QUESTION 1

You have Windows 8.1 Enterprise client computers. All of the computers are managed by using Microsoft System Center 2012 Configuration Manager.

You enable Microsoft System Center 2012 Endpoint Protection on the computers.

You need to ensure that Endpoint Protection automatically downloads the latest available malware definition updates when unidentified malware is detected on the computers.

What should you configure? (To answer, select the appropriate option in the answer area.)

QUESTION 2

A company has 10 client computers that run Windows 8. You are responsible for technical support. You purchase a support tool from the Windows Store while logged in with your Microsoft account.

You install the support tool on several client computers.

Three months later, you attempt to install the support tool on another client computer. The installation fails.

You need to ensure that you can install the support tool on the client computer.

What should you do?

- A. On the computer on which you want to install the tool, synchronize the Windows Store application licenses.
- B. Disassociate your Microsoft account from the computer on which you want to install the tool. Then reassociate your Microsoft account with the computer.
- C. Reset your Microsoft account password.
- D. Log in with your Microsoft account and remove a computer from the Windows Store device list.

Correct Answer: D

You could prevent installation of mass storage devices but use the "Allow administrators to override" setting to ensure an administrator could get the flash drive installed.

Device Installation Restrictions		
Select an item to view its description.	Setting	State
	Allow administrators to override Device Installation Restriction policies	Not configured
	Allow installation of devices using drivers that match these device setup classes	Not configured
	Prevent installation of devices using drivers that match these device setup classes	Not configured
	Display a custom message when installation is prevented by a policy setting	Not configured
	Display a custom message title when device installation is prevented by a policy setting	Not configured
	Allow installation of devices that match any of these device IDs	Not configured
	Prevent installation of devices that match any of these device IDs	Not configured
	Time (in seconds) to force reboot when required for policy changes to take effect	Not configured
	Prevent installation of removable devices	Not configured
	Prevent installation of devices not described by other policy settings	Not configured

Sync app licenses

If a license for an app is out of sync with the license installed on your PC, the app might stop working.

QUESTION 3

You use Windows 7 (32-bit) on your client computer. You create a complete backup of the client computer.

You need to install Windows 8.1 Pro (64-bit) on the computer.

What should you do?

- A. Install Windows 8.1 Pro 64-bit on the existing volume by performing an upgrade installation.
- B. Install Windows 8.1 Pro 64-bit on the existing volume by performing a custom installation.
- C. Install Windows 8.1 Pro Pack.
- D. Install Windows 8.1 into a virtual hard disk (VHD) file.

Correct Answer: B

QUESTION 4

You have computers that run Windows 8 Pro and are configured as a workgroup. Each computer is scheduled to run a

