### QUESTION 1

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You plan to deploy a site for the sales department and a site for the finance department. You identify the following search requirements for each site:

Content on the finance site must be indexed once daily.

Content on the sales site must be indexed every 15 minutes.

Each site must have independent search keywords and synonyms.

You need to recommend a logical structure to meet the search requirements of each site. What should you recommend?

- A. One site collection, two sites, and two search scopes
- B. Two sites collections, two sites, and two search scopes
- C. Two sites collections, two sites, and two content sources
- D. One site collection, two sites, and two content sources

Correct Answer: C

---

### QUESTION 2

You need to recommend a backup strategy for the content in a SharePoint site collection. The strategy must meet the following requirements:

Adhere to the company's business requirements.

Minimize the amount of time required to restore the entire server farm.

What should you include in the backup strategy?

- A. granular backups and Microsoft SQL Server transaction log backups
- B. full farm backups and granular backups
- C. full farm backups and Microsoft SQL Server transaction log backups
- D. full farm backups and differential farm backups

Correct Answer: C

---

### QUESTION 3

You are a SharePoint administrator for Woodgrove Bank.

The company is located in Berlin and has 25,000 employees.

You need to recommend a backup strategy to meet the company's backup and restore requirements.

What should you recommend?

- A. SharePoint farm backups and Windows Server backups
- B. Microsoft SQL Server differential backups and SQL Server log shipping
- C. SharePoint farm backups and SharePoint granular backups
- D. Microsoft SQL Server differential backups and SharePoint granular backups

Correct Answer: C

---

#### QUESTION 4

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

WebApp1 is used by the finance department and uses the URL <http://finance.contoso.com>. WebApp2 is used by the marketing department and uses the URL <http://marketing.contoso.com>.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

Corporate security policy states that the password of each user account must be changed every three months.

You need to recommend a technology to ensure that the internal farm remains operational after the passwords change.

What should you include in the recommendation?

- A. Microsoft Visual Studio 2010
- B. the Access Services service application
- C. the Secure Store Service service application
- D. a BLOB cache
- E. Network Load Balancing (NLB)
- F. Information Rights Management (IRM)
- G. managed accounts
- H. SharePoint Health Analyzer

- I. Remote BLOB Storage (RBS)
- J. alternate access mappings
- K. Network Access Protection (NAP)
- L. Active Directory Federation Services (AD FS)
- M. service application groups
- N. an ASP.NET Membership Database
- O. cross-firewall access zones
- P. user policies

Correct Answer: G

---

#### QUESTION 5

You plan to deploy a SharePoint 2010 farm.

You need to ensure that the following requirements are met:

The farm must handle up to 15,000 users.

The farm must be optimized for search and load balancing The farm must be cost-efficient.

Which farm deployment topology should you use? (Choose the best answer.)

A.

A first web server that has the Query component

A second web server that has the Query component

A single application server that has all other service components

A first database server that contains Search databases

A second database server that contains all other SharePoint databases

B.

A first web server that has the Query component

A second web server that has the Query component

A single application server that has all service components

A single database server that contains all SharePoint databases.

C.

A first web server that does not have the Query component

A second web server that does not have the Query component

A third web server that has the Query component

A first application server that has the query and crawl component

A second application server that has all other application server components

A first database server that contains Search databases

A second database server that contains all other SharePoint databases

D.

A first web server that has the Query component

A second web server that has the Query component and all other service components

A single database server that contains all SharePoint databases

Correct Answer: A
