QUESTION 1

A company has Windows 10 Enterprise client computers. Users store data files in their user profile libraries.

You need to ensure that you can restore data files to any date while minimizing system overhead.

Which two actions should you perform? Each answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Turn on File History.
- B. Configure Windows 7 File Recovery.
- C. Configure settings to save copies of files daily.
- D. Enable Storage Spaces.

Correct Answer: AC

QUESTION 2

You have a Windows To Go workspace on a USB memory drive.

When you attempt to start a computer from the drive, you receive the following error message:

"Your PC/Device needs to be repaired. The application or operating system couldn't be loaded because a required file is missing or contains errors." You need to repair the Windows To Go workspace.

What should you do?

- A. Restart the computer in safe mode, and then perform a system restore.
- B. Restart the computer, and then select the Last Known Good Configuration.
- C. Reapply the Windows To Go image to the USB memory drive.
- D. Restart the computer by using a recovery disk, and then perform a system restore.

Correct Answer: C

QUESTION 3

A company has a branch office with Windows 10 Enterprise client computers. Files are saved locally on the client computers and are not backed up regularly.

You need to ensure that you can retrieve previous versions of locally saved files in the event of a system failure.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Configure a shared folder named SharedArchive on the network.	
Create a folder named LocalArchive on the system drive.	
Turn on File History and copy the data to the Documents library.	
Turn on File History and copy the data to the system drive.	
Configure File History to use the LocalArchive folder.	
Configure File History to use the SharedArchive folder.	

Correct Answer:

Actions	Answer Area
	Configure a shared folder named SharedArchive on the network.
Create a folder named LocalArchive on the system drive.	Turn on File History and copy the data to the Documents library.
	Configure File History to use the SharedArchive folder.
Turn on File History and copy the data to the system drive.	
Configure File History to use the LocalArchive folder.	

QUESTION 4

Your network contains an Active Directory domain named contoso.com.

A user receives the following error message when attempting to sign in to a computer: "The trust relationship between this workstation and the primary domain failed."

You need to ensure that the user can sign in to the computer by using a domain user account.

Which tool should you use?

- A. Netstat
- B. Netsh

C. Netdom

D. Netcfg

Correct Answer: C

QUESTION 5

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You plan to develop a line-of-business application and to deploy the application by using Windows Store for Business.

You need to ensure that users can see the private store of your company when they sign in to the Windows Store for Business.

What should you do first?

A. Provision a Windows Dev Center dev account for each user.

B. Assign the Microsoft Store for Business Admin role to each user.

C. Provision a Microsoft Azure Active Directory (Azure AD) account for each user.

D. Provision a Microsoft account for each user.

E. Assign the Microsoft Store for Business Purchaser role to each user.

Correct Answer: C
