### QUESTION 1

Your company has 1,000 Windows XP computers. You plan to migrate these computers to Windows 7.

You need to detect compatibility issues that can occur during the installation and configuration process for a specific application.

Which tool should you use?

- A. Windows Compatibility Evaluator
- B. Setup Analysis Tool
- C. Inventory Collector
- D. Update Compatibility Evaluator

Correct Answer: B

[http://technet.microsoft.com/pt-pt/library/cc766109\(v=ws.10\).aspx](http://technet.microsoft.com/pt-pt/library/cc766109(v=ws.10).aspx) The Setup Analysis Tool (SAT) automates the running of application installations while monitoring the actions taken by each application's installer. The standalone version of

SAT can monitor any MSI-based installers and third-party installers. However, the Virtual SAT tool can only monitor MSI-based installers and third-party installers that run unattended.

hints:

You need to detect compatibility issues that can occur during the installation and configuration process for a specific application.

---

### QUESTION 2

A company uses Microsoft Deployment Toolkit (MDT) 2010 to deploy Windows 7 Enterprise and Microsoft Office 2010. The company is replacing existing computers with new 64-bit computers.

You have the following requirements:

You need to create an image that meets these requirements.

What should you do? (Choose all that apply.)

- A. Import the Windows 7 Enterprise x86 source files.
- B. From the MDT deployment workbench, select the Custom Task Sequence template.
- C. Use a reference computer and capture a WIM image.
- D. From the MDT deployment workbench, select the Sysprep and Capture template.
- E. Import the necessary OEM drivers.
- F. Import the 32-bit version of Office 2010.

- G. Import the 64-bit version of Office 2010.
- H. Import the Windows 7 Enterprise x64 source files.

Correct Answer: ABEF

hints:

The specialized hardware is compatible with Windows 7 but only 32-bit drivers are available from the manufacturer.

### QUESTION 3

You are the desktop architect for an enterprise organization with computers that run Windows 7 Enterprise.

You need to create a customized WinPE image.

Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Change the default locale to English US by using **BCDboot**.

Create a pagefile on the C drive by using the **Wpeutil** command.

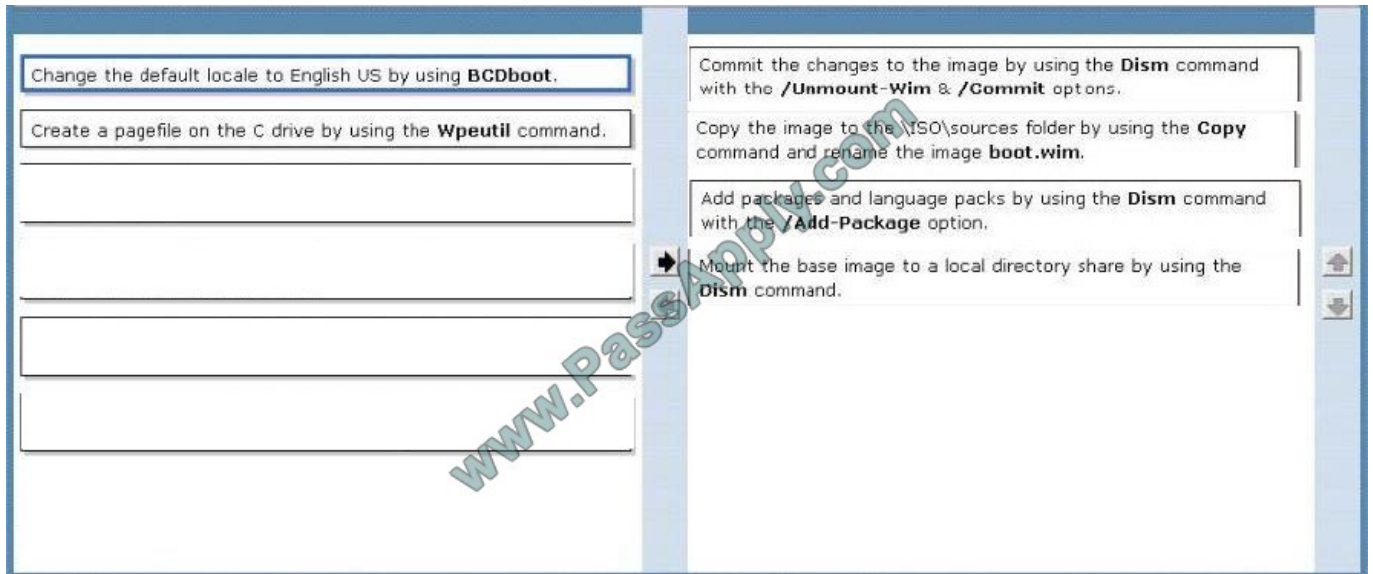

Mount the base image to a local directory share by using the **Dism** command.

Add packages and language packs by using the **Dism** command with the **/Add-Package** option.

Copy the image to the `\ISO\sources` folder by using the **Copy** command and rename the image **boot.wim**.

Commit the changes to the image by using the **Dism** command with the **/Unmount-Wim & /Commit** options.

Correct Answer:

#### QUESTION 4

You have an image that is used to deploy Windows 7 on client computers.

You need to add drivers to the Windows 7 image.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Use the Deployment Image Servicing and Management (DISM) tool offline.
- B. Use INF files for driver packages.
- C. Use executable files for driver packages.
- D. Use Windows Installer files for driver packages.
- E. Use the Deployment Image Servicing and Management (DISM) tool online.

Correct Answer: AB

Deployment Image Servicing and Management able to attach INF driver file to image at offline mode

#### QUESTION 5

You are designing a Windows 7 Enterprise image creation strategy.

The strategy must meet the following requirements:

You need to recommend the images that meet the requirements.

Which images should you recommend? (Choose all that apply.)

- A. a thin image for the 32-bit version of Windows 7
- B. a thick image for the 32-bit version of Windows 7
- C. a thick image for the 64-bit version of Windows 7
- D. a thin image for the 64-bit version of Windows 7

Correct Answer: AD
