QUESTION 1

Your company is introducing a new line of computers.

All of the computers use Unified Extensible Firmware Interface (UEFI).

You need to create a partition that includes the Windows Recovery Environment (Windows RE).

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Set the partition Type to Primary.
- B. Set the partition TypeID to 0x07.
- C. Set the partition Type to EFI.
- D. Set the partition TypeID to de94bba2-06d104d40-a16a-bfd50179d6ac.
- E. Set the partition TypeID to 0x27.
- F. Set the partition Type to MSR.

Correct Answer: AD

QUESTION 2

You work for an OEM system builder.

What are three possible ways to distribute Windows OEM desktop operating system licenses? Each correct answer presents a complete solution.

- A. a sealed System Builder pack that is provided from the purchase of a new computer that does NOT have an operating preinstalled
- B. an unsealed System Builder pack that is purchased separately from a computer
- C. an unsealed System Builder pack that is provided from the purchase of a new computer that does NOT have an operating system preinstalled
- D. a sealed System Builder pack that is purchased separately from a computer
- E. a sealed System Builder pack that is provided from the purchase of a new computer that has an operating system preinstalled
- F. an unsealed System Builder pack that is provided from the purchase of a new computer that has an operating system preinstalled

Correct Answer: AEF

QUESTION 3

You start a client computer by using Pre-Boot Execution Environment (PXE). You load a default version of Windows Preinstallation Environment (windows PE) that was created by using the Windows Assessment and Deployment Kit (Windows ADK).

You have a file server that contains a shared folder. The folder contains an image of Windows. The folder is shared to the local Users group only.

The computer has a system partition and a Windows partition.

You need to apply a reference installation from a network share.

Which command should you run before applying the image?

- A. net.exe
- B. mshta.exe
- C. drvinst.exe
- D. wpeinit.exe

Correct Answer: A

QUESTION 4

You plan to deliver 10 client computers to a customer. The computers will have Windows 10 installed.

The customer identifies the following tasks that must be performed by users of the computers:

You plan to preinstall Microsoft Office 2016 on the computers.

You need to recommend an Office 2016 license solution for the customer. The solution must minimize licensing costs.

What should you recommend?

- A. Office Professional 2016
- B. Office 365 Home
- C. Office Home and Business 2016
- D. Office 365 Business Volume Licensing

Correct Answer: C

QUESTION 5

You have a server named Server1 that runs Windows Server 2012 and has the Windows Deployment Services server

role installed.

You recently removed a third-party DHCP server from the network, and then installed the DHCP Server role on Server1.

You create a scope on Server1.

You discover that client computers attempting to receive a Windows 10 image fail to connect to Server1.

You verify that the client computers on the network can receive an IP address from Server1.

You need to ensure that the computers attempting to receive an image can connect to Server1.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. From the Windows Deployment Services console, click the DHCP tab, and then select the Do not listen on port 67 check box.
- B. From the Windows Deployment Services console, click the DHCP tab, and then select the Configure DHCP option 60 to indicate that this is also a PXE server check box.
- C. From the DHCP console, click Server Options, and then set the value of Option 66 to Server1.
- D. From the Windows Deployment Services console, click the PXE Response tab, and then set the value of the Delay in seconds to 3.
- E. From the DHCP console, click Server Options, and then set the value of Option 67 to install.wim.

Correct Answer: AB
