QUESTION 1

You are the PC support specialist for Contoso, Ltd.

Your department upgrades your company\\'s laptops to Windows 8.1.

You need to use BitLocker to encrypt the system drives on these laptops. You attempt to encrypt several laptops but receive an error message shown in the following image:

BitLocker Drive Encryption (C:)

Starting BitLocker

This device can't use a Trusted Platform Module. Your administrator must set the "Allow BitLocker without a compatible TPM" option in the "Require additional authentication at startup" policy for OS volumes.

Use the drop-down menus to select the answer choice that completes each statement. Each correct selection is worth one point.

Answer Area

In order to encrypt your system drive with BitLocker, set the BitLocker Startup Preferences to [answer choice]

Once the drive is encrypted, [answer choice] each time you boot the computer.

Correct Answer:

Answer Area

In order to encrypt your system drive with BitLocker, set the BitLocker Startup Preferences to **[answer choice]**

Use BitLocker without additional keys.
Require a PIN at every startup
Require a Startup key at every startup.

Once the drive is encrypted, **[answer choice]** each time you boot the computer.

type a PIN when prompted
insert a USB drive with the saved key
select Automatic Unlock at prompt

QUESTION 2

You administer Windows 8.1 Pro computers in your company network. All computers are members of an Active Directory Domain Services (AD DS) domain.

A server named Server1 runs Windows Server 2012 and has an IP address of 10.10.10.20. Server1 is configured to use port 10987 for Remote Desktop connections.

From your Windows 8.1 computer, you need to create a Remote Desktop connection to Server1.

What should you do?

A. From the General tab of your Remote Desktop connection, enter 10.10.10.20 port: 10987.

B. Create a new Remote Desktop connection, and then set the Local Computer policy to Disable drives redirection for Remote Desktop Services.

C. From the Advanced tab of your Remote Desktop connection, configure the port of Server1 in the server authentication field.

D. Run mstsc.exe /v:10.10.10.20:10987.

Correct Answer: D

QUESTION 3

A company has 10 Windows 8.1 client computers. You purchase a Windows Store app and install the app on several computers.

The hard drive of a computer on which the application is installed fails. You reinstall Windows 8.1.

You need to reinstall the Windows Store app on the computer.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Actions	Answer Area
Log on to the computer with your Microsoft account.	
Open the **Programs and Features** Control Panel item.	
Reinstall the app from the **Currently installed programs** list.	
Display the **Accounts and Preferences** page of the Windows Store.	
Log on to the computer with a local account that has administrative privileges.	
Display your purchased apps, select the app you need to reinstall, and then click **Install**.	

Correct Answer:

Actions	Answer Area
	Log on to the computer with your Microsoft account.
Open the **Programs and Features** Control Panel item.	
Reinstall the app from the **Currently installed programs** list.	Display the **Accounts and Preferences** page of the Windows Store.
	Display your purchased apps, select the app you need to reinstall, and then click **Install**.
Log on to the computer with a local account that has administrative privileges.	

QUESTION 4

A company has client computers that run Windows 8. File History is on.

An employee downloads data to a folder on drive D named Archives.

You need to ensure that the user can restore files from the Archives folder by using File History.

What should you do?

A. Configure the File History advanced settings to include the Archives folder.

B. From the File History configuration options, change the drive and select the Archives folder.

C. Create a library named History and add the Archives folder to the library.

D. Move the Archives folder into the Windows system folder.

Correct Answer: C

http://blogs.msdn.com/b/b8/archive/2012/07/10/protecting-user-files-with-file-history.aspx

File History only backs up data in libraries, favorites, desktop, and contacts and must use a non-system drive for backup.

QUESTION 5

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 8.

You need to minimize the amount of Trusted Platform Module (TPM) authorization information that is stored in the registry.

What should you do?

A. Enable Platform Configuration Register indices (PCRs) 0, 2, 4, and 11 for the Configure TPM validation profile for native UEFI firmware configuration policy setting.

B. Create a Group Policy object (GPO) that disables the Configure the level of TPM owner authorization information available to operating system policy setting.

C. Create a Group Policy object (GPO) that sets the Configure the level of TPM owner authorization information available to operating system policy setting to None.

D. Create a Group Policy object (GPO) that enables the Turn on TPM Local Encryption policy setting.

Correct Answer: C
