solution to ensure that data caching and session state will be maintained. Which approach should you recommend?

A. Use distributed caching and out-of-process session state.

B. Use distributed caching and in-process session state.

C. Use output caching and out-of-process session state.

D. Use output caching and in-process session state.

Correct Answer: A

QUESTION 4

You are designing a data access strategy for an ASP.NET Web application.

You plan to expose an existing data source by using WCF Data Services.

You need to recommend an approach to ensure that CRUD operations are possible.

What should you recommend?

A. Implement the IQueryable and IUpdatable interfaces on data source entities.

B. Implement the IEnumerable and IEditableObject interfaces on data source entities.

C. Implement the ILookup and IUpdatable interfaces on data source entities.

D. Implement the IContainer and IEditableObject interfaces on data source entities.

Correct Answer: A

QUESTION 5

You are redesigning an existing three-tier ASP.NET Web application that is deployed to a Web server, an application server, and a database server that runs Microsoft SQL Server 2008.

Usage has increased significantly. The application has become slow and occasionally times out.

Health monitoring logs indicate that the data access logic on the application server is consuming the majority of the CPU resources.

You need to recommend an approach for addressing the scalability and reliability issues.

Which two actions should you recommend? (Each correct answer presents part of the solution. Choose two.)

A. Move the application tier to a Web farm.

B. Partition the tables and indexes in the database.

C. Use a clustered database server configuration.

D. Move the Web tier to a Web farm.

Correct Answer: AC
