QUESTION 1

You are a SharePoint administrator for Contoso, Ltd. The company has 2,000 employees and 500 external users who work at the offices of various partner companies.

You plan to deploy SharePoint Server 2010 to host an intranet Web site, an extranet Web site, and a public Web site for the company.

You are evaluating whether to implement a single server farm that will contain the extranet Web site, the intranet Web site, and the public Website.

You need to prevent partner company users from creating My Sites.

What should you do?

- A. Delete the users from all of the SharePoint groups in the My Sites host application.
- B. Disable the User Profile Service.
- C. Disassociate the extranet application from the default user profile proxy.
- D. Store the User Profile database inside the perimeter network.

Correct Answer: C

QUESTION 2

You are the administrator for a SharePoint 2010 farm.

You need to move the content database from a Microsoft SQL Server named Server1 to an SQL Server named Server2 within the farm.

What should you do? (To answer, move the appropriate actions from the list of actions in the answer area and arrange them in the correct order.)

Select and Place:

Back up the database in Server1.

Restore the database in Server2.

Detach the database from Server1.

Remove the content database from the web application.

Add the content database to the destination web application.

Move the .mdf, .ndf, and .ldf files associated with the database from Server1 to Server2.

Restart any service applications and services that must be run against the database, including timer jobs and search crawls.

Pause any service applications and services that might attempt to run against the database, including timer jobs and search crawls.

Correct Answer:

Pause any service applications and services that might attempt to run against the database, including timer jobs and search crawls.

Remove the content database from the web application.

Back up the database in Server1.

Restore the database in Server2.

Add the content database to the destination web application.

Restart any service applications and services that must be run against the database, including timer jobs and search crawls.

QUESTION 3

You have a SharePoint Server 2010 Service Pack I (SP1) server farm.

You need to recommend which tools must be used to recover deleted pages, deleted document libraries, and deleted permission levels. The solution must use the minimum amount of administrative effort.

Which tool should you use for each type of content? To answer, drag the appropriate tool to the correct recovery task in the answer area.

Select and Place:

Tools	Answer Area
Microsoft SQL Server backups	Pages <input type="text" value="Tool"/>
Recycle Bin	Document libraries <input type="text" value="Tool"/>
Windows Server Backup	Permission levels <input type="text" value="Tool"/>

Correct Answer:

Tools	Answer Area
Microsoft SQL Server backups	Pages <input type="text" value="Recycle Bin"/>
Recycle Bin	Document libraries <input type="text" value="Recycle Bin"/>
Windows Server Backup	Permission levels <input type="text" value="Microsoft SQL Server backups"/>

QUESTION 4

You are a SharePoint administrator for Contoso, Ltd.

The company has 2,000 employees and 500 external users who work at the offices of various partner companies.

You plan to deploy SharePoint Server 2010 to host an intranet Web site, an extranet Web site, and a public Web site for the company.

You need to recommend a solution to prevent the extranet Web site from exceeding 200 GB.

What should you recommend?

- A. Disable self-service site creation.
- B. Limit the number of site collections in the extranet content database.
- C. Implement a site collection policy.
- D. Implement resource throttling for the Web application.

Correct Answer: B

QUESTION 5

You are planning the taxonomy of a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You identify the following requirements:

The legal department will require a list view threshold of 1,000 items.

The accounting department will require a list view threshold of 2,000 items.

The manufacturing department will require a list view threshold of 1,000 items.

You need to identify the minimum number of web applications and site collections that must be created to meet the requirements.

How many web applications and site collections should you identify?

- A. Three web applications and three site collections
- B. One web application and three site collections
- C. Two web applications and two site collections
- D. One web application and two site collections

Correct Answer: C
