QUESTION 1

You are migrating a company's infrastructure to Azure.

You need to implement all required services.

For each solution, which object or service should you implement? To answer, drag the appropriate Azure object or service to the correct solution. Each service may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content

Select and Place:

Objects and Services

Azure Active Directory
Virtual Machine
Virtual Interface Card
Security Center
API Management
Virtual Network
Network Security Group

Answer Area

Solution

Allows the creation of a perimeter network
Identity solution for cloud resources
Firewall restrictions for Azure resources
Identity solution for on-premises resources

Object or service

object or service

object or service

object or service

object or service

Correct Answer:

Objects and Services

Azure Active Directory
Virtual Machine
Virtual Interface Card
Security Center
API Management
Virtual Network
Network Security Group

Answer Area

Solution

Allows the creation of a perimeter network
Identity solution for cloud resources
Firewall restrictions for Azure resources
Identity solution for on-premises resources

Object or service

Virtual Network

Azure Active Directory

Network Security Group

Azure Active Directory

**QUESTION 2**

You manage a public-facing web application which allows authenticated users to upload and download large files. On the initial public page there is a promotional video.

You plan to give users access to the site content and promotional video. In the table below, identify the access method that should be used for the anonymous and authenticated parts of the application.

Make only one selection in each column.

Hot Area:

Access Method	Anonymous	Authenticated
Create an Access Policy per user and provide Read and Write access to the blob files by using Shared Access Signatures.	<input type="radio"/>	<input type="radio"/>
Create Ad-Hoc Shared Access Signatures to provide read-only access to the blob files.	<input type="radio"/>	<input type="radio"/>
Create Ad-Hoc Shared Access Signatures to provide Read and Write access to the blob files.	<input type="radio"/>	<input type="radio"/>
Make the blob container public.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Access Method	Anonymous	Authenticated
Create an Access Policy per user and provide Read and Write access to the blob files by using Shared Access Signatures.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Create Ad-Hoc Shared Access Signatures to provide read-only access to the blob files.	<input type="checkbox"/>	<input type="checkbox"/>
Create Ad-Hoc Shared Access Signatures to provide Read and Write access to the blob files.	<input type="checkbox"/>	<input type="checkbox"/>
Make the blob container public.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Anonymous: If a SAS is published publicly, it can be used by anyone in the world.

Authenticated: Create an Access Policy..

Not Ad-Hoc: Ad-Hoc would have to have a time limit.

QUESTION 3

You are designing the deployment for Linux virtual machines (VMs) in Azure. The VMs will be used for a web app that will run in Azure.

The web app must be able to run Bash scripts on demand. Parallel workloads must also be set to scale automatically based on use.

You need to design the environment for the Bash scripts and parallel workloads.

Which processing type should you use for each component? To answer, drag the appropriate processing types to the correct components. Each processing type may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Processing types

Azure Batch

Azure WebJobs

Azure Functions

Azure Scheduler

Answer Area

Component

Bash scripts

Parallel workloads

Processing type

Processing type

Processing type

Correct Answer:

Processing types

Azure Functions

Azure Scheduler

Answer Area

Component

Bash scripts

Parallel workloads

Processing type

Azure WebJobs

Azure Batch

QUESTION 4

You need to recommend an appropriate solution for the data mining requirements.

Which solution should you recommend?

- A. Design a schedule process that allocates tasks to multiple virtual machines, and use the Azure Portal to create new VMs as needed.
- B. Use Azure HPC Scheduler Tools to schedule jobs and automate scaling of virtual machines.
- C. Use Traffic Manager to allocate tasks to multiple virtual machines, and use the Azure Portal to spin up new virtual

machines as needed.

D. Use Windows Server HPC Pack on-premises to schedule jobs and automate scaling of virtual machines in Azure.

Correct Answer: B

QUESTION 5

You need to design the mobile service storage architecture for NorthRideFinder.

Which solutions should you recommend? To answer, select the appropriate solutions in the answer area.

Hot Area:

Objective	Service
Add users	Custom table Insert operation
	Custom table Read operation
	Custom BLOB Insert operation
	Custom BLOB Read operation
Access profile data	Custom table Insert operation
	Custom table Read operation
	Custom BLOB Insert operation
	Custom BLOB Read operation

Correct Answer:

Objective	Service
Add users	Custom table Insert operation
	Custom table Read operation
	Custom BLOB Insert operation
	Custom BLOB Read operation
Access profile data	Custom table Insert operation
	Custom table Read operation
	Custom BLOB Insert operation
	Custom BLOB Read operation

From scenario: NorthRideFinder App Northwind Electric Cars needs a customer-facing website and mobile app that allows customers to schedule pickups. Customers should also be able to create profiles that will help ensure the customer gets a ride faster by storing customer information.
