QUESTION 1

You have a server named Server1 that runs Windows Server 2012 R2 and a 64-bit UEFI-based computer named Computer1 that runs Windows 8.1 Enterprise.

Server1 is a Windows Deployment Services (WDS) server.

From the installation media of the 32-bit version of Windows 8.1, you add a boot image named Image1 to WDS.

You need to use WDS to capture an image of Computer1.

What should you do first on Server1?

- A. Add an install image from the Windows 8.1 installation media.
- B. Run wdsutil.exe and specify the New-CaptureImage and the Architecture:x64 parameters.
- C. Add a boot image from the Windows Server 2012 R2 installation media.
- D. Run wdsutil.exe and specify the New-CaptureImage and the Architecture:x86 parameters.

Correct Answer: C

QUESTION 2

DRAG DROP

You need to recommend a procedure for configuring the deployment of Office 2013 on the production network.

Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Run **setup.exe /admin**.
- Run **setup.exe** and specify the */packager* parameter.
- Download the Office Customization Tool (OCT).
- Run **setup.exe** and specify the */download* parameter.
- Modify the Configuration.xml file
- Download the Office Deployment Tool.

Download the Office Deployment Tool.

Modify the Configuration.xml file.

Run **setup.exe** and specify the */download* parameter.

Run **setup.exe** and specify the */packager* parameter.

QUESTION 3

You maintain a base operating system image for your company. The image does not contain hardware-specific drivers. The image is distributed to the desktop support team, which is responsible for maintaining a driver repository on a file

share named Share1.

You have a client computer named Client1 that runs Windows 8.1 Enterprise. Client1 will be used as the reference computer for the next version of the base image.

You plan to generalize Client1, capture an image of Client1, and then distribute the image to the desktop support team.

You need to configure a Sysprep answer file to ensure that the next time the image starts, device drivers from Share1 are added to the local driver repository. The solution must ensure that the drivers are added without entering the Out-of-Box-Experience (OOBE) phase.

Which configuration pass in the unattended file should you configure?

- A. specialize
- B. auditSystem
- C. generalize
- D. windowsPE

Correct Answer: D

QUESTION 4

HOTSPOT

Your company has a main office and a branch office. The main office is located in Montreal. The branch office is located in Seattle. The offices connect to each other by using a WAN link. The WAN link is congested during business hours.

Each office has a high-bandwidth connection to the Internet.

The network contains one Active Directory domain named contoso.com. The relevant servers in the domain are configured as shown in the following table.

Server name	Location	Role
Server1	Montreal	Microsoft System Center 2012 R2 Configuration Manager site server
Server2	Seattle	File server

You need to use Server2 to perform an operating system deployment. The solution must minimize the amount of bandwidth used on the WAN link during business hours. What should you do? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Site role to deploy:

- Branch distribution point on Server2
- Cloud distribution point
- Distribution point on Server2

Server1 setting to enable:

- BITS
- Pull distribution point
- Rate limits

Correct Answer:

Answer Area

Site role to deploy:

Branch distribution point on Server2
Cloud distribution point
Distribution point on Server2

Server1 setting to enable:

BITS
Pull distribution point
Rate limits

QUESTION 5

HOTSPOT

You need to identify which actions must be performed to distribute the boot images from Server1 to Server101, once Server101 is configured as a distribution point.

What should you identify? To answer, select the appropriate server to perform each action in the answer area.

Hot Area:

Answer Area

Run extractcontent.exe:

Server1
Server101

Run the Distribute Content Wizard:

Server1
Server101

Run the Create Prestaged Content File Wizard:

Server1
Server101

Modify the Distribution Settings of the boot images:

Server1
Server101

Enable the distribution point for the prestaged content:

Server1
Server101

Correct Answer:

Answer Area

Run extractcontent.exe:

Server1
Server101

Run the Distribute Content Wizard:

Server1
Server101

Run the Create Prestaged Content File Wizard:

Server1
Server101

Modify the Distribution Settings of the boot images:

Server1
Server101

Enable the distribution point for the prestaged content:

Server1
Server101
