QUESTION 1

You need to recommend changes to the existing environment to meet the email requirement. What should you recommend?

- A. Implement a twoway forest trust that has selective authentication.
- B. Implement qualified subordination.
- C. Deploy the FabrikamCA root certificate to all of the client computers.
- D. Deploy a user certificate from FabrikamCA to all of the users.

Correct Answer: B

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012. Server1 resides in the perimeter network and has the Remote Access server role installed.

Some users have laptop computers that run Windows 7 and are joined to the domain. Some users work from home by using their home computers. The home computers run either Windows XP, Windows Vista/ Windows 7, or Windows 8.

You need to configure the computers for remote access. Which three actions should you perform?

To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Publish the connection files to a web site in the company's extranet.	
Publish a software deployment package by using a Group Policy object (GPO).	
Create a RemoteApp application package.	
Create a Connection Manager Administration Kit (CMAK) package.	
Install the Connection Manager Administration Kit (CMAK).	

Correct Answer:

Actions	Answer Area
	Install the Connection Manager Administration Kit (CMAK).
Publish a software deployment package by using a Group Policy object (GPO).	Create a Connection Manager Administration Kit (CMAK) package.
Create a RemoteApp application package.	Publish the connection files to a web site in the company's extranet.

QUESTION 3

Your company has a main office and a branch office.

The network contains an Active Directory domain named contoso.com. The domain contains three domain controllers. The domain controllers are configured as shown in the following table.

Domain controller name	Location	Type
DC1	Main office	Writable domain controller
DC2	Main office	Writable domain controller
RODC1	Branch office	Read-only domain controller (RODC)

The domain contains two global groups. The groups are configured as shown in the following table.

Group name	Description
Helpdesk	Supports users throughout the company.
Branch1Users	Contains users that work in the branch office only.

You need to ensure that the RODC is configured to meet the following requirements:

Cache passwords for all of the members of Branch1Users.

Prevent the caching of passwords for the members of Helpdesk.

What should you do?

- A. Modify the password replication policy of RODC1.
- B. Modify the delegation settings of RODC1.
- C. Modify the membership of the Allowed RODC Password Replication group.

- D. Modify the membership of the Denied RODC Password Replication group.
- E. Modify the delegation settings of DC1 and DC2.
- F. Install the BranchCache feature on RODC1.
- G. Create a Password Settings object (PSO) for the Helpdesk group.
- H. Create a Password Settings object (PSO) for the Branch1Users group.

Correct Answer: A

QUESTION 4

What method should you use to deploy servers?

- A. WDS
- B. AIK
- C. ADK
- D. EDT

Correct Answer: A

QUESTION 5

Your company is a hosting provider that provides cloud-based services to multiple customers. Each customer has its own Active Directory forest located in your company's datacenter. You plan to provide VPN access to each customer. The

VPN solution will use RADIUS for authentication services and accounting services.

You need to recommend a solution to forward authentication and accounting messages from the perimeter network to the Active Directory forest of each customer.

What should you recommend?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. One RADIUS proxy for each customer and Active Directory Federation Services (AD FS)
- B. A RADIUS server for each customer and one RADIUS proxy
- C. One RADIUS proxy and one Active Directory Lightweight Directory Services (AD LDS) instance for each customer
- D. A RADIUS server for each customer and a RADIUS proxy for each customer

Correct Answer: B
