QUESTION 1

You have Windows 10 Enterprise desktop computer and a Windows 10 Enterprise laptop computer.

You connect from the desktop to the laptop by using Remote Desktop. You are unable to copy any files between the desktop and the laptop during the Remote Desktop session.

You need to ensure that you can copy files between the computers during the Remote Desktop session.

What should you do?

- A. On the desktop, add the laptop to the trusted hosts in Windows Remote Management (WinRM).
- B. On the laptop, open Remote Desktop Connection and configure the Local devices and resources settings.
- C. On the desktop, open Remote Desktop Connection and configure the Local devices and resources settings.
- D. On the laptop, add the desktop to the trusted hosts in Windows Remote Management (WinRM).

Correct Answer: C

QUESTION 2

An organization has client computers that run Windows 8. You upgrade the client computers to Windows 10 Enterprise without migrating the local user profiles. You install the Windows Assessment and Deployment Kit (ADK) in the environment.

You need to migrate the user profiles from the Windows 8 installation to the Windows 10 Enterprise installation.

What should you do first on each client computer?

- A. Run the loadstate command.
- B. Copy the Default Profile to a folder on drive C.
- C. Run the ImageX command.
- D. Run Windows Easy Transfer and select the user profile to migrate.
- E. Run the scanstate command.

Correct Answer: E

QUESTION 3

You administer 50 laptops that run Windows 7 Professional 32-bit. You want to install Windows 10 Enterprise 64-bit on every laptop. Users will keep their own laptops.

You need to ensure that user application settings, Windows settings, and user files are maintained after Windows 10 Enterprise is installed.

Which four actions should you perform in sequence?

Select and Place:

| | Answer Area |
|--|-------------|
| Run the Scanstate.exe c:\store / i:migdocs.xml /i:migapp.xml /v:13 /c / hardlink /nocompress command. | |
| Copy the User State Migration Tool (USMT) files and tools to the source computer. | |
| Run the Scanstate.exe c:\store / i:migdocs.xml /i:migapp.xml /v:13 /c command. | |
| Install Windows 10 Enterprise on the existing Windows partition with no formatting or repartitioning. Install standard operating environment applications. | |
| Run the Loadstate.exe c:\store / i:migdocs.xml /i:migapp.xml /v:13 /c / hardlink /nocompress command. | |
| Install Windows 10 Enterprise by deleting all existing partitions and creating a new one. Install standard operating environment applications. | |

Correct Answer:

| | Answer Area |
|--|--|
| | Copy the User State Migration Tool (USMT) files and tools to the source computer. |
| | Run the Scanstate.exe c:\store / i:migdocs.xml /i:migapp.xml /v:13 /c / hardlink /nocompress command. |
| Run the Scanstate.exe c:\store / i:migdocs.xml /i:migapp.xml /v:13 /c command. | Install Windows 10 Enterprise on the existing Windows partition with no formatting or repartitioning. Install standard operating environment applications. |
| | Run the Loadstate.exe c:\store / i:migdocs.xml /i:migapp.xml /v:13 /c / hardlink /nocompress command. |
| Install Windows 10 Enterprise by deleting all existing partitions and creating a new one. Install standard operating environment applications. | |

QUESTION 4

You have a Windows 10 Enterprise computer. You have a 1-terabyte external hard drive.

You purchase a second 1-terabyte external hard drive.

You need to create a fault-tolerant volume that includes both external hard drives. You also need to ensure that additional external hard drives can be added to the volume.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Restore your data from the backup.
- From Storage Spaces, create a new storage pool. Set the Resiliency Type to **two-way mirror**.
- From Storage Spaces, create a new storage pool. Set the Resiliency Type to **parity**.
- From Storage Spaces, create a new storage pool. Set the Resiliency Type to **three-way mirror**.
- Back up the existing data on your original external hard drive.
- From Disk Management, create and format a new volume on the second external drive.
- From Disk Management, create a mirrored volume containing the two external drives.

Answer Area

Correct Answer:

Actions

From Storage Spaces, create a new storage pool. Set the Resiliency Type to **parity**.

From Storage Spaces, create a new storage pool. Set the Resiliency Type to **three-way mirror**.

From Disk Management, create and format a new volume on the second external drive.

From Disk Management, create a mirrored volume containing the two external drives.

Answer Area

Back up the existing data on your original external hard drive.

From Storage Spaces, create a new storage pool. Set the Resiliency Type to **two-way mirror**.

Restore your data from the backup.

QUESTION 5

You have a computer named Computer1 that runs Windows 10 Enterprise. Computer1 is configured to receive Windows updates from the Internet.

You occasionally connect Computer1 to a Wi-Fi network named Network1.

You need to prevent Computer1 from downloading Windows updates while connected to Network1.

What should you do?

- A. Configure the Data usage setting
- B. Configure the Choose how updates are delivered setting
- C. Configure the Wi-Fi Sense setting
- D. Set Network1 as a metered connection

Correct Answer: D
