QUESTION 1

Your network contains an Active Directory domain. The domain contains an Active Directory Rights Management Services (AD RMS) cluster.

All client computers run Windows 10 Enterprise.

You need to control from which versions of Windows users can access rights-protected content

What should you create?

- A. an exclusion policy
- B. a security policy
- C. a trust policy

Correct Answer: A

QUESTION 2

Your network contains an Active Directory domain named contoso.com.

You deploy a standalone root certification authority (CA) named CA1.

You need to autoenroll domain computers for certificates by using a custom certificate template.

What should you do first?

- A. Modify the Policy Module for CA1.
- B. Modify the Exit Module for CA1.
- C. Install a standalone subordinate CA.
- D. Install an enterprise subordinate CA.

Correct Answer: D

You can't create templates or configure auto-enrollment on a standalone CA.

QUESTION 3

Your company recently deployed a new child domain to an Active Directory forest.

You discover that a user modified the Default Domain Policy to configure several Windows components in the child domain.

A company policy states that the Default Domain Policy must be used only to configure domain-wide security settings.

You create a new Group Policy object (GPO) and configure the settings for the Windows components in the new GPO.

You need to restore the Default Domain Policy to the default settings from when the domain was first installed.

What should you do?

- A. From Group Policy Management, click Starter GPOs, and then click Manage Backups.
- B. From a command prompt, run the dcpofix.exe command.
- C. From Windows PowerShell, run the Copy-GPO cmdlet.
- D. Run ntdsutil.exe to perform a metadata cleanup and a semantic database analysis.

Correct Answer: B

QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choice. An answer choice may be correct for more than one question in the series. Each question is Independent of the other questions in this series.

Information and details provided in a question apply only to that question.

Your network contains an Active Directory domain named contoso.com. The domain functional level is Windows Server 2012 R2.

Your company hires 3 new security administrators to manage sensitive user data.

You create a user account named Security1 for the security administrator.

You need to ensure that the password for Security1 has at least 12 characters and is modified every 10 days.

The solution must apply to Security 1 only.

Which tool should you use?

- A. Dsadd quota
- B. Dsmmod
- C. Active Directory Administrative Center
- D. Dsacis
- E. Dsamain

Correct Answer: C

Using Fine-Grained Password Policies you specify multiple password policies in a single domain and apply different restrictions for password and account lockout policies to different sets of users in a domain. You can apply stricter settings to privileged accounts and less strict settings to the accounts of other users. To enable Fine-Grained Password Policies (FGPP), you need to open the Active Directory Administrative Center (ADAC) <https://blogs.technet.microsoft.com/canitpro/2013/05/29/step-by-step-enabling-and-using-fine-grained-password>

QUESTION 5

Your network contains an Active Directory forest named contoso.com.

A partner company has a forest named fabrikam.com. Each forest contains one domain.

You need to provide access for a group named Research in fabrikam.com to resources in contoso.com. The solution must use the principle of least privilege.

What should you do?

- A. Create an external trust from fabrikam.com to contoso.com. Enable Active Directory split permissions in fabrikam.com.
- B. Create an external trust from contoso.com to fabrikam.com. Enable Active Directory split permissions in contoso.com.
- C. Create a one-way forest trust from contoso.com to fabrikam.com that uses selective authentication.
- D. Create a one-way forest trust from fabrikam.com to contoso.com that uses selective authentication.

Correct Answer: C
