### QUESTION 1

You are designing a solution on a SharePoint 2010 intranet site where administrative access to the SharePoint 2010 application server is not available. You need to ensure that site usage information is collected on search statistics for all the sites on the farm.

Which approach should you recommend?

- A. Create a Windows service and schedule it to collect the search statistics according to a specified schedule.
- B. Create a SharePoint sandboxed solution to collect the search statistics.
- C. Write a console application to collect search statistics. Create a timer job to run the application according to a specified schedule.
- D. Write a console application to collect search statistics. Use Windows Task Scheduler to run the application at regular intervals.

Correct Answer: C

---

### QUESTION 2

You are designing a SharePoint 2010 application that includes a Task list. You have the following requirements:

.For each task, allow users to specify one of three values for an item named Phase using a drop- down menu.

.Allow contributors to add new values for the Phase item.

You need to design this application without using custom code.

Which approach should you recommend?

- A. Create a Multiple lines of text field type on the Task list.
- B. Create a Single line of text field type on the Task list.
- C. Create a Choice field type on the Task list that gets values from a custom list.
- D. Create a Lookup field type on the Task list that gets values from a custom list.

Correct Answer: D

---

### QUESTION 3

You are planning an upgrade for an existing SharePoint 2010 intranet site to support a Spanish language version of all existing sites. You need to meet the following requirements:

.All text on the sites must appear in both Spanish and English.

.Every page on the current English sites must also appear in Spanish.

.All future pages must be created in both languages in a consistent manner.

.The upgrade must involve the least amount of human effort and the least expenditure of hardware and software resources.

Which approach should you recommend?

A. Install a parallel SharePoint farm using Spanish as the default language. Recreate all sites and incorporate the Spanish language version of the site definition by specifying the Spanish language identifier.

B. Install a language pack for Spanish on the existing SharePoint farm. Recreate all sites and incorporate the Spanish language version of the site definition by specifying the Spanish language identifier.

C. Install a language pack for Spanish on the existing SharePoint farm. Create SharePoint workflows that apply the Spanish language identifier for the sites by specifying Spanish variations.

D. Install a language pack for Spanish on the existing SharePoint farm. Apply the Spanish language identifier to the existing site templates.

Correct Answer: B

---

#### QUESTION 4

You are designing a SharePoint 2010 application. You have an Internet-facing site with numerous image and movie files. You need to ensure that these files are cached so that they are displayed to users quickly. Which approach should you recommend?

A. In the SharePoint web.config file, set the cacheForEditRights property of the OutputCacheProfiles element to true.

B. In the SharePoint web.config file, set the enabled property of the BlobCache element to true.

C. In Site Collection Administration, use Site Collection Cache Settings to configure the cache.

D. In Central Administration, use Search Administration to manage the cache.

Correct Answer: B

---

#### QUESTION 5

You are designing a SharePoint 2010 application that will deploy a Web Part assembly. You need to specify which element to add to the solution manifest (manifest.xml) to meet the following requirements:

.The Web Part must retrieve data from an external database but must not require a custom access policy. .The company's security policies specify that all SharePoint Web applications must run at minimal trust.

Which approach should you recommend?

- A. Add a DwpFile element and an Assembly element specifying a DeploymentTarget of GlobalAssemblyCache.
- B. Add a DwpFile element and an Assembly element specifying a DeploymentTarget of WebApplication.
- C. Add a SafeControl element within an Assembly element specifying a DeploymentTarget of GlobalAssemblyCache.
- D. Add a SafeControl element within an Assembly element specifying a DeploymentTarget of WebApplication.

Correct Answer: C
