QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

An organization's Microsoft SAM Optimization Model (SOM) maturity level is Basic. The organization accounts for 20 percent of assets in a centralized repository. To reach the SOM Rationalized maturity level, the organization must have 50

percent of the assets in a centralized inventory.

Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change in needed.
- B. 75
- C. 96
- D. 100

Correct Answer: C

QUESTION 2

An organization plans to use SAM to manage their Microsoft Open licenses and computers.

You need to identify which tool to use to complete the following steps:

Perform an initial inventory of software that is in use.

Identify licenses that have previously been purchased.

Export inventory results into a Microsoft Excel-compatible report.

Which tool should you use to meet each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Tool
Identifying existing inventory	
	Microsoft Assessment and Planning Toolkit (MAP)
	Microsoft License Advisor (MLA)
	Microsoft Volume Licensing Service Center (VLSC)
Identifying existing licenses	
	Microsoft Assessment and Planning Toolkit (MAP)
	Microsoft License Advisor (MLA)
	Microsoft Volume Licensing Service Center (VLSC)
Export inventory results	
	Microsoft Assessment and Planning Toolkit (MAP)
	Microsoft License Advisor (MLA)
	Microsoft Volume Licensing Service Center (VLSC)

Correct Answer:

Answer Area

Requirement	Tool
Identifying existing inventory	Microsoft Assessment and Planning Toolkit (MAP)
	Microsoft License Advisor (MLA)
	Microsoft Volume Licensing Service Center (VLSC)
Identifying existing licenses	Microsoft Assessment and Planning Toolkit (MAP)
	Microsoft License Advisor (MLA)
	Microsoft Volume Licensing Service Center (VLSC)
Export inventory results	Microsoft Assessment and Planning Toolkit (MAP)
	Microsoft License Advisor (MLA)
	Microsoft Volume Licensing Service Center (VLSC)

QUESTION 3

You are leading a SAM program improvement effort that focuses on limiting application use to approved Software-as-a-Service (SaaS) applications.

You determine that employees have purchased a wide variety of unapproved mobile SaaS applications.

You need to identify which unapproved mobile SaaS apps are in use and prevent their use.

Which tool should you use?

- A. Microsoft Cloud App Security (MCAS)
- B. Microsoft Intune
- C. Microsoft Operations Management Suite (OMS)
- D. System Center Configuration Manager (ConfigMgr)
- E. Microsoft Assessment and Planning Toolkit (MAP)

Correct Answer: B

Intune app protection policies help protect your company data on devices that are enrolled into Intune. You can also use app protection policies on employee owned devices that are not enrolled for management in Intune. In this case, even though your company doesn't manage the device, you still need to make sure that company data and resources are protected.

App-based Conditional Access and client app management add a security layer by making sure only client apps that support Intune app protection policies can access Exchange online and other Office 365 services.

Incorrect Answers:

A: Microsoft Cloud App Security's anomaly detection policies provide out-of-the-box user and entity behavioral analytics (UEBA) and machine learning (ML) so that you can immediately run advanced threat detection across your cloud environment.

QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You represent a SAM partner.

A client must consolidate their IT departments into a single business unit. The client was previously assessed in the Microsoft SAM Optimization Model (SOM) key competencies and assigned the maturity level of Standardized.

You need to ensure that the client progresses to the next SOM level in the Deployment Process key competency.

What should the client do?

- A. Purchase software only from approved vendors.
- B. Publish software deployment reports to stakeholders.
- C. Use information provided by a software publisher.
- D. Use software metadata generated by the client.
- E. Deploy only approved software.
- F. Formulate a retirement process.
- G. Create an inventory of deployed assets.
- H. Maintain updated records of deployed assets.

Correct Answer: B

**QUESTION 5**

You work as a consultant for an organization that has 500 devices. The organization's environment consists of different departments that run different versions of Microsoft applications. The organization purchases licenses on an as needed basis, without coordination. Some support agreements are no longer valid.

The organization must centralize management of software licenses. All machines must run the same versions of applications. You must also ensure that the organization's support agreements are up to date.

You need to recommend changes to the organization's software management policies.

What should you recommend?

- A. Migrate users to the latest supported software versions that the organization already owns.
- B. Enroll the organization in the Enterprise Agreement (EA) program.
- C. Contact multiple vendors for quotes.
- D. Have each department determine their own approach to purchasing software.

Correct Answer: B
