**QUESTION 1**

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details in a question apply only to that question.

You have a mobile device that connects to a 4G network and a laptop.

You work from a remote location that does not have Internet access.

You plan to use the mobile device as a mobile hotspot for the laptop, so that you can access files from the corporate office.

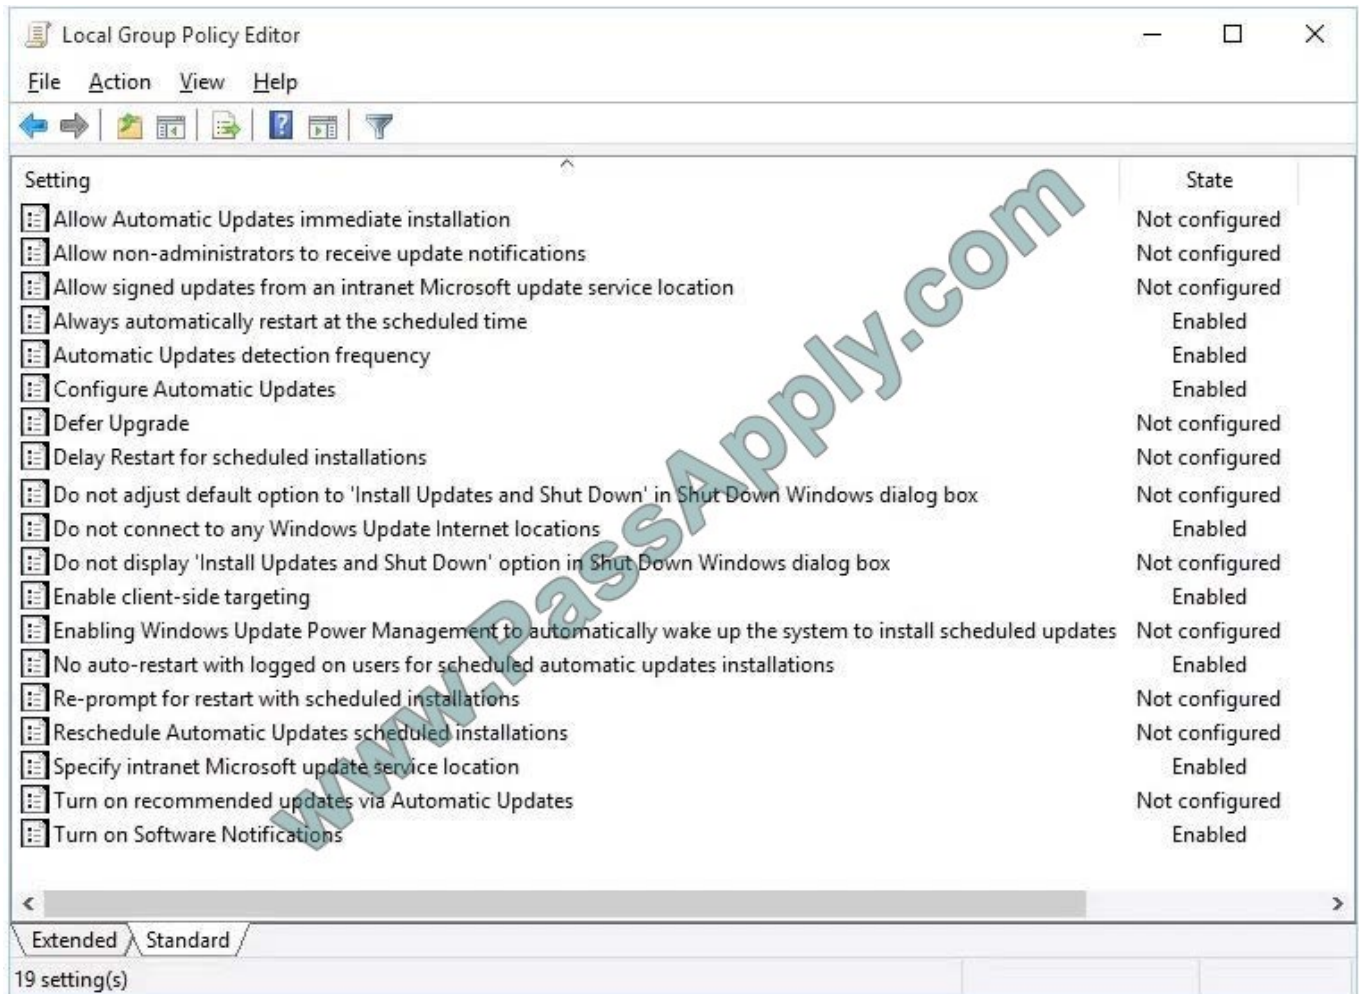

Which Control Panel application should you use on the laptop to connect to the mobile hotspot?

- A. Phone and Modem
- B. RemoteApp and Desktop Connections
- C. System
- D. Credential Manager
- E. Work Folders
- F. Power Options
- G. Sync Center
- H. Network and Sharing Center

Correct Answer: H

QUESTION 2

You have a computer that runs Windows 10 Enterprise that has a local group policy as shown in the following graphic.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Windows updates will be downloaded from
[answer choice].

If a user is logged into the computer and an update requires a restart, the computer will
[answer choice].

Windows Server Update Services only

Microsoft Windows Update servers only

Windows Server Updates Services and Microsoft Windows Update servers

restart when the user signs out

restart within a maximum delay of 3 hours

restart within a maximum delay of 3 days

Correct Answer:

Answer Area

Windows updates will be downloaded from

[answer choice].

