QUESTION 1

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 8. Some computers have a Trusted Platform Module (TPM) chip. Members of the ITStaff security group are part of the local Power Users group on each client computer.

You need to configure a single Group Policy object (GPO) that will allow Windows BitLocker Drive Encryption on all client computers by using the least amount of privilege necessary.

Which commands should you run? (To answer, drag the appropriate command or commands to the correct location or locations in the answer area. Commands may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Correct Answer:

QUESTION 2

A company has an Active Directory Domain Services (AD DS) domain. All client computers are joined to the domain and run Window 8.1. You set up a management computer named COMPUTER1.

You plan to administer COMPUTER1 by using Windows Remote Shell (WinRS) from your client computer.

You are unable to connect to COMPUTER1 by running the winrs command. You need to ensure that you can manage only COMPUTER1 by using WinRS. What should you do?

A. Run the winrsnetdom join command on all client computers.

B. Run the winrsnetdom join command only on COMPUTER1.

C. Run the winrmquickconfig command on all client computers.

D. Run the winrmquickconfig command only on COMPUTER1.

E. Run the winrs /ad /u:administrator command on COMPUTER1.

Correct Answer: D

QUESTION 3

A company has 50 client computers that run Windows 8. Forty client computers are connected to a secure internal network, and 10 client computers are located in public kiosks.

A new company security policy includes the following requirements:

Visitors can access only kiosk computers.

Employees can access and shut down only internal computers.

Only administrators can access all computers remotely.

Only administrators can shut down kiosk computers.

You need to assign security groups to local security policies to meet the requirements.

What should you do? (To answer, drag the appropriate security group or groups to the correct location or locations in the answer area. Security groups may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Allow log on through Remote Desktop Services	Administrators	Administrators
Shut down the system	Authenticated Users	Administrators

QUESTION 4

You use a Window 8.1 tablet. The tablet receives Windows Update updates automatically from the Internet. The tablet has Wi-Fi and is connected to a 3G mobile broadband Wi-Fi hot spot.

You need to minimize data usage while connected to this hot spot.

What should you do?

A. Edit the Inbound Rule of Windows Firewall, and then disable Internet Control Message Protocol (ICMP) traffic.

B. Configure the broadband connection as a metered network.

C. Configure the interface metric of IP settings for Wi-Fi connection as 1.

D. Turn on Airplane Mode.

E. Disable File and Print Sharing for mobile broadband connections.

Correct Answer: B

QUESTION 5

You administer Windows 7 client computers in your company network. The computers are members of an Active Directory Domain Services (AD DS) domain and have 16-bit applications installed.

You plan to upgrade all of the computers from Windows 7 to Windows 8.1.

You need to ensure that the 16-bit applications will continue to run on Windows 8.1.

What are two version of Windows 8 that you could use to achieve this goal? (Each correct answer presents a complete of the solution. Choose two.)

A. Windows 8 Pro (64-bit)

B. Windows 8 Enterprise (64-bit)

C. Windows 8 Pro (32-bit)

D. Windows RT

E. Windows 8 Enterprise (32-bit)

Correct Answer: CE

While 64-bit copies of Windows 8 do not support 16-bit applications, they are still supported on 32-bit copies. However, they are not supported by default and must be manually turned on with a Control Panel applet.
