QUESTION 1

The question requires that you evaluate the underlined text to determine if it is correct.

You implement a SAM improvement plan for an organization. You are reviewing the lifecycle management processes.

You must use Microsoft Assessment and Planning Toolkit (MAP) to identify unused software, and automate removal of unused instances of targeted applications.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. System Center Configuration Manager (ConfigMgr)
- C. Microsoft Operations Management Suite (OMS)
- D. Microsoft Intune

Correct Answer: B

Using inventory, System Center Configuration Manager (SCCM) detect if an application is installed, it also monitors usage using Software Metering and uninstall application using deployment mechanisms. Combining all, you can deliver a great solution to minimize licenses cost to your organization.

QUESTION 2

You are assigned to work with your company's procurement team to clarify which Microsoft licensing the company is currently using. This project has no budget so any programs you use must be free.

You need to determine which Microsoft products are installed on the network.

Which tool should you use?

- A. Microsoft Assessment and Planning Toolkit (MAP)
- B. Microsoft Intune
- C. Microsoft Enterprise Mobility + Security (EMS) Suite
- D. Microsoft Volume Licensing Service Center (VLSC)
- E. System Center Configuration Manager (ConfigMgr)

Correct Answer: A

The MAP Toolkit is a FREE, agentless tool designed to simplify and streamline the IT infrastructure planning process across multiple scenarios through network-wide automated discovery and assessments.

The MAP Toolkit inventories computer hardware, software, and operating systems in small or large IT environments

without needing to install software on the target computers.

QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

An organization needs to collect an operating system and hardware inventory report for computers in a workgroup environment.

The inventory report must be delivered as a Microsoft Excel workbook. You must minimize the administrative effort required to generate and deliver the report.

You need to generate the spreadsheet.

What should you use?

- A. Microsoft Assessment and Planning Toolkit (MAP)
- B. Microsoft Deployment Toolkit (MDT)
- C. Microsoft Intune
- D. Microsoft License Advisor (MLA)
- E. Microsoft Security Compliance Manager (SCM)
- F. System Center Configuration Manager (ConfigMgr)
- G. System Center Operations Manager (OpsMgr)
- H. Microsoft Virtual Machine Manager (VMM)

Correct Answer: A

You can use the Microsoft Assessment and Planning Toolkit (MAP) to generate inventory reports in Excel format.

QUESTION 4

You are designing a purchasing process for a SAM program. An organization overpays for software licenses. Managers are making independent software purchases on their corporate credit cards.

The solution has the following requirements:

Ensure that the organization receives volume discount.

Minimize costs associated with software licenses purchases.

Ensure that the employees comply with new policies.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You should implement an employee awareness training program.	<input type="checkbox"/>	<input type="checkbox"/>
You should establish and publish a list of approved software vendors.	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

Answer Area

Statement	Yes	No
You should implement an employee awareness training program.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
You should establish and publish a list of approved software vendors.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

QUESTION 5

Your customer has an Active Directory forest that contains a System Center Configuration Manager (ConfigMgr) server.

Users have mobile devices that are frequently disconnected from the network.

The customer does not have a change management system in place. The current hardware inventory is out-of-date.

You need to update the hardware inventory to meet the following requirements:

Ensure that all desktop and mobile devices are included in the inventory.

Minimize the amount of time it takes to update the inventory.

What should you do?

- A. Gather install, move, add, change (IMAC) activities.
- B. Perform a manual count of all desktop computers.
- C. Perform a network discovery scan.
- D. Gather information from the Active Directory database, the ConfigMgr database, and the purchasing history.

Correct Answer: D