- Windows Server Update Services only
- Microsoft Windows Update servers only
- Windows Server Updates Services and Microsoft Windows Update servers

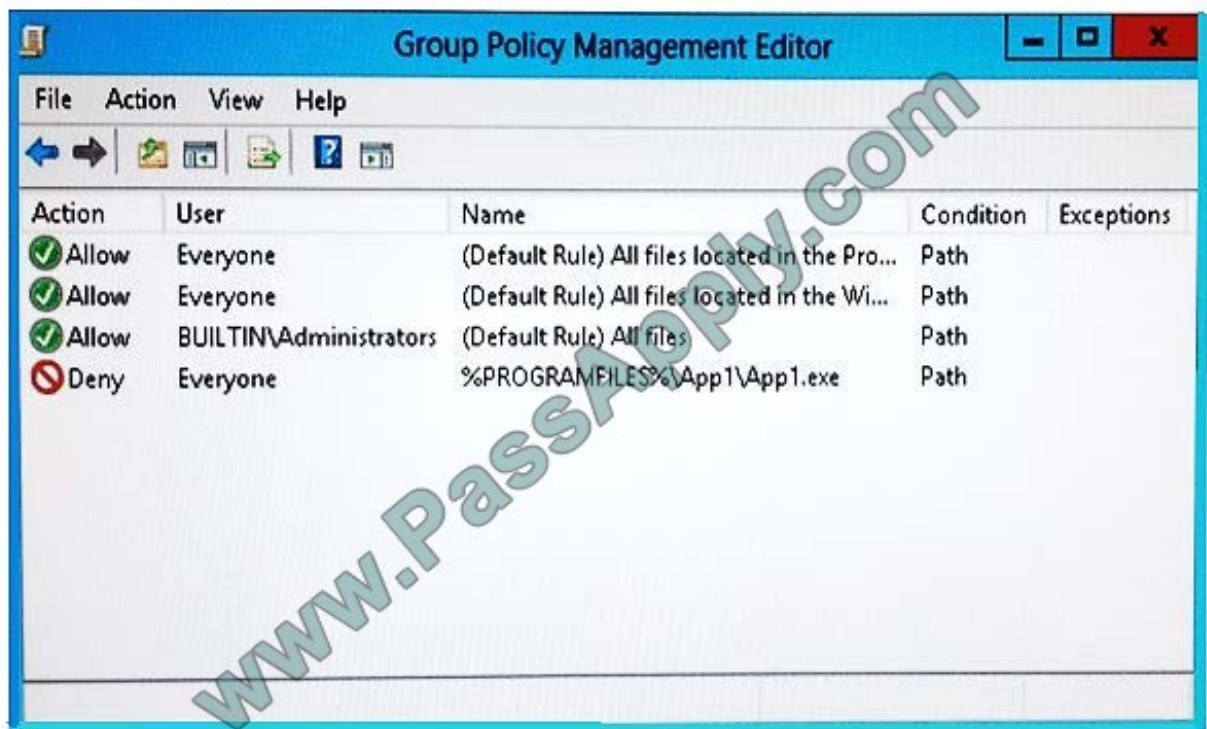

If a user is logged into the computer and an update requires a restart, the computer will

[answer choice].

- restart when the user signs out
- restart within a maximum delay of 3 hours
- restart within a maximum delay of 3 days

Your network contains an Active Directory domain.

The Default Domain Policy contains the AppLocker settings configured as shown in the AppLocker Settings exhibit. (Click the Exhibit button.)

QUESTION 3

A laptop runs Windows 10 Enterprise. You connect the laptop to a corporate network by using a VPN connection.

The company policy requires all company computers to be restricted from the Internet access while connected to the

corporate network.

You need to configure this laptop to ensure that it cannot access the Internet when its VPN connection to the corporate network is active.

What should you do?

- A. Configure the VPN connection to use only PPTP
- B. In the TCP/IPv4 properties of the VPN connection, enable the Use default gateway on remote network setting
- C. In the TCP/IPv4 properties of the VPN connection, disable the Use default gateway on remote network setting
- D. Configure the VPN connection to use only L2TP/IPSec

Correct Answer: C

QUESTION 4

You have a computer that runs Windows 10.

You plan to configure Windows Hello.

You need to configure the PIN complexity rules for the computer.

Which policy setting should you modify?

- A. Credential User Interface
- B. Microsoft Passport for Work
- C. Smart Card
- D. Biometrics
- E. Windows Logon Options

Correct Answer: B

QUESTION 5

You have a Windows 10 Enterprise computer.

The computer has a shared folder named C:\Marketing. The shared folder is on an NTFS volume.

The current NTFS and share permissions are configured as follows.

Group name	NTFS permission	Shared folder permission
Everyone	Read and Execute	Read
Marketing	Modify	Full Control

UserA is a member of both the Everyone group and the Marketing group. UserA must access C:\Marketing from across the network. You need to identify the effective permissions of UserA to the C:\Marketing folder. What permission should you identify?

- A. Full Control
- B. Read and Execute
- C. Read
- D. Modify

Correct Answer: D

UserA is a member of both the Everyone group and the Marketing group and UserA must access C:\Marketing from across the network. When accessing a file locally, you combine the NTFS permissions granted to your account either directly or by way of group membership. The 'least\' restrictive permission is then the permission that applies. In this question, the NTFS permission is the least restrictive of Read/Execute and Modify... so Modify is the effective permission. When accessing a folder or file across the network, you combine the effective NTFS permissions (Modify in this case) with the effective Share permissions granted to your account either directly or by way of group membership (Full Control in this case). The 'most\' restrictive permission is then the permission that applies. Modify is more restrictive than Full Control so Modify is the effective permission.
