QUESTION 1

You are planning an upgrade from an existing Microsoft Office SharePoint Server (MOSS) 2007 farm to a SharePoint 2010 farm.The existing farm contains customized master pages. These master pages include modifications of the:

.Publishing Console .Site Actions Menu .Log-in Control

Your design must specify an upgrade to the existing master pages to function correctly in SharePoint 2010.

Which approach should you recommend?

A. Create a new SharePoint 2010 master page and add the required controls into the Ribbon on the page.

B. Update the cascading style sheet (CSS) styles in the core.css file of the existing SharePoint sites with the SharePoint 2010 CSS styles. Add SharePoint 2010 content placeholders to the existing master pages.

C. Create SharePoint 2010 delegate controls for all of the custom controls in the existing MOSS 2007 master pages. Add these controls to the new SharePoint 2010 master pages.

D. Use the Farm Configuration wizard to upgrade the existing MOSS 2007 master pages so that the pages are compatible with SharePoint 2010.

Correct Answer: A

QUESTION 2

You are designing a SharePoint 2010 site that employees will use for project collaboration.

The design should include a project name, identification number, and the names of the people on the project team displayed on a new page.You need to design the site to meet the following requirements:

.This page must be immediately available in existing sites in the site collection upon deployment.

.New sites must have this page immediately available.

Which approach should you recommend?

A. Create a master page and deploy it to the Master Page Gallery. Apply the master page to every site in the site collection.

B. Create a page layout and deploy it to the Master Page Gallery. Create a publishing page, based on the page layout, in every site in the site collection.

C. Create an application page and deploy it to the _layouts directory.

D. Create a Web Part page and deploy it to the top-level site of the site collection.

Correct Answer: C

QUESTION 3

You work for a manufacturer who needs to advertise its catalog of products online using a SharePoint 2010 publishing site. A page author will create a Web page for every type of product the manufacturer makes. Each Web page will display

the name of the material the product is made from and a photo of the product.You need to design this site to satisfy the following requirements:

.When the page author creates a new Web page for a product, the author should only be able to choose from a list of five materials.

.The manufacturer\\'s marketing manager should be able to add to the list of materials at any time without assistance from the IT department.

.Users can choose to view the site in English, German, or Spanish. A user should see the name of the product material in only the language they have selected.

.The URL of the page should remain the same for each type of product regardless of the language the user has selected.

Which approach should you recommend?

A. Create a site column of type "Choice" for English, German, and French, and add the translated list of materials to the site column for each language. Add all three site columns to the page layout. Give the marketing manager permission to edit the Choice site column values for each language.

B. Create a resource file for each language and install the resource file using a SharePoint solution package. Show the marketing manager how to edit the resource file.

C. Use the Managed Metadata Service to create a set of terms used for product materials and translate each term into English, German, and Spanish. Add a site column mapped to the term set to the page layout. Make the marketing manager the term set owner.

D. For each type of product, create three Web pages, one for each language. Give the marketing manager permission to edit all the product Web pages.

Correct Answer: C

QUESTION 4

You manage your company\\'s SharePoint 2010 development efforts. Your company has hired an outside vendor to print its marketing materials.The head of the marketing department has asked you to design a plan to add functionality to the intranet site that will allow company employees to submit their print orders to a SharePoint list on the intranet site throughout the day. The vendor should receive a daily e-mail that shows them all the orders that were submitted to the intranet site the day before.Your plan needs to make this functionality possible.

Which approach should you recommend?

A. Create a custom workflow that generates an e-mail with order details and sends it to the vendor. Attach the workflow to the list and configure it to execute each time an item is added to the list.

B. Create an event receiver that generates an e-mail with order details and sends it to the vendor. Attach the event receiver to the ItemAdding event on the list.

C. Create an event receiver that generates an e-mail with order details and sends it to the vendor. Attach the event receiver to the ItemAdded event on the list.

D. Create a timer job that retrieves all the orders submitted to the SharePoint list, generates an e- mail containing the order information, and sends it to the vendor. Schedule the timer job to run each morning.

Correct Answer: D

QUESTION 5

You are designing a SharePoint 2010 application.You have a requirement to deploy content between servers that experience frequent interruptions in connectivity.You need to design a strategy for exporting the content to a package and transporting the package to meet the requirements.

Which approach should you recommend?

A. Create a job to export the content to a package, and then create a job to transport the package.

B. Create a path to export the content to a package, and then create a job to transport the package.

C. Use the Content Migration API to export the content to a package, and then create a path to transport the package.

D. Use the Content Migration API to export the content to a package, and then manually transport the package.

Correct Answer: D
