### QUESTION 1

You work for a software company that sells Web Parts to customers. You designed the first version of a Web Part named Weather 1.0. The company has already sold several hundred licenses of the Web Part. You designed a new solution package for Weather 2.0.

Some customers who are already using Weather 1.0 will install Weather 2.0 in the same Web application as Weather 1.0. You need to design your package so that the functionality of Weather 1.0 will not be affected by the installation of Weather 2.0 in the same Web application.

Which approach should you recommend?

- A. Use the same assembly name and namespace for Weather 2.0 that you used for Weather 1.0. Create a new .webpart file. Increment the version number in the .webpart file.
- B. Use the same assembly name and namespace, but increment the version number of the assembly package. Use the same .webpart file that you used for Weather 1.0.
- C. Use the same assembly name and namespace, but increment the version number of the assembly package. Configure assembly binding redirection from version 1.0 of the assembly to version 2.0. Use the same .webpart file that you used for Weather 1.0.
- D. Use the same assembly name and namespace, but increment the version number of the assembly package. Create a new .webpart file.

Correct Answer: D

---

### QUESTION 2

You are designing a SharePoint 2010 application. The code makes numerous calls to SPSite and SPWeb objects. The system and application performance is poor in the test environment. There is also a high level of memory use for IIS worker processes. You need to ensure that the application performance and high memory use issues are addressed.

Which approach should you recommend?

- A. Use the Resource Throttling settings in Central Administration to increase site resource thresholds.
- B. Use the SPSite and SPWeb SharePoint 2010 PowerShell cmdlets.
- C. Ensure that the Dispose method of SPSite and SPWeb is called throughout the code.
- D. Ensure that the Close method of SPSite and SPWeb is called throughout the code.

Correct Answer: C

---

### QUESTION 3

You are helping an organization's executive team to design an automated approval process to standardize certain documents. You have the following requirements:

- .The documents must be reviewed and approved by multiple teams in the approval chain.
- .Each reviewer must provide feedback as part of completing a review.
- .Each reviewer must either approve or reject the documents.
- .After review, the document status must be changed; an e-mail must be generated to the document author and the next reviewer in the approval chain; and a task should be created for the next reviewer in the approval chain. You must design

a custom workflow solution for the document approval process on a SharePoint 2010 site.

What should the solution include?

- A. an initiation form to collect the reviewer's feedback and a Simple activity to approve and reject the document
- B. an association form to collect the reviewer's feedback and a Composite activity to support conditional activities such as approval and rejection
- C. a task form to collect the reviewer's feedback and a Composite activity to support conditional activities such as approval and rejection
- D. a task form to collect the reviewer's feedback and a Simple activity to approve and reject the document

Correct Answer: C

---

#### QUESTION 4

You are designing a SharePoint 2010 application that allows users to enter contact information into a form. You need to design the application so that it displays a dialog box prompting users to validate their contact information before the data is saved.

Which approach should you recommend?

- A. Create an application page that calls the SP.UI.ModalDialog class.
- B. Create an application page that calls the SP.UI.PopoutMenu class.
- C. Create a Web Part that calls the MessageBox class.
- D. Create a visual Web Part that calls the SP.UI.PopoutMenu class.

Correct Answer: A

---

#### QUESTION 5

A company with offices worldwide has asked you to design a SharePoint 2010 feature for an intranet portal. The feature must:

- .Be activated only on a site collection.
- .Contain a customized list template.
- .Contain a custom List page.
- .Use globalized resources that can be shared with other features.

You need to design the feature to support all these requirements.

Which approach should you recommend?

- A. Use the Scope attribute of the feature to limit the availability of the feature to a site collection. Then set the RequireResources element to true. Store globalized resources in a file in a global document library.
- B. Use the Scope attribute of the feature to limit the availability of the feature to a site collection. Then use the Module element in the feature to provision a file into the SharePoint 2010 site. Store shared resources in the \web server extensions\14\Resources folder.
- C. Use the Scope attribute of the feature to limit the availability of the feature to a farm. Then use the Module element to provision a file into the SharePoint site. Store shared resources in the \\_catalogs folder.
- D. Use the Module element in the feature to limit the availability of the feature to a site collection. Then set the RequireResources element to true. Store shared resources in the \web server extensions\14\Resources folder.

Correct Answer: B
