QUESTION 1

You use a Windows 8.1 tablet. The tablet receives Windows Update updates automatically from the Internet.

The tablet has Wi-Fi and is connected to a 3G mobile broadband Wi-Fi hot spot.

You need to minimize data usage while connected to this hot spot.

What should you do?

- A. Turn on Airplane Mode.
- B. Disable File and Print Sharing for mobile broadband connections.
- C. Configure the interface metric of IP settings for Wi-Fi connection as 1.
- D. Edit the Inbound Rule of Windows Firewall, and then disable Internet Control Message Protocol (ICMP) traffic.
- E. Configure the broadband connection as a metered network.

Correct Answer: E

You can limit the bandwidth used by the broadband connection by configuring it as a metered network. A metered network is a network where data downloaded is `metered` (measured) and you are charged for the amount of data downloaded.

Setting a connection as metered prevents Windows from automatically using bandwidth in a number of ways including the following:

Disables automatic downloading of Windows updates: Windows won't automatically download updates from Windows Update on metered Internet connections. You'll get a "Download" button you can click whenever you want to install updates.

Disables automatic downloading of app updates: The Windows Store won't automatically download updates for your installed "Store apps" on metered connections, either. Desktop apps like Chrome, Firefox, and others will continue updating

themselves normally.

Tiles may not update: Microsoft says that the live tiles on your Start menu or Start screen "may" stop updating on a metered connection:

QUESTION 2

Device runs Windows 10 Enterprise. Users report sound issues with the device.

An administrator installs a driver package that causes several devices to be nonfunctional. The driver package updates the video and sound card drivers and disables the modem.

You have determined the following:

The original driver for the video card was correct.

The sound card driver in the downloaded package was not the correct driver.

The modem driver was not updated.

You download the correct driver for the sound card.

You need to return all devices to a functional state.

Which action should you recommend for each peripheral device? To answer, configure the appropriate options in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Video card:

Rollback driver
Update driver
Enable device
Disable device

Sound card:

Rollback driver
Update driver
Enable device
Disable device

Modem:

Rollback driver
Update driver
Enable device
Disable device

Correct Answer:

Video card:

Rollback driver
Update driver
Enable device
Disable device

Sound card:

Rollback driver
Update driver
Enable device
Disable device

Modem:

Rollback driver
Update driver
Enable device
Disable device

QUESTION 3

You have a computer named Computer1.

You obtain a new driver for a device installed on Computer1. The driver package is stored in C:\Drivers and includes the following files:

*Driver.inf

*Driver.dil

*Drivet.sys

*Driver.cat

You need to install the driver on Computer1 by using File Explorer.

Which file should you use to initiate the installation?

A. Driver.sys

B. Driver.dll

C. Driver.cat

D. Driver.inf

Correct Answer: B

QUESTION 5

Note: This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all.

You have a computer named Computer1 that has a virtual hard disk (VHD) named Disk1.vhdx.

You plan to configure Computer1 for dual boot from Disk1.vhdx.

You need to install Windows on Disk1.vhdx by using dism.exe.

What should you run before you install Windows?

- A. Add-Windows Image
- B. bcdboot.exe
- C. bcdedit.exe
- D. bootcfg.exe
- E. bootim.exe
- F. bootsect.exe
- G. diskpart.exe
- H. Expand-Windows Image

Correct Answer: G
