QUESTION 1

You are planning to upgrade Microsoft Internet Explorer. You must create a report that identifies which computers are successfully upgraded. You need to design a deployment method that meets this requirement. What should you use? (Choose all that apply.)

- A. Microsoft System Center Essentials
- B. Windows Intune
- C. Microsoft System Center Configuration Manager
- D. Internet Explorer Administration Kit (IEAK) and Group Policy
- E. Windows Server Update Services (WSUS)

Correct Answer: ABDE

QUESTION 2

Your company has 1,000 client computers that run Windows XP Professional x64.

You are planning to deploy Windows 7 Enterprise x64.

The company uses an application that is incompatible with Windows 7 Enterprise x64.

You have the following requirements:

You need to design a solution that meets the requirements.

What should you do?

- A. Install the application on all client computers by using Group Policy, and then use the Compatibility tab.
- B. Install the Microsoft Application Virtualization (App-V) client on each client computer, and run the application in offline mode.
- C. Install the Microsoft Enterprise Desktop Virtualization (MED-V) package on each client computer.
- D. Install the Microsoft Application Virtualization (App-V) client on each client computer, and stream the application by using App-V.

Correct Answer: C

QUESTION 3

Your company has 1,000 client computers.

You are planning to deploy Windows 7 and a new line-of-business application.

You have the following requirements:

You need to ensure that the application is installed on all new client computers.

What should you do?

- A. Deploy the application by using Windows Server Update Services (WSUS).
- B. Publish the application by using Group Policy Software Installation.
- C. Service an offline image of Windows 7 to add the new application.
- D. Service an online image of Windows 7 to add the new application.

Correct Answer: D

Hints:

Client computer that are not connected to the network = A and B is wrong the question refer to application installation. You can not do it offline servicing. Only online will be able to achieve it.

QUESTION 4

You are planning the deployment of Windows 7 to computers that are located in a main office, in branch offices, and in a store kiosk.

Computers in all three types of location use the same hardware. Kiosk computers are members of a workgroup. Kiosk computers must use specific settings for local security. Branch office computers must use BitLocker Drive Encryption.

You have the following requirements: Create deployment images. Minimize image maintenance.

You need to define an image-creation strategy that meets the requirements.

What should you do?

- A. Create a single image to use for the branch office computers and the kiosk computers. Create a separate image to use for the main office computers.
- B. Create a single image to use for all location types. Create a custom Windows security template for each location type.
- C. Create one image to use for each location type. Encrypt the hard disks on the branch office computers prior to capturing the image.
- D. Create a single image to use for the main office computers and the branch office computers, and apply the required settings through Group Policy. Create a separate image to use for the kiosk computers.

Correct Answer: D

hints:

Kiosk is belong to workgroup, it does not support by group policy. so it must use separate image for its own local security.

QUESTION 5

You are planning a Windows 7 deployment infrastructure.

You have the following requirements:

You need to design an infrastructure that meets the requirements.

Which deployment method should you recommend?

- A. Microsoft Deployment Toolkit (MDT) 2010
- B. Microsoft Deployment Toolkit (MDT) 2008
- C. Windows Deployment Services in Windows Server 2008 R2
- D. Deployment Image Servicing and Management (DISM)

Correct Answer: C
