QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question on the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage a solution in Azure. You configure Event Hubs to collect telemetry data from dozens of industrial machines. Hundreds of events per minute are logged in near real-time. You use this data to create dashboards for analysts.

The company is expanding their machinery and wants to know if the current telemetry solution will be sufficient to handle the volume of the increasing workload. The volume will increase 10 times by year end and on a regular basis thereafter.

Latency will become more and more important as volume increases.

Messages must be retained for a week. Data must be captured automatically without price increase.

You need to recommend a solution.

Solution: Use the higher throughput limit of the dedicated tier to ensure real-time logging of the increasing volume.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

You need to prevent security attacks based on the Tabular Data Stream (TDS) Protocol.

Solution: Isolate connection to Azure web Apps and Azure SQL Database instances by implementing a virtual network.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 3

You need to configure the Northwind website.

Which two solutions should you use? Each correct answer presents part of the solution.

- A. Configure a hybrid connection to the database.
- B. Create Azure virtual machines that run Windows and Linux servers in Azure data centers.
- C. Use Azure Zone Redundant Storage to provide redundancy across Azure global data centers.
- D. Deploy the Northwind site to an Azure web app.
- E. Implement Azure ExpressRoute to increase the bandwidth for users of the Northwind public website.

Correct Answer: AD

QUESTION 4

You have an existing server that runs Windows Server. You plan to create a base image of this server. You will use this base image to prepare several virtual servers for future use.

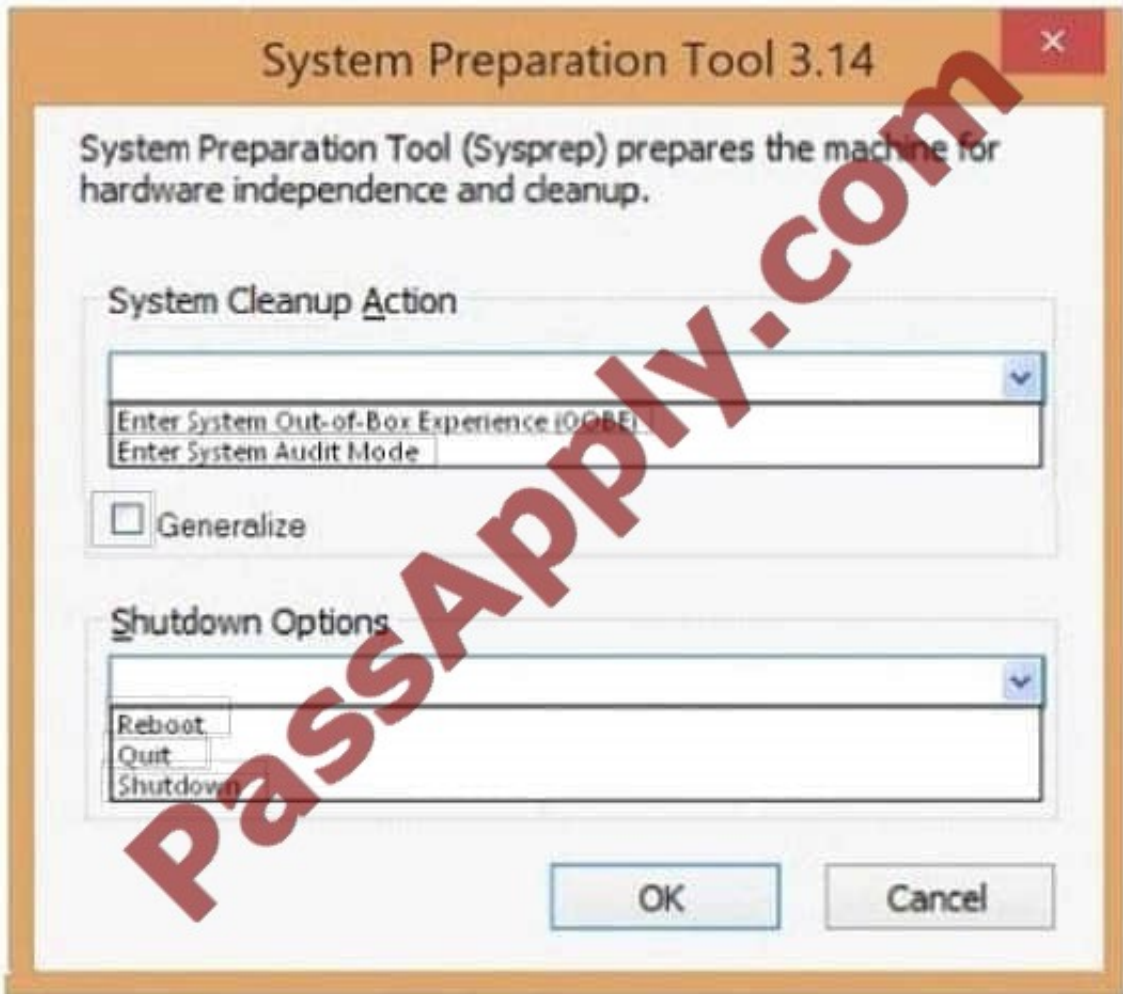

After the base image is prepared, you will capture it by using the Azure management portal. You must use the System Preparation Tool (Sysprep) to prepare the server so that the base image can be captured.

You need to prepare the server so that the base image can be captured. What should you do? To answer, configure the appropriate options in the dialog box in the answer area.

Hot Area:

System Preparation Tool dialog box

Correct Answer:

System Preparation Tool dialog box

Capture the virtual machine

1.
In the Azure portal, Connect to the virtual machine.
2.
Open a Command Prompt window as an administrator.
3.
Change the directory to %windir%\system32\sysprep, and then run sysprep.exe.
4.
The System Preparation Tool dialog box appears. Do the following:
In System Cleanup Action, select Enter System Out-of-Box Experience (OOBE) and make sure that Generalize is checked.
In Shutdown Options, select Shutdown.

Click OK.

Etc.

QUESTION 5

You need to recommend a directory service and identity provider for the Tailspin Toys HR app.

What should you do recommend? To answer, drag the appropriate recommendations to the correct requirements. Each recommendation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Recommendations	Requirement	Recommendation
Implement Azure AD business-to-business (B2B).	Directory service	Recommendation
Implement Azure AD business-to-consumer (B2C).	Configure identity provider	Recommendation
Configure Facebook as an identity provider.		
Implement Active Directory Domain Services.		
Add business-to-business (B2B) collaboration guest users.		
Configure a Microsoft account as an identity provider.		

Correct Answer:

Recommendations	Requirement	Recommendation
Implement Azure AD business-to-consumer (B2C).	Directory service	Implement Azure AD business-to-business (B2B).
Configure Facebook as an identity provider.		
Implement Active Directory Domain Services.		
Configure a Microsoft account as an identity provider.	Configure identity provider	Add business-to-business (B2B) collaboration guest users.
