### QUESTION 1

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have an application named App1 installed on a computer named Computer1. Computer1 runs Windows 10. App1 saves data to %UserProfile%\App1\Data.

You need to ensure that you can recover the App1 data if Computer1 fails.

What should you configure?

- A. share permissions
- B. application control policies
- C. Encrypting File System (EFS) settings
- D. NTFS permissions
- E. HomeGroup settings
- F. Microsoft OneDrive
- G. software restriction policies
- H. account policies

Correct Answer: F

---

### QUESTION 2

A company has an Active Directory Domain Services (AD DS) domain with Windows 10 Enterprise client computers.

You need to configure 20 portable computers so that they sleep after 20 minutes when running on battery power. You must accomplish this goal by using the least amount of administrative effort.

Which two actions should you perform? Each correct answer presents part of the complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a Group Policy object (GPO) that configures the Sleep Management settings.
- B. Edit the local Group Policy to configure the Power Management settings.
- C. Edit the local Group Policy to configure the Shut Down options.
- D. Link the Group Policy object (GPO) to the organizational unit containing the portable computers.
- E. Create a Group Policy object (GPO) that configures the Power Management settings.

Correct Answer: AD

### QUESTION 3

You need to configure Intune policies to meet the following requirements:

Jailbroken devices must be reported.

Noncompliant devices must not be allowed to connect to Microsoft Exchange.

Android devices must have passwords of 8 characters.

iOS devices must have passwords of 8 characters.

What type of policies should you implement? To answer, select the appropriate policy for each requirement in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

### QUESTION 4

You administer Windows 10 Enterprise computers in your company network. All computers are members of an Active Directory Domain Services (AD DS) domain. A server named Server1 runs Windows Server 2012 R2 and has an IP address of 10.10.10.20. Server1 is configured to use port 10987 for Remote Desktop connections.

From your Windows 10 Enterprise computer, you need to create a Remote Desktop connection to Server1.

What should you do?

- A. Run `mstsc.exe /v:10.10.10.20:10987`.
- B. Run `mstsc.exe /v:10.10.10.20 /p:10987`.
- C. From the General tab of your Remote Desktop connection, enter 10.10.10.20 port:10987.
- D. From the Advanced tab of your Remote Desktop connection, configure the port of Server1 in the server authentication field.

Correct Answer: A

---

#### QUESTION 5

You administer a corporate network. Employees use docking stations for Windows 10 devices when the employees are working in their offices.

The wireless adapters of the devices are connected to a specific network. The docking stations are connected to a separate network that uses twisted pair cabling.

You need to ensure that the devices can access all resources from each network using either network adapter.

What should you do?

- A. Configure a network bridge.
- B. Configure Internet Connection Sharing (ICS).
- C. Configure VPN Reconnect.
- D. Turn on Network Discovery.

Correct Answer: C
