QUESTION 1

You need to implement resource security and authentication.

For each requirement, which solution should you implement? To answer, drag the appropriate solution to the correct requirement. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view

content.

Select and Place:

Solutions

| Azure Active Directory Connect |
| Microsoft Account Authentication |
| Azure Active Directory B2C |
| Active Directory Federations Services |

Answer Area

Requirement	Solution
Enable user sign in for employees	Solution
Enable user sign in for partners	Solution
Enable datacenter connectivity for the DataViewer application	Solution

Correct Answer:

Solutions

| Azure Active Directory Connect |
| Microsoft Account Authentication |
| Azure Active Directory B2C |
| Active Directory Federations Services |

Answer Area

Requirement	Solution
Enable user sign in for employees	Azure Active Directory Connect
Enable user sign in for partners	Active Directory Federations Services
Enable datacenter connectivity for the DataViewer application	Active Directory Federations Services

QUESTION 2

Your development team has created a new solution that is deployed in a virtual network named fabDevVNet. Your testing team wants to begin testing the solution in a second Azure subscription.

You need to create a virtual network named fabTestVNet that is identical to fabDevVNet.

You want to achieve this goal by using the least amount of administrative effort.

Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Action	Answer Area
In the Management Portal, rename the virtual network to fabTestVNet in the testing subscription.	
In the development subscription, import the network configuration.	
In the testing subscription, import the network configuration.	
In the development subscription, export the network configuration.	
Create a virtual network by using the Management Portal in the testing subscription.	
In the network configuration file, set the name attribute of the VirtualNetworkSite to fabTestVNet.	
In the testing subscription, export the network configuration.	

Correct Answer:

Action	Answer Area
In the Management Portal, rename the virtual network to fabTestVNet in the testing subscription.	In the development subscription, import the network configuration.
	In the network configuration file, set the name attribute of the VirtualNetworkSite to fabTestVNet.
	In the testing subscription, import the network configuration.
In the development subscription, export the network configuration.	
Create a virtual network by using the Management Portal in the testing subscription.	
In the testing subscription, export the network configuration.	

Step 1: In the development subscription, export the network configuration

First export network configuration from the development subscription.

Step 2:

Rename the configuration file.

Step 3:

Import the network configuration

QUESTION 3

You need to ensure that the customer-facing website meets the scaling and deployment requirements. What should you do?

A. Use Traffic Manager with load balancing enabled. Deploy websites in a single region.

B. Use Traffic Manager with load balancing enabled. Deploy web apps in multiple regions that are nearest to the website visitor populations

C. Implement operational procedures to quickly deploy additional local instances of the web apps when you are notified by Traffic Manager

D. Deploy and maintain multiple web app instances in the largest Azure datacenters in North America, Europe, and Asia.

Correct Answer: B

From scenario: Customers must have 24-hour access to media downloads regardless of their location or time zone.

QUESTION 4

You are designing an Azure Web App.

All users must authenticate by using Active Directory Domain Services (AD DS) credentials.

You need to recommend an approach to enable single sign-on to the application for domain-authenticated users.

Which two actions should you recommend? Each correct answer presents part of the solution.

A. Use Forms authentication to generate claims.

B. Use the SQL membership provider in the web application.

C. Use the Azure AD Authentication library in the web application

D. Use Active Directory Federation Services (AD FS) to generate claims.

Correct Answer: CD

QUESTION 5

You develop a new Azure Web App that uses multiple Azure Blobs and static content. The Web App uses a large number of JavaScript files and cascading style sheets. Some of these files contain references to other files. Users are

geographically dispersed.

You need to minimize the time to load individual pages.

What should you do?

A. Use an Azure Content Delivery Network (CDN).

B. Implement an Azure Redis Cache.

C. Migrate the Web App to Azure Service Fabric.

D. Create a services layer by using an Azure-hosted ASP.NET web API.

E. Enable the always On feature of the Web App.

Correct Answer: A
