QUESTION 1

A company has 50 client computers that run Windows 8. Forty client computers are connected to a secure internal network, and 10 client computers are located in public kiosks.

A new company security policy includes the following requirements:

Visitors can access only kiosk computers.

Employees can access and shut down only internal computers.

Only administrators can access all computers remotely.

Only administrators can shut down kiosk computers.

You need to assign security groups to local security policies to meet the requirements.

What should you do? (To answer, drag the appropriate security group or groups to the correct location or locations in the answer area. Security groups may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Click here to enter text.

Policy	Internal computers	Kiosk computers
Allow log on locally		
Allow log on through Remote Desktop Services		
Shut down the system		

Administrators
Everyone
Guests
Power Users
Authenticated Users

Correct Answer:

Click here to enter text.

Policy	Internal computers	Kiosk computers
Allow log on locally	Authenticated Users	Guests
Allow log on through Remote Desktop Services	Administrators	Administrators
Shut down the system	Authenticated Users	Administrators

Administrators
Everyone
Guests
Power Users
Authenticated Users

QUESTION 2

You administer Windows 8.1 client computers in your company network.

A user reports that her Internet connection is slower than usual.

You need to identify the Process Identifiers (PIDs) of applications that are making connections to the Internet.

Which command should you run?

- A. netstat -an
- B. jpconfig /showclassid
- C. netstat -o
- D. netsh set audit-logging
- E. netsh show netdlls

Correct Answer: C

QUESTION 3

Your company is deploying new Windows 8.1 computers.

The company has several departments. Each department requires different hardware configurations. You need to implement the appropriate hardware.

You have the following requirements:

Finance must have BitLocker To Go.

Operations must have the ability to use tablets and access the Windows Store to download and run apps.

IT must have the ability to use Hyper-V with Windows 8.1.

Marketing must have the ability to use tablets as well as the snap app functionality.

What are the minimum hardware requirements to meet each department's needs? (To answer, drag the appropriate hardware to the correct location or locations in the answer area. Each answer may be used more than once.)

Hardware	Answer Area	
USB flash drive	Department	Version
multitouch screen with a minimum of 1024x768 resolution	Finance	hardware
64-bit processor	Operations	hardware
multitouch screen with a minimum of 1366x768 resolution	IT	hardware
	Marketing	hardware

Correct Answer:

Hardware	Answer Area
	Department
	Version
	USB flash drive
	Finance
	multitouch screen with a minimum of 1024x768 resolution
	Operations
	64-bit processor
	IT
	Marketing
	multitouch screen with a minimum of 1366x768 resolution

QUESTION 4

You are a domain administrator for your company. Since the company's Windows 8.1 desktop computers are not backed up regularly, the company wants to enable folder redirection in order to move data from local desktops to network

storage.

You need to configure folder redirection on the domain so all existing desktops and any new desktops automatically apply the folder redirection settings.

What should you do?

- A. Create a new Group Policy Object (GPO) and configure the folder redirection options to meet your company's requirements.
- B. In computer management, create a task that is labeled Folder Redirection. Allow Folder Redirection to the specified path at named intervals.
- C. Map a network drive from each local desktop, right-click Properties, and choose Folder Redirection with proper settings.

D. Sync your offline folder to the network location to ensure that backups are completed on the network.

Correct Answer: A

QUESTION 5

A client computer that runs Windows 8 has two hard disk drives: a system drive and a data drive.

You are preparing to back up the computer prior to installing a developing software product.

You have the following requirements:

The system disk that is part of the backup must be mountable from within Windows.

The system disk that is part of the backup must be bootable. The backup must be viable to restore in the event of a hard disk failure. The backup must contain data from both hard disk drives.

You need to select a backup method.

Which method should you use?

- A. System repair disk
- B. Storage pool
- C. System image
- D. File History

Correct Answer: C
