QUESTION 1

An organization plans to migrate an on-premises solution to Microsoft Azure. Before the migration, the organization plans to implement SAM best practices.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point

Hot Area:

Answer Area

Statement	Yes	No
Using cloud services minimizes licensing costs for the organization.	○	○
Migrating to cloud services makes SAM processes easier to adopt.	○	○
The organization must adopt SAM processes before they migrate to cloud services.	○	○

Correct Answer:

Answer Area

Statement	Yes	No
Using cloud services minimizes licensing costs for the organization.	●	○
Migrating to cloud services makes SAM processes easier to adopt.	●	○
The organization must adopt SAM processes before they migrate to cloud services.	○	●

QUESTION 2

You are performing a SAM assessment for a customer that reconciles software inventory annually. Ninety-five percent

of software assets are currently in inventory.

Software deployment reports are available to SAM stakeholders. License Entitlement records are reconciled with vendor records quarterly.

You need to identify the maturity level for each SAM component.

At which maturity level is each component? To answer, drag the appropriate SAM maturity levels to the correct components. Each SAM maturity level may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Maturity levels		SAM component	Maturity level
Basic	Standardized	Software inventory	
Rationalized	Dynamic	Software deployment reporting	
		License entitlement records	

Correct Answer:

Answer Area

| Maturity levels		SAM component	Maturity level
Basic	Standardized	Software inventory	Standardized
Rationalized	Dynamic	Software deployment reporting	Rationalized
		License entitlement records	Rationalized

QUESTION 3

You use System Center Configuration Manager (ConfigMgr) to track software usage across all computers for an organization.

You must ensure that software usage data is delivered to specific users in Microsoft Excel format.
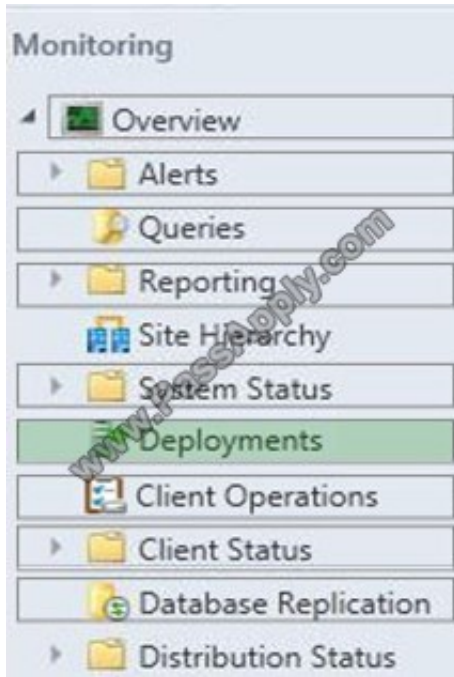

On the Monitoring page of the ConfigMgr console, which option should you select? To answer, select the appropriate option in the answer area.

Hot Area:

Monitoring

- Overview
  - Alerts
  - Queries
  - Reporting
  - Site Hierarchy
  - System Status
  - Deployments
  - Client Operations
  - Client Status
  - Database Replication
  - Distribution Status

Correct Answer:

QUESTION 4

You maintain a SAM program for a customer. The customer experiences the following recent developments:

A new SAM tool is purchased.

The SAM program design is complete.

The assigned SAM manager leaves the company.

The SAM program budget is approved and allocated.

You need to maintain the SAM program.

What should you do first?

A. Secure executive sponsorship.

B. Secure the support of the IT department.

C. Recommend starting a new SAM program.

D. Generate a Microsoft Product License Advisor (MPLA) report.

Correct Answer: C

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

You are leading a self-audit of your organization\\\'s Microsoft software license position.

You need to recommend a tool to reconcile software inventory with software license entitlements.

You have the following requirements:

Collect software inventory from Windows desktop operating systems. Enable reconciliation of installed software to license purchases. Minimize infrastructure costs.

You recommend the Microsoft Assessment and Planning Toolkit (MAP) to meet the license reconciliation reporting requirements.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

A. No change is needed.

B. System Center Configuration Manager (ConfigMgr)

C. Microsoft Intune

D. Microsoft Asset Inventory Service (AIS)

Correct Answer: D

Microsoft Asset Inventory Service (AIS) is able to perform Software recognition and reconciliation through a Microsoft hosted service. License reconciliation limited to Microsoft Software only Microsoft only agent platforms Requires Software Assurance