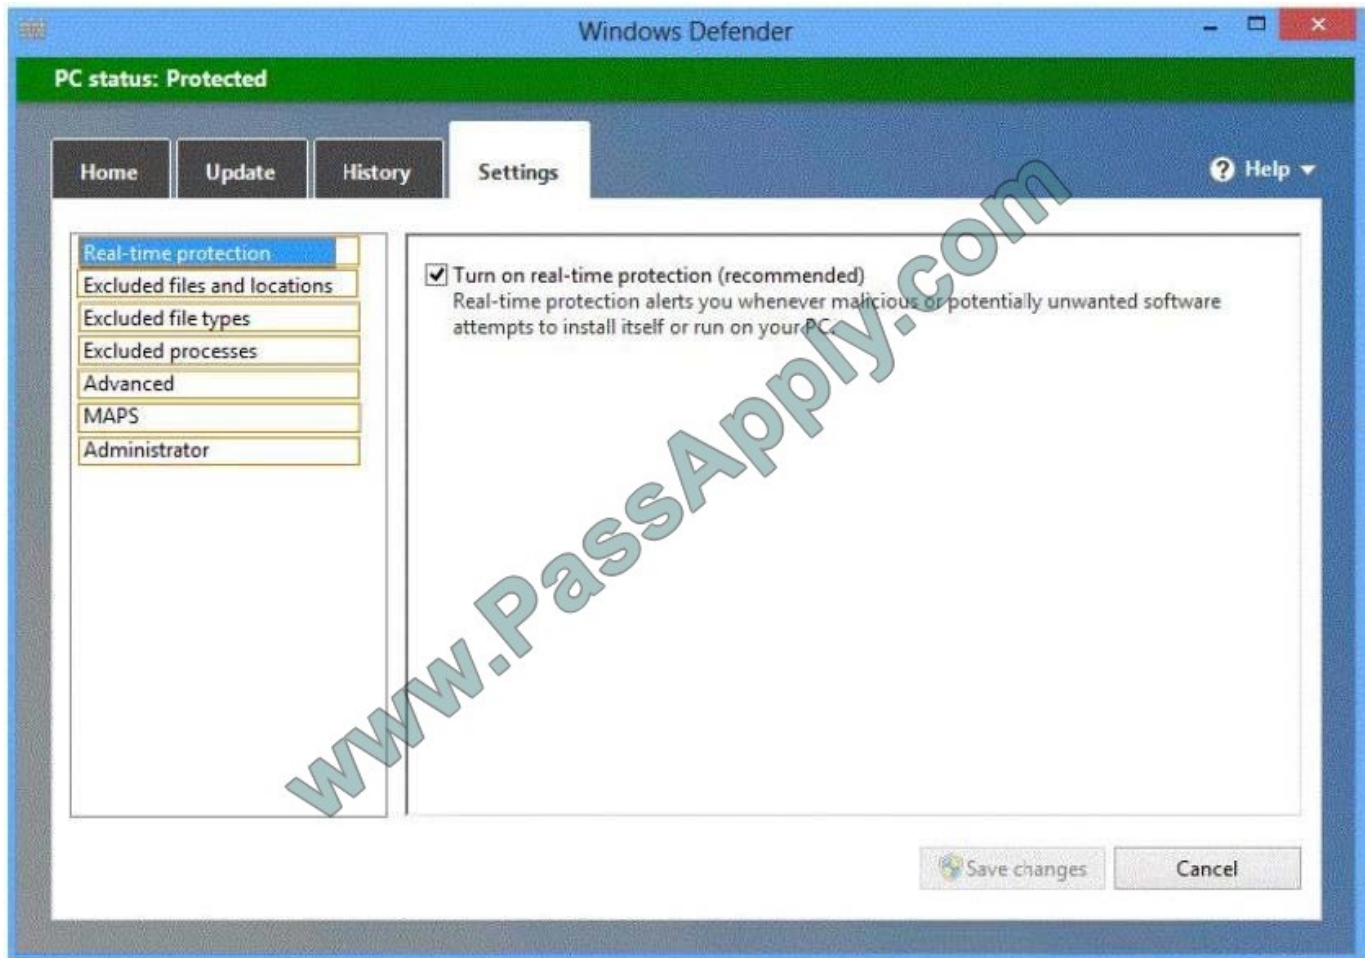

Windows Defender full scan every morning at 07:00.

Users report that they are unable to view previous instances of detected malware when they arrive to work.

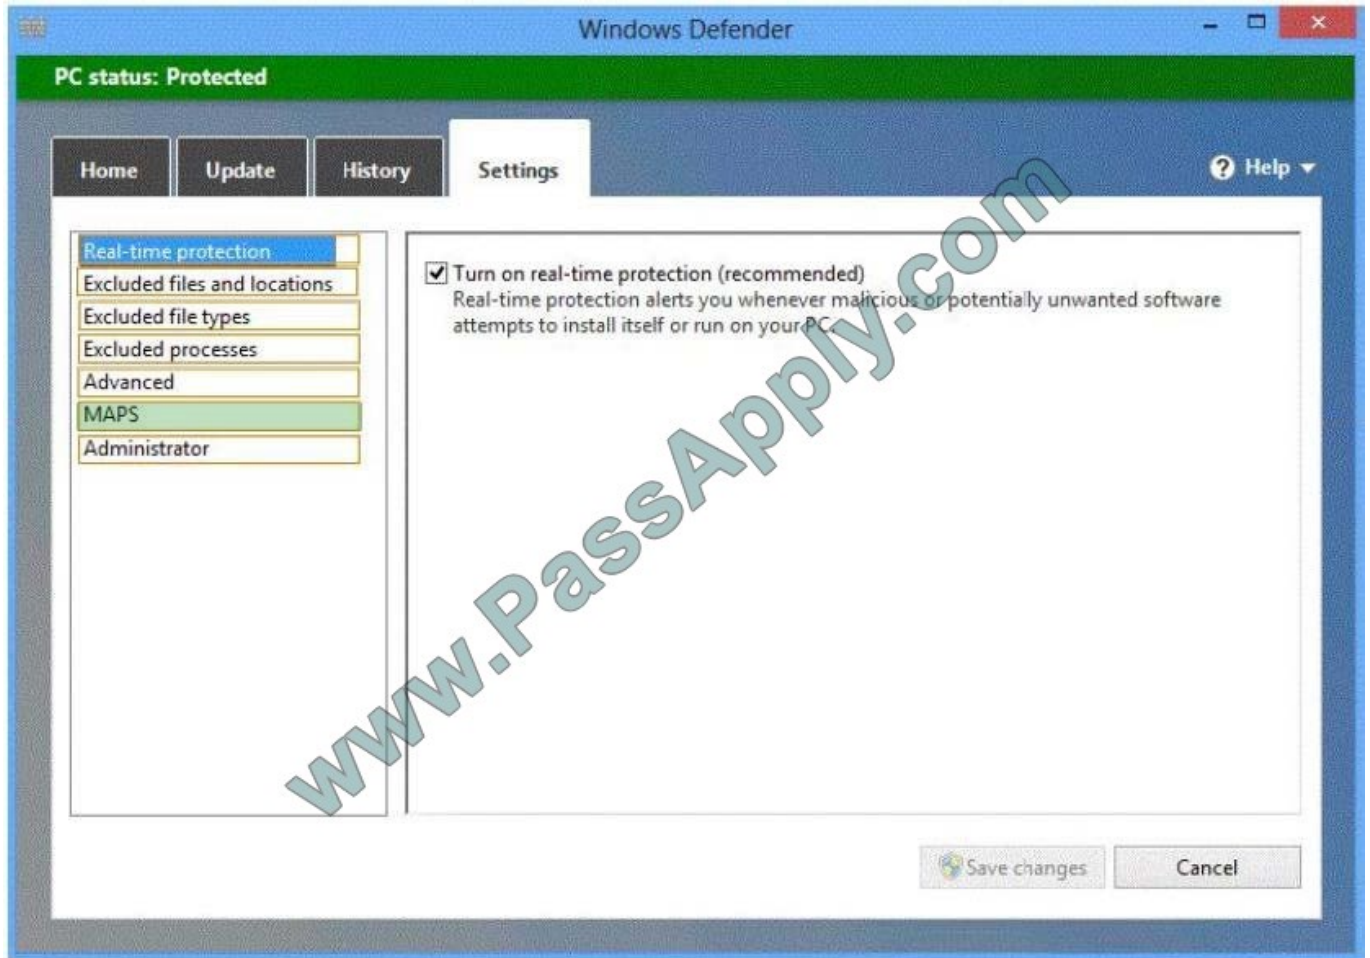

You need to ensure that all users can see previous instances of detected malware in Windows Defender.

Which option on the Settings tab should you select? (To answer, select the appropriate option in the answer area.)
